

for the apprehension of the slayers of Deputy Sheriff Crossley and Nelson, who were shot and killed two days ago by two men they had arrested on a theft charge.

Texas River, Which "Ran Wild"

The San Antonio river at Houston street, San Antonio, Texas. When this river overflowed its banks last week scores of persons in San Antonio lost their lives and millions of dollars worth of property was destroyed. The river winds its way through the heart of San Antonio. In many places its banks even in normal times rise only a few inches above the water, as the photo shows. The picture, taken in the business district, shows some of the buildings that were badly damaged by the flood. The river is now reported normal again.

Americans Who Negotiated Peace With Germany Snapped in Berlin

U. S. Commissioner Dressel (center) and two other members of U. S. commission photographed in Berlin after signing the treaty. This photo, which has just reached the U. S., shows members of the American delegation who negotiated for the state department and signed the peace treaty with Germany a short time ago. Ellis Loring Dressel headed the commission.

Cattle Inspection Pleases Visalians

VISALIA, Sept. 24.—Splendid results are being attained throughout the county as the result of the recently inaugurated cattle inspection system by which Jean McPhail, of Visalia, became inspector for this district, according to the opinions of cattle shippers here. First criticisms have dwindled to a commendation of the system which is improving weekly to a degree as to be almost as near perfect as it is possible to make it.

The one inspector for the entire district replaced a number of community inspectors, and McPhail with his assistants make possible immediate inspection anywhere in the county on 24 hours' notice.

They Are Booked to Sparkle on Big Football Elevens This Season

At left, Captain Aldrich of Yale; at right, above, Center Bill Day of Pennsylvania and Wesley Brooker of Harvard.

These are three of the veterans of last year's grid teams who are expected to shine when the present season gets under way. Brooker of Harvard is noted as a scholar as well as an athlete. He quit school to go to war. Came back, won a scholarship, and a place on the eleven the same year.

The Men Who Fail

By DR. WM. E. BARTON

At a commercial men's dinner which I attended a few days ago, a man, prominent in the business world and an authority of some note, said:

"Out of every hundred business men in America, ninety-eight fail."

I have heard that statement before, and I wonder if it is true. He has means of more accurate knowledge than I, and yet I am disposed to doubt if the proportion is as large as that. I should be inclined to think that the proportion of successes is much larger.

And yet, the way is straight and the gate is narrow that leads to success anywhere, and few there be that find it. For wide is the way and many are the tributary paths that lead to failure.

But this I think is true, that nowhere near ninety-eight per cent of American men fail permanently. The man who fails as a lawyer, makes a success as a real estate agent. The man who fails as a preacher goes into life insurance and succeeds. The man who fails as an editor makes a success as a stock broker.

In this land the opportunities are so free, and the spirit of generosity in business is so broad, that few men fail permanently if they have character, health and industry.

All of us have failed at something, and no one of us is anything like the success he ought to be. Success in America is almost too easy. We should be stronger men if we had to toil more earnestly for our success.

You have tried something and have failed? Phillips Brooks was a flat failure as a school teacher, and Lyones Grant was no great success as a farmer-tanner.

No man is a complete failure till he gives up the struggle.

So long as a man has courage to try again, no one has a right to call him a failure.

If you have failed, get up and try again.

Disenchantment will decrease wars but increase friendships.

Mines

Repairing the damages isn't as pleasant as marching on Paris with Von Kluck. Crews on mine sweepers sigh with relief. They have removed all of the moored mines in the North Sea and have practically cleared the Mediterranean.

When the war ended, everyone said, "Mines will make the seas unsafe for generations." Yet how many ships have you heard about, sunk by mines since the Armistice? Practically none.

She

In overalls, Mrs. Catherine Wegman works high up in the air with a steel crew building a suspension bridge at Kingston, N. Y.

She is the only woman outdoor welder in the world. Also, a widow with two children to support. Born in Denmark.

Is there any man's job a woman cannot handle? Apparently, not.

Autumn Exposition

of New Modes

AN exhibition of deep interest to all the feminine visitors to the Fair at least will be that displaying the Autumn modes in fine apparel, as they are portrayed at the Wonder. Of decided smartness and unique design are the suits and coats from Mangone, the dresses from Milgrim, Nemser, and Peggy Paige, fashion designers who stand pre-eminent in the art of costuming.

MADAME Flanders and Adair have conceived quite new ideas in blouses and many of their loveliest examples may be seen here. In Fashion's sphere this season blouses may go to any length in decoration and none can deny that they arrive most beautifully in this point of super-charm.

CLOSE in Fashion's interest to these habiliments are the complements of chapeaux and furs. Hats as one sees them at the Wonder are modish, chic and distinctly individual—the furs, from the smart little choker to the elaborate coat the embodiment of rich, soft luxury.

The Wonder

Women's Apparel—Exclusively

FRESNO, CALIFORNIA

1820 Tulare St.
Just Below the
Hughes Hotel

Work on the new building is progressing most satisfactorily; excavations are well under way and before many weeks the building itself will be begun.

Money in the Bank

---makes the sick days less worrisome

There's nothing to hinder copiousness to much as worry and anxiety about money matters and nothing so sure to cause speedy recovery as the knowledge that all the bills can be easily met.

That is just one of the advantages of a comfortable bank account. You may never need the money to pay doctors' bills, but it is there if you need it for that purpose.

Our Savings department is thoroughly efficient and will be glad to assist you along this road of savings.

NEW STADIUM AT BERKELEY TO BE UNIQUE

Double Deck Seating
Is Arranged For
Spectators

Campaign to Finance
It to Start On
October 3

With a double-deck arrangement for seats that will project 150,000 spectators toward the playing field, much the same as in a theater and projected toward the stage, California's Memorial Stadium, to be built at Berkeley adjoining the campus during 1921-1922, will offer something unique in stadium construction. The double-deck arrangement of seats was used successfully in building the stands at the Polo grounds in New York, but other university stadiums have been built on a different plan, notably those at Harvard and Yale. At Yale, for example, the spectators are on one seating plan, and the main who happen to draw a seat on the outskirts of the bleachers is removed a very great distance from the playing field.

Start Campaign Oct. 3

In the California stadium, the greatest horizontal distance of any seat from the center of the field will be 350 feet, because of the double-deck seating scheme. The stadium, located on the southwest corner, immediately adjoining the campus, will be built after a campaign for funds beginning October 3, when a limited group of 50,000 seats will be placed on sale throughout the state to alumni, students, and the general public. A \$100 payment will secure script, good—dollar-for-dollar—for two \$5 seats at the California-Stanford games each year for the next ten years, whether the game is played at Berkeley or at Palo Alto, and including this year's game at Palo Alto. Script also may be used, if not expended for big game seats, for any other University of California contest, including football, basketball, track, and any other activities. The stadium will be of steel and reinforced concrete, elliptical in its plan, and completely surrounding the playing field. It will be given an architectural beauty that will distinguish it from all other stadiums by the inclusion of alcoves, balconies and winding stairways. It will measure 725 feet from north to south on the major axis, and 425 feet east to west. To eliminate confusion, each of the stands will have its own corridor and stairway, so that the distribution of spectators in their respective sections will be taken care of entirely outside of the building. Four great portals, on a level with the playing field, will serve as dramatic points of entrance for the opposing teams as they come out to the field. These portals cannot be a wide corridor, with training quarters, dressing rooms, and other necessary features. The stadium will be designed so that the other side of the portals will be the playing field, and the other side of the portals will be the playing field, and the other side of the portals will be the playing field.

Acoustics Studied
The acoustics of the stadium are being carefully studied, and the great structure, in addition to being used for basketball and football games, will be employed for operas, plays, and for civic, state and other meetings.

When the ticket sale opens on October 3, different sections of the stadium will be allotted seats that will be placed at their disposal on a basis that will be as equitable as possible. With a student body of future generations, now numbering 12,000 at Berkeley, and including several thousand at Stanford, to be taken care of, the stadium executive committee has reserved the right to discontinue the sale of seats during the stadium campaign at any time when the maximum number of seats that can be disposed of at the time have been sold. The opening of the stadium campaign on October 3 will mark the first time in years that it has been possible to place in the general public the seats of the California-Stanford contests. Last year more than 62,000 applications for seats were received from students and alumni alone. The executive committee, therefore, urges all those intending to invest in stadium seats, to mail their checks promptly to R. G. Sprout, Treasurer Stadium Fund, University of California, Berkeley, so that checks will reach Sprout on October 3rd.

Fresno people interested in this matter may obtain information from Earl J. Penfomercher, local attorney who is chairman of the Fresno district of the stadium campaign. Information can also be obtained from Edward Kellas, president of the local California Alumni Association.

PASS THROUGH SMALL SAND
MERCED, Sept. 24.—Some excitement was caused by the striking of a small strata of oil sand in No. 2 well of the Nevada-Fresno oil company, about 15 miles southwest of Dos Palos.

Later reports from Los Palos are that the sand strata is of slight extent and the drill has passed through it.

Later reports from Los Palos are that the sand strata is of slight extent and the drill has passed through it.

JESSE GUILFORD WINS NATIONAL GOLF TOURNEY

Former Title Holder Is
Runner-Up

ST. LOUIS, Sept. 24.—Jesse Guilford, Boston, won the national amateur golf championship by defeating Robert Gardner, Chicago, seven and six at the St. Louis Country Club today.

Gardner, who won the title in 1909 and 1915 and was runner-up to Chick Evans in 1916 was not playing his best game part of the way and he was ragged on the greens, missing a birdie putt on the 11th hole.

Guilford, who never before got further than the semi-finals at which point he was defeated by Gardner in 1916, played an unbeatable game on the greens.

Gardner outdrove his opponent on nine holes while Guilford exceeded from the tee on nine. The Chicagoan's drives totaled 5,350 yards, including a topped shot at the 11th hole while Guilford's tee shots with the wood clubs carried him the same distance.

Expanding the 11th, Gardner's total was 5,210 to Guilford's 5,180. The Boston player scored the longest drive, getting 320 yards on the 16th hole. Gardner had three drives 300 yards or more, while Guilford had two.

INDIANA SWAMPS FRANKLIN
CLOONING, Ind., Sept. 24.—Using straight football Indiana today buried Franklin under a 47 to 0 score in the opening game of the season today.

When the ticket sale opens on October 3, different sections of the stadium will be allotted seats that will be placed at their disposal on a basis that will be as equitable as possible.

With a student body of future generations, now numbering 12,000 at Berkeley, and including several thousand at Stanford, to be taken care of, the stadium executive committee has reserved the right to discontinue the sale of seats during the stadium campaign at any time when the maximum number of seats that can be disposed of at the time have been sold.

The opening of the stadium campaign on October 3 will mark the first time in years that it has been possible to place in the general public the seats of the California-Stanford contests.

Last year more than 62,000 applications for seats were received from students and alumni alone. The executive committee, therefore, urges all those intending to invest in stadium seats, to mail their checks promptly to R. G. Sprout, Treasurer Stadium Fund, University of California, Berkeley, so that checks will reach Sprout on October 3rd.

Fresno people interested in this matter may obtain information from Earl J. Penfomercher, local attorney who is chairman of the Fresno district of the stadium campaign. Information can also be obtained from Edward Kellas, president of the local California Alumni Association.

PASS THROUGH SMALL SAND
MERCED, Sept. 24.—Some excitement was caused by the striking of a small strata of oil sand in No. 2 well of the Nevada-Fresno oil company, about 15 miles southwest of Dos Palos.

Later reports from Los Palos are that the sand strata is of slight extent and the drill has passed through it.

SCHOOL ATHLETIC REPRESENTATIVES ELECT OFFICERS

The central section of the California Intercollegiate Federation held its first meeting of the school year at Tulare yesterday afternoon.

Officers for the central section of the federation elected were as follows: W. A. Ferguson, Porterville, president; C. L. Gier, Colton, secretary; and J. R. McKillop, Selma, treasurer.

A lengthy discussion on the supervision of school athletics and the election of committees and officers was held.

Committees on football, basketball, track, baseball and tennis were also chosen.

Championships for last year in all forms of athletics were awarded as follows: Football, Bakersfield; basketball, Dinuba; track, Bakersfield; baseball, Dinuba; tennis, Exeter; boys' singles, Corcoran; girls' singles, Madera; boys' doubles, girls' doubles and mixed doubles.

The classes of football team were chosen as follows: Group I—Fowler, Fresno, Reedley, Eager, Selma, Hanford and Madera. Group II—Dinuba, Exeter, Hanford, Porterville, Tulare, Visalia, Woodlake, Shafter, more and Delano. Group III—Bakersfield and Taft.

It was decided to hold the semi-finals to the football championship series on November 25 and the finals on December 5.

HART SCHAFFNER & MARX CLOTHES

LOW PRICES HAVE MADE THEIR HEADQUARTERS AT THIS STORE

"This store has always been famous for its low prices. Now we are prepared to add to our prestige, for we are better prepared than ever to offer low prices."

Henry Dermer
CLOTHING FURNISHINGS HATS AND SHOES AT POPULAR PRICES

AT THE CORNER OF TULARE AND I STREETS—FRESNO

All over the country you hear of the return of low prices. Living costs have been tremendously reduced. A dollar today will go almost twice as far as it did a year ago and this store is ready to prove convincingly that "low prices have made their headquarters here." Our buyer has been to the eastern markets and bought the very finest merchandise at an astonishing low price. We are ready as never before to offer you clothing and other apparel for men at prices that will convince you that as far as Henry Dermer is concerned a lower price level has been reached.

Remember please, that our clothing comes from factories in which we own an interest and thereby we obtain the most favorable prices and because of this factory connection we are also able to secure price concessions from manufacturers in other lines of men's wearing apparel.

World's Greatest Clothing Values Here!

We claim to offer the world's greatest clothing values right here in Fresno. We invite the fullest investigation. We welcome comparison with any other clothing store in the world. We believe that with our system of acquiring an interest in clothing factories, we are able to buy at a greater advantage than the ordinary clothing store, and consequently we can sell at a lower price.

We don't ask you to take our word for this. We invite you to prove this for yourself. See what other clothiers have to offer and then see what we can sell you the same thing for. We have a wonderful line of

men's suits to show you this season. We think that we have surpassed all previous efforts in value-giving. We have concentrated on worsteds, knowing that a worsted suit will give greater service and more satisfaction than any other material.

We are proud of our line of worsted suits. We guarantee that every worsted suit we sell you will satisfy you in every particular, and if you have any reason to complain we are here to adjust your grievance to your fullest satisfaction.

Could anything be fairer than this?

KHAKI PANTS \$1.95

FACTORY TO YOU"

PEACH GROWERS GET PAYMENTS

Golden Stream Flows To Valley Men

Delivery payments in a golden stream which total from \$12,000 to \$100,000 per day are being poured into the purses of peach growers of the California Peach and Fig Growers association. At the present time, according to General Manager J. F. Newlander, the daily payments on delivery are running slightly at totals that fall little short of the \$100,000 mark.

The association has paid to growers nearly \$1,000,000 on the new crop of peaches. This represents an initial payment of five cents on delivery by the growers to the packing houses. Payments are being made on figs as they are delivered, on a schedule of three cents on Adriatic and four cents on Calimyrna.

The peach crop this year is of excellent quality, and the fruit has been cured with fine results, Newlander says.

FRESNO COUNCIL

Boy Scout News Notes

Troop 12 Plans Trip To Camp

By WILLIAM H. HALEY, JR.
Troop 12 held its regular meeting Friday night.

Plans for a trip next Saturday and Sunday to the Scout camp at Hanford will soon be organized. Bob Johnson, a scout from Great Falls, Montana, was present at the meeting. He told the scouts of life in Montana and of his trip by auto to California.

Troop 12 has the honor of having unraveled the only harmless scout in captivity that doesn't like him. He actually refused a piece of the cake that was served at the meeting.

Any boy who wants to get a piece of cake come on and join.

Troop 2 Secures New Quarters

By MAX HAYDEN.
Troop 2 had its first meeting in its new quarters at the First Presbyterian church, Muller Ward and Albert O. Burns passed their time in the tent. Two new candidates made application to join the troop.

Those who were elected for new patrol leaders were Billy Johnson and Robert Smith. It was decided that each second class scout must pass his first class test before the November Court of Honor or he would lose his rank as patrol leader or any other office which he holds.

Laurence Kimmel keeps the record of merit and demerit and one scout who had received ten demerits was put through the spanking machine.

Next Friday evening will be devoted entirely to the passing of tents by those who are ready for them.

Interesting Meet Held By Scouts

By LAWRENCE PRIOR.
We had a regular meeting with sixteen Scouts, ten visitors and two officials present. A boy from Allington, Mass., was transferred to Troop 14 from Troop 8.

Mr. Hopkins came over to our meeting Friday night and talked about the fair the assistant Scoutmaster gave a test for the tenderfoot class.

Troop 6 Boys To Go On Hike

By C. H. ADKINS.
The regular meeting of Troop 6 was held last Tuesday at 7:30 in the First Baptist church.

The new Scoutmaster was there and we reviewed the tenderfoot test. We also decided to go on a hike Sunday, Sept. 26. The boys are to take the breakfast and for dinner have a winner meal.

Troop 17 Has Regular Meeting

By HARPER HEARN.
Troop 17 held its regular meeting Thursday night. Mr. Fred Trotter, a man from Coalinga, was a visitor of the troop. Dr. Patterson was also a visitor. He showed the scouts hand saws and how to use them. Reginald Knight was elected assistant patrol leader of the Wolf Patrol and Sidney McGraw was elected assistant patrol leader of the Crow Patrol.

Troop 18 Has Drill Practice

By MORTON JACOBS.
The Troop held its weekly meeting at the First Christian church Friday night. Al Wilson, assistant scoutmaster, opened the meeting with the oath, and then the Troop business was talked. The Troop then went up to the roof and held drill practice. Al Wilson drilled the Scouts.

A new patrol which was established some time ago, was named the "Black Bears." Frank Bell is patrol leader of this patrol.

As there was no further business, the pledge of allegiance was given and meeting adjourned.

Troop Elects Patrol Leaders

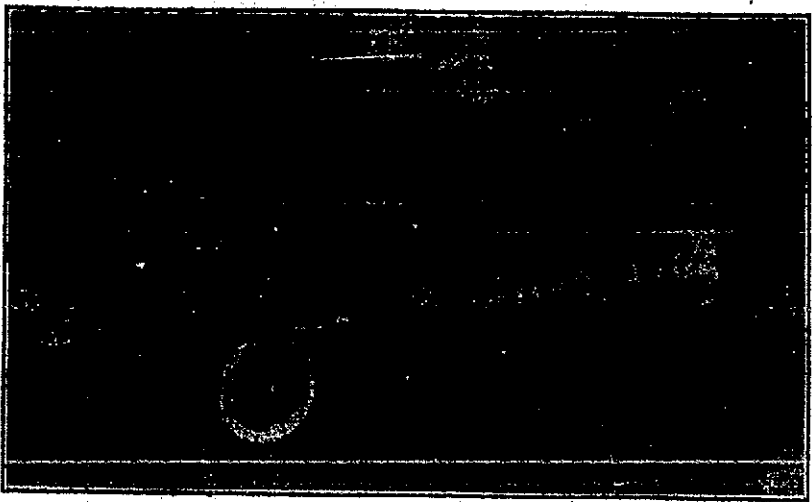

By O. B. DOYLE.
On Friday evening, September 23, Troop One was called to order by Scoutmaster Brower. The election of four patrol leaders and the troop publicity scout took place. Dudley Rutherford, Dudley Bates, Edwin Monitor and Roy Abbott were elected as patrol leaders and O. B. Doyle as the troop publicity scout. Alfred Ham was brought into the troop and Mr. Gillsleeve the champion hammer thrower of the world was appointed assistant scoutmaster.

At the close of the meeting assistant scoutmaster, Koffel, led the scouts in the pledge of allegiance to the troop and the meeting was adjourned.

WILL HOLD RALLY
CLOVIS, Sept. 25.—A rally and basket lunch for the entire congregation of the Clovis Presbyterian church will be held tomorrow (Monday) following the morning service, which will be given over to a rally. Sunday school will convene at 9:45 a. m.

In the evening special services will be conducted by Rev. F. H. Thorne of Clovis who will speak on the subject, "In the Footsteps of the Almighty." The evening service will be illustrated with lantern slides.

Mr. and Mrs. J. W. Hooser, formerly of San Bernardino, Portland and other points, went through Fresno last week on their way south, touring in the modern "Fordingalov." The one room is equipped completely.

BUNGALOW ON WHEELS HOME

Gypsy Life Is Enjoyed By Couple

There is a time in the lives of most human beings when the call of the road is paramount, when the cry is "Up to get away from the city, to live in God's great open country."

Mr. and Mrs. J. W. Hooser, who passed through Fresno last week, accompanied by their four children, have lived the gypsy life as well as the majority of their time is spent in traveling. On this last trip they started from Portland three weeks ago, stopping at most of the towns along the way.

The Hoosers left San Francisco in 1915 after the fair and were on the road for three years. They have cruised the Cascades twice.

The Hoosers' bungalow on wheels is completely equipped with oven, stove, folding bed and cupboards space. Mrs. Hooser says that when Mr. Hooser wants to live he has to live, wild berries making a delicious filling. Mrs. Hooser does her own preserving and jelly-making.

They are now on their way south, where they will reside in San Bernardino, until this turn of the road again calls them.

Handley-Knight Has Two Cars for Show

The Handley-Knight Pacific Co., valley distributors for the Handley-Knight, is showing a stock touring car and a stripped chassis at the fair. Emphasis is laid on the fact that the touring car is strictly a stock car, as many visitors to the fair think the polished radiator and side rails were put on to catch the eye for this occasion only. This is not so, however, and every beautiful and distinguished feature that sets this car apart from the general run of cars is built into every Handley-Knight.

When asked if he intended to make up his exhibit in an unusual way, D. C. Valentini, manager for the local firm said: "We are making a modest display, in one of the best locations in the building, close to the big window in the northwest end. There will be plenty of light on both the touring car and chassis, and what it does not reveal, we will do our best to tell them to ask me all the questions they can think of. Then with a look that as much as said, 'We have something up our sleeve,' he continued. 'We have a little idea that came to us, while wishing for something that would add our mile to the success and originality of the show—but wait until Monday.'

Bruised Meat Causes Unnecessary Waste

Abuse and mistreatment of animals raised for human consumption may occur on the farm, at points of assembly, in stockyards, in railway cars, on highways, in pens and elsewhere. The evidence of abuse usually is not disclosed until the animal is dressed and then you are face to face with the waste of meat which means a great loss in dollars and cents.

Bruises are caused in many ways some of which can not be eliminated—for instance—when animals fall down on slippery places or when they are kicked by other animals. Injuries are also caused during handling and unloading. More often, however, bruises are caused when the deliberate wielding of heavy clubs, prod-poles, which often are spiked with nails, and even pitchfork prongs are brought into play.

The use of the whip in driving an animal evidently gives it more speed but less value, while the "flapjack" which is made of canvas and looks like a razor-strait, can be used with impunity when driving animals.

Meat which has been bruised finds its way to the "lank" and is rendered for use as an inedible product, soap, etc. There is also a great reduction in the money value of the cuts from which the bruised meat has been removed.

Therefore, the State Department of Agriculture advises a more humane handling of animals which are intended for human food as it means a greater profit to all and better meat to the consumer.

"Throw away the club! Remember that every blow means a bruise and that bruise means wasted meat!"

The Best Linen Values That Will Be Available in Many Months

It is easy enough to stage certain kinds of linen sales. It's an easy matter to take a few odds and ends or slow sellers—or certain grades or sizes and cut more or less into regular prices.

BUT THIS ISN'T THAT KIND OF A SALE

It's a great mercantile event—one of the greatest Fresno has seen in years. It brings sweeping horizontal reductions on long renowned imported linens (Erskin and Beveridge) which we have handled for years.

The prices set a new standard in value giving—the quality upholds the old standard of this store.

THIS LINEN SALE INCLUDES

Pure linen pattern cloths with napkins to match. Mercerized pattern cloths with or without napkins. Art Linens. Pure linen table damask by the yard. Mercerized table damask by the yard.

FINE CHEMICAL LABORATORY IN FRESNO CITY

Important Factor in Development of Business
Many Departments Are Maintained for Varied Work

BY E. W. DOUGLAS
The test tube of the chemist, on the surface of a profession that to the average business man carries only a vague atmosphere of scientific research with which he was not intimately conversant, has in the last few years become the personal friend and ally of the progressive individual, whether manufacturer, merchant, builder or farmer. The test tube stands for a profession that in very recent years has become an essential to the development and successful operation of almost every line of business.

The rancher has come to understand only very recently that the report of the chemist can be made as invaluable to him in the analysis of his soils and fertility as it is necessary to the smelter of the great mining companies. The architect and builder no longer trusts entirely to the word of the manufacturer, but has his own tests of crushing strength or tensile strength made by the chemist from the material delivered on the ground.

As this appreciation of the uses of chemical and physical analyses has come into more general circulation, the field of the laboratory has increased, until today in a progressive district such as the great San Joaquin valley there is hardly any business or ranch that does not employ the chemist in some capacity during the year.

Modern Laboratory Work
Fresno is particularly fortunate in having within its city limits one of the most modern and completely equipped laboratories in the West, with expert chemists at its head. For a number of years it has no longer been necessary for purposes of securing expert chemical work to send out of town, and in the Twining Laboratories this city is the center of chemical laboratories in cities of much greater size.

The Twining Laboratories was established in Fresno eight years ago, and the man who organized the concern and in recent years has been its head, is an expert chemist of thirty years' experience. Under him has employed eight persons, all of them experts in their lines. The concern occupies a building at 2118 Merced street which has a ground space of 40,225 feet, and is already becoming too small for the rapidly growing business which it serves. Business finds its way to the Twining Laboratories from as far away as Ohio, and very frequently from the neighboring states of Nevada and other Pacific coast states. But the great bulk of business comes from the laboratories of the San Joaquin valley.

The modern laboratory, such as the Twining Laboratories of Fresno, must cover a broad field. The concern must have the growing needs of the valley as they develop, and has maintained its equipment and staff always in the place in advance of the science upon which it serves. The operations of the laboratory are divided into a number of general departments, of which the most important are agriculture, industrial and engineering, general, physical, bacteriological and pathological work, mining department.

The bacteriological building of the Twining plant, each of the departments has its own quarters, and throughout every department the most modern equipment that is required by science is kept in readiness for use. The agricultural department is one of the most important of the entire plant. For agriculture is the great industry of the San Joaquin valley. In this department the chemist and physical analyst of soils is made by experts, with special reference to the conditions and combinations that render them most fertile. The work of the chemist here shows what soils are suited to certain plants, what is required by soils to make certain plants produce and bear well, and the chemist and other things that the farmer must know to intelligently and successfully operate the growing of crops. In this department fertilizers are analyzed, seeds are tested for purity, diseases are diagnosed and the best methods of treatment are suggested. The work of the chemist in this department covers the analysis of insecticides and fungicides, methods of mixing and applying all kinds of sprays. One of the most important subjects treated is that of alkali lands, and in this field the research work of the chemist determines the availability of the land for various crops and the best methods of reclaiming alkali lands.

The work of the industrial and engineering chemistry department includes wastes, raw materials, and manufacturers. The chemist shows how to recover the waste product and how to utilize it after it is recovered. He conducts manufacturing investigations and reports on experiments on clays, pyroxylin, stone, earthenware, porcelain, enamel, glass, and other products.

Physical Testing
The physical testing department is very complete, and is equipped with a view to supplementing the usefulness of the chemical laboratory to engineers, architects, manufacturers and metal workers. In this department determinations are made of the tensile, compressive and crushing strength of wrought and cast steel, iron alloys, timber, brick, cement, concrete, building stone, aggregate, as well as the strength of textile fabrics, lubricating oils and properties of oils, and the quality of rock, cement, and other materials.

In the bacteriological and pathological laboratory examinations are made of water, milk, foods, sputum, excretions, and investigations are conducted in outbreaks of contagious diseases.

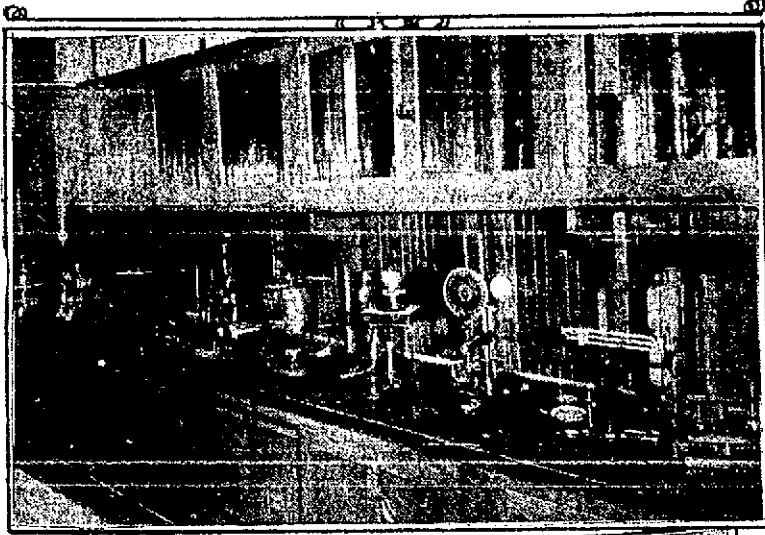

The mining department is equipped for expert and practical use, and for the investigation of metallurgical and manufacturing processes. The Twining Laboratories has been called in for expert technical investigation and evidence in many recent cases, and the reports of its chemists have been written into the court records of quite a few important lawsuits.

The Twining Laboratories are official chemists for the California Associated Raisin Company, the California Raisin and Fig Growers.

Fresno Has First "Resident" Shovel
Fresno is to have what is said to be its first "resident" steam shovel for building work. Thompson Bros. has secured a \$12,000 steam shovel, which is to be put to work on the foundation excavation of the Womble building.

Work is progressing very satisfactorily, according to the R. F. Womble Co., architects and contractors on the building.
The Acme Lithograph Co. of Fresno, located at P and San Bern streets, is advertising.

Glimpses of the Twining Laboratories in Fresno, a completely equipped laboratory. Pictures of the laboratories with formidable arrays of bottles and tubes and below a corner of the laboratory library.

MALAGA PLANS MODERN SCHOOL

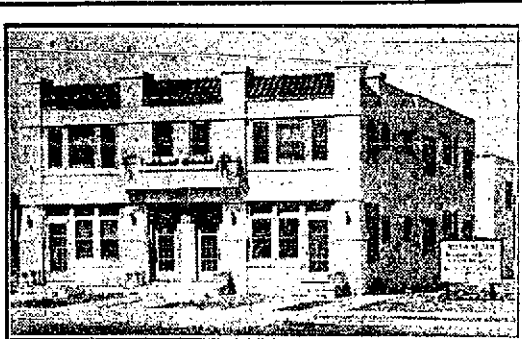

Total Cost Will Be About \$48,000

Plans will be ready in a week in the office of Swartz & Ryland for contractors to figure bids on the construction of the Malaga school building. The school will be built under a bond issue of \$48,000.

According to the plans of the architects, the building will consist of six stories and auditorium, the latter seating 300 persons. The exterior will be of tapestry brick, in variegated shades of red and brown. The building will contain a library, to be used as a branch of the county library, principal's office, it will be equipped with a modern low pressure heating system, and pneumatic water pressure system. Plans are also being prepared for a "tag" for the school principal, to cost approximately \$4,000.

Construction work has started on the McKinley school, which will be of brick exterior, with shingle roof, and will contain five rooms and auditorium. Low pressure heating and pneumatic water system will be installed. The building contract at \$26,447 has been let to J. B. Hart, of Fresno, while the heating system contract was let to Barrett-Hicks at \$1,774.

Work on the Teague school started last week. The building will consist of two rooms and auditorium. Contract has been let to Colman and Spiedel, of San Francisco, \$11,151, which does not include heating and toilet systems.

This Beautiful Apartment House
FOR SALE

Pictured above is one of Fresno's newest most modern apartment houses, located near the Normal on Van Ness, and it's a real money maker.

It is for sale at a real bargain price. Owner will sell all or half interest; might consider a good home as part payment. If you would make and save some money—see this immediately.

SCHOOL PLANS BEING DRAWN

Teilman District to Have Two Buildings

Teilman district school building plans are being prepared in the office of Swartz & Ryland, and bids are to be received in about two weeks. Two buildings are to be erected under one contract, the entire cost being about \$14,000.

The plans of the architect provide for hollow tile construction, with open air corridors and spaces flush to the exterior. It is anticipated that at some time this district, which is near Hooding Park, will be brought into the city, and in preparing the plans the architects have kept this in view.

The same architects are preparing plans for the shower and locker rooms of the new high school athletic field. There will be two of these buildings, to be erected at a cost of approximately \$10,000. They will be of brick, with tile roof, and will be in keeping with the other buildings of the high school group. Instead of building temporary houses, these two buildings are of substantial type, and so located with relation to each other that when the future gymnasium is erected it will fit into the two present buildings, making one harmonious unit.

Plans are now being prepared by Swartz & Ryland for a theater and restaurant in Klamath Falls, Ore., to cost \$100,000. The theater will have a seating capacity of 500 persons. The front will be three stories, and the building will occupy a ground space of 40 by 120 feet. The theater and office building will adjoin the theater, with a ground space of 25 by 100 feet.

Committees Named For State College

The faculty of the State College of Fresno approved the following list of committees and committee members which were presented to them for approval at a recent faculty meeting by the Advisory Council. The committees will be charged with various phases of college work and activities.

The list as approved follows:
Executive—C. L. McLane, chairman; Maude E. Schaeffer, and E. W. Thomas, members.

Admission—James Tobin, chairman; and Committee—Collins.

Assembly and Entertainment—George H. Hunting, chairman; Emory Ratcliffe, L. J. Valentine, Alexander Bradshaw, and Elizabeth Peterson.

Athletics—G. W. Graves, chairman; Juliet Dixon, Margaret Swift, and A. G. Wahlberg.

Auditing and Finance—A. G. Wahlberg, chairman; Grace Allingham, J. A. Nowell, and L. A. Morris.

Building and Grounds—G. W. Graves, chairman; W. B. Grimes, H. W. Felt, Margaret West, and J. D. McDonald.

Calendar—Maude E. Schaeffer, chairman; Katherine Dukes, and Elizabeth Peterson.

Hospitality—Edna Smith, chairman; Kathryn Dahl, Edna Orr James, Emory Ratcliffe, Frances J. Whitlock, and Dr. Burdette.

Library—James Tobin, chairman; E. W. Lindsay, Dr. Fala Lou Walton, and Carl McLean.

Museum and Exhibits—H. J. King, chairman; Martin Powell, J. D. McDonald, and Cora Burdette.

Publishing—Maude E. Schaeffer, chairman; E. W. Lindsay and P. F. Valentine.

Student Affairs—Maude E. Schaeffer, chairman; J. A. Nowell and Margaret Price.

Cruelty Made Basis Of Divorce Suit

Extreme cruelty is charged in the divorce complaint of Lydia Nord, filed yesterday in the superior court against Fred Nord. The plaintiff alleges that her husband has no love for her, according to his statements, and that he would frequently go out with other women. The couple were married February 7, 1916, and have two minor children.

Raisin Company Sues For Contract Breach

Two suits alleging breach of contract were filed yesterday in the superior court by the California Raisin Company against E. Nallan and others and Conrad Winter. The plaintiffs ask that a temporary injunction be issued by the court restraining the defendants from disposing of their raisin crop which they are under contract to sell to the raisin company.

Sues For Damages Because of Burns

Suit for \$3,000 damages sought because of burns about the head and face sustained when a can of flaming gasoline was spilled, was filed yesterday in the superior court here by Antonio Roscellini against J. P. Orplians and "John Doe." The plaintiff alleges that he was severely burned when the defendants spilled a can of flaming gasoline "and" became ignited on him. Expenses incurred as the result of the accident amounting to \$224.90 are also sought in the suit.

ESTATE APPRAISED

The estate of J. W. Marshmeyer, who died March 13, valued at \$19,558.17, is subject to an inheritance tax of \$70.37, according to a report filed yesterday in the superior court by Milton M. Dearing, an inheritance tax appraiser. Heirs under the will are two daughters of the deceased and a niece.

Aermotor Gasoline Pumping Engines

—This illustration shows the Aermotor Pumping Engine mounted on a T-shaped supporting frame. This style of support is best where the platform over the well is shaky, or where there is no satisfactory way of connection to a substantial pump stand. The engine is carried on three stakes driven outside the well. A "U" bolt clamps the frame to the pump so that everything is made solid. This arrangement makes it easy to connect to "any old pump" which is already in the well.

—No. 4 Outfit. When the engine is furnished in connection with an Aermotor Heavy Cast Iron Pump Standard, it is known as the No. 4 Outfit. The engine is the same as shown above, but the pump is added for the convenience of those who desire it. In this case, the engine is carried on a pump which is called a "2A Supporting Frame." It is changed to the pump by two "U" bolts and is stayed at the rear end by a stake driven in the ground outside the platform. Where the pump is good and solid this kind of frame is recommended. This outfit also shows the 2A Walking Beam, which is made entirely of steel. It is furnished only with engines which are ordered with the 2A Supporting Frame unless otherwise specified.

—The speed of the engine is nicely regulated by a simple and reliable ball governor. The governor cuts out both fuel and spark when not needed to maintain the speed of the engine.

—The De Laval Cream Separator constitutes the best method known of separating cream from milk, the most completely, most quickly, most easily and most cheaply. Briefly stated, the process of centrifugal separation consists in pushing the milk through a submergently operated and rapidly revolved steel bowl, the inflow and discharge being continuous and the separation practically instantaneous—with all the advantages and none of the disadvantages of gravity setting or other skimming of milk.

—Invented in 1878, the De Laval was the first continuous cream separator, has revolutionized dairying the world over, has led at all times in every stage of separator improvement and development, and stands forth in the lead of all other cream separators today than ever before.

—Imitating cream separators have come and gone, and there are a few makes of same on the market today, as there have always been, of one kind or another, for twenty years, but the superiority of the improved De Laval Separator of today is as great to other separators as is that of the best of such machines to gravity setting.

Fifteenth Fresno District Fair Opens Tomorrow

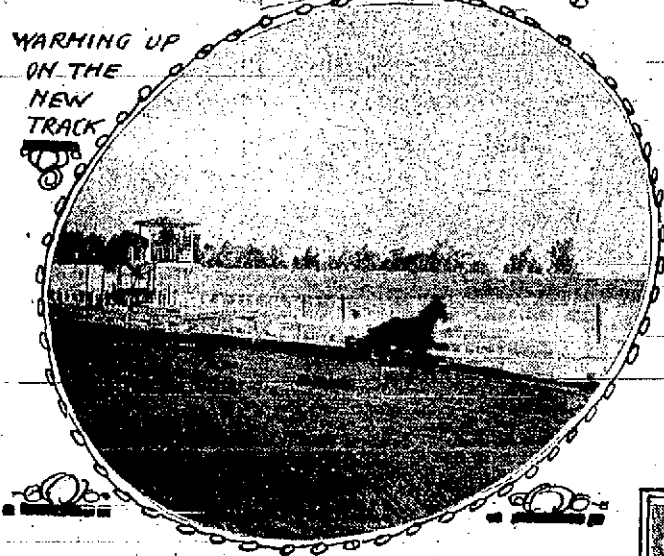

A few of the things which will be of interest to visitors at the fifteenth annual Fresno District Fair which opens here tomorrow. The exhibits are bigger and better than ever before and include many entrants from cities outside of the San Joaquin valley. Record crowds are expected to attend the annual event.

VIEW OF DISTRICT FAIR BUILDINGS

FRANK ELLIOT

MUCH POULTRY TO BE SHOWN

Many Exhibits Will Be In Place at Fair

The finest exhibit of Buff Orpington poultry in the United States is to be shown at the Fresno District Fair this year, according to Manager George Hendley, in charge of the exhibit. It is from the Oak Shadon Farm at San Mateo and includes 27 Buff Orpingtons, 27 White Orpingtons and 27 Rhode Island Reds.

tion, having been erected to accommodate the increased entry list. Most of the entrants are from places outside of the district. Besides the Oak Shadon exhibit, other nationally famous sets of chickens and bantams is that which is entered by George W. Irwin of Portland, Ore., from Oakland, A. E. Silva has entered his dark Brahmas and Buff Minorcas.

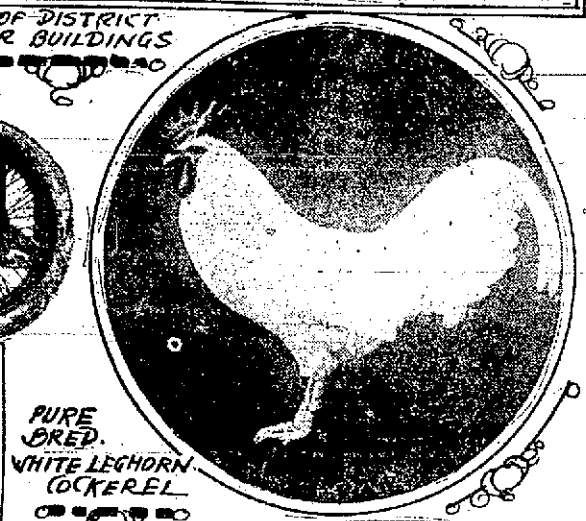

The other entries are from A. J. Ton of Los Angeles and bantams; William A. Smith of Stockton, Bucks, bantams and poultry; from Thomas A. Lacey of Fresno, pigeons; from the Golden Rule Poultry Farm of Ukiah, poultry; from T. P. Evans of Oakland, poultry; from Orrin Kearns of Fresno, bantams; from Ira B. Williams of Kingsburg, poultry; from Harriet M. Pack of Fresno, poultry; from Walter H. Cole of San Jose, poultry; from C. A. Gray of Los Angeles, poultry; from Raymond Nelson of Kingsburg, poultry; from John P. Farney of Kingsburg, poultry; from Radolph C. Nelson of Kingsburg, poultry; from A. H. Palmer of Fresno, rabbits; from Will Dough-

Organize Orchestra At State College

An orchestra was recently organized at the State College, due to the efforts of some talented interested students and Professor A. J. Wadsworth. The members have made plans to entertain additional parties in the work and to give their concert.

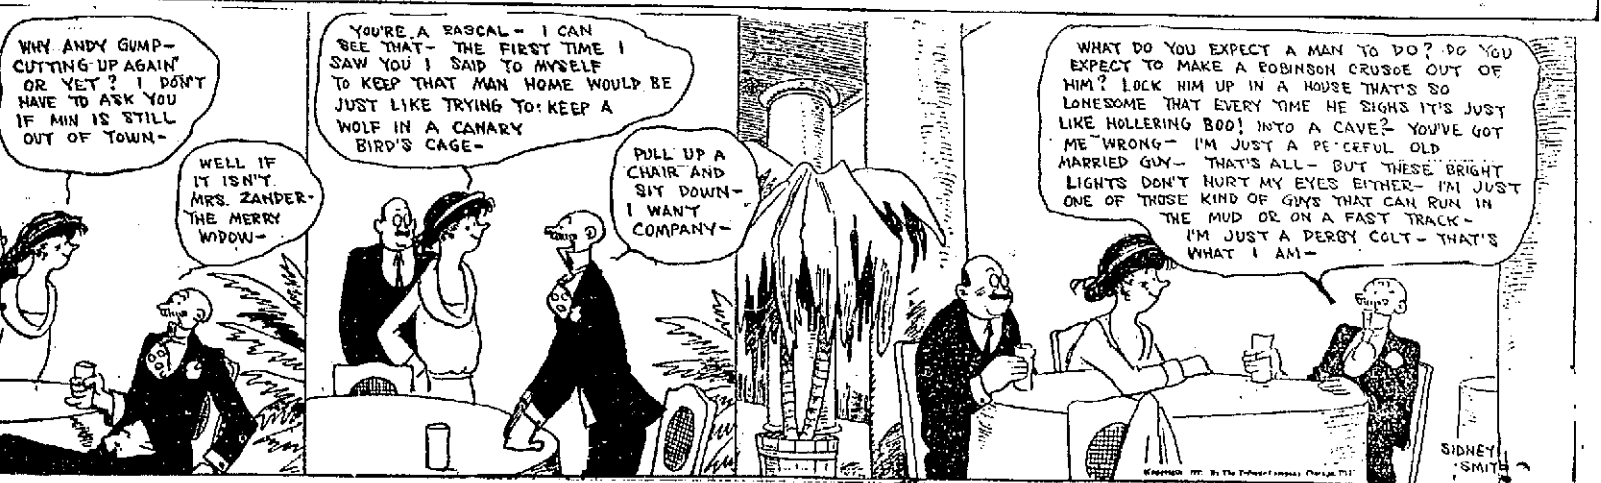

Albert Chabot was elected manager of the orchestra, James West, secretary. Other members are: Robert, Francis, and others.

Daily Parachute Jump

One of the most thrilling facts ever known in Fresno will be the daily parachute jump. The jump will be started by the famous actor, Roy, who has been brought to Fresno for an exclusive performance. This famous actor is to be the center of attraction at the fair.

Other entertainment features include Shadow the world's strongest man, who allows an automobile to drive on him and then run over him; and the Aerial Thompson, who performs the most thrilling stunts ever seen on the wire a hundred feet above the fair grounds. Thompson makes a complete change of clothing on the wire at this elevation, from a clown suit to a full dress suit.

THE GUMPS—WHEN GREEK MEETS GREEK

DE PALMA MAY SPEED TO CITY FOR BIG RACE

Lands In New York And May Enter Fair Classic

Eleven Drivers Are Now Scheduled To Start Saturday

Ralph De Palma arrived in New York from Italy yesterday. A wire was dispatched to him and the moment he stepped off the boat he was given the message from Manager H. E. Patterson of the Fresno District Fair urging him to spare no effort or expense in getting to Fresno by next Saturday, for the big auto race.

Hopes for De Palma's entry had been given up as hopeless during the past few days when the famous speed king had failed to arrive in this country. However, Mrs. De Palma, who is residing in Los Angeles, telephoned Patterson yesterday morning telling him that her husband would arrive in New York at noon.

Whether De Palma will be able to make connections to ship his car out of New York and into Fresno by next Friday morning which would be the latest opportunity he would have to get his car in shape for the grilling race of 150 miles for the national championship and for a purse totaling \$17,000 and 675 points toward the titular honors. Eleven Now Entered.

To date eleven drivers have definitely entered the San Joaquin Valley classic with one other believed to be a certain entrant and at least three additional drivers that are more than possibilities. With the eleven entrants above, one of the greatest fields of auto racers ever gathered on a speedway will be seen when Starter Fred Wagner of Long Island, New York, waves them on to their party this morning.

The entry list is as follows: Jimmy Murphy, Duesenberg; Tommy Milton, Duesenberg; Tommy Milton, Duesenberg; Eddie Miller, Duesenberg; Eddie Miller, Duesenberg; Eddie Miller, Duesenberg; Eddie Miller, Duesenberg; Eddie Miller, Duesenberg; Eddie Miller, Duesenberg; Eddie Miller, Duesenberg.

In this list of drivers whose cars are either in Fresno or on their way, are the world's champion, the national champion of 1920, the leader of the 1921 championships, the winner of the Italian Day classic, the world's record holder who won the race at Colist and the most daring driver in the world today. With these seven champions alone lined up a wonderful race would be had, but another group of drivers including Jimmy Murphy, whose exceptional driving at Indianapolis and at Colist have given him an enviable reputation, Eddie Miller, who is one of the youngest drivers and one of the most successful drivers having placed in the money in every race he has started, in this year, Eddie Miller, Jr., who is said to have a new car geared up to 115 miles an hour; Tom Alley, former mechanic of Ralph De Palma and whose long racing experience has made him a big factor where ever he competes.

Jimmy Murphy, a San Francisco boy, is now the world's champion. Murphy, by reason of his sensational victory at Le Mans, France, in the recent Prix classic, gained international fame. Murphy is driving the same car he won in at Le Mans, which is probably the fastest car in the world today. The famous little pilot won the last fair classic here and also was a winner at the Beverly Hills speedway in its monthly race, and also last April.

Tommy Milton is heading news as a 1921 champion at Indianapolis, result of his victories at Indianapolis and Tacoma. At Indianapolis he gathered 1,000 points and at Tacoma he gathered 500 points. Milton will drive the same car that won at Indianapolis. He is the holder of the fastest mile record in the world, having driven at Daytona, Florida, at a rate of speed averaging 156 and a fraction miles an hour.

Tommy Milton is the 1920 champion and is Milton's chief opponent this year. The famous little pilot is less than 100 points behind Milton and a victory in this race would put him in the lead. A defeat on the other hand will put him so far behind that he would not be able to recapture in coming events of the year.

Tommy Milton is the 1920 champion and is Milton's chief opponent this year. The famous little pilot is less than 100 points behind Milton and a victory in this race would put him in the lead. A defeat on the other hand will put him so far behind that he would not be able to recapture in coming events of the year.

VALLEY BOUNTY WILL BE SEEN IN ITS GLORY

Products Fostered Under San Joaquin Sun On Display

Added Attractions For Annual Event Are Planned

BY H. J. SOHER. Glorifying in the sun that has, through its beneficent efforts, given to the district in Central California the most fertile fields in the world, the fifteenth annual Fresno District Fair will open at noon tomorrow, greater than ever, and second only to the California State Fair.

Its exhibits are numbered among the best. The space has been doubled and the quality of the products has been bettered in every respect. The fair will be a display of the best that the San Joaquin valley produces, and principally those which have been grown in the Fresno district.

The fair this year is under the direction of the Fresno County Chamber of Commerce and directed by under the management of H. E. Patterson, who has added much to the grounds in the way of improvements and whose endeavor to make better entertainment has resulted in perhaps the greatest program ever offered at any fair.

It was the object of the Chamber of Commerce at the beginning of the season to make the Fresno District Fair great enough in 1921 so that in 1922 it would surpass the State Fair. Their hope has been accomplished. It is believed.

During the first few mornings a new \$35,000 automobile building has been erected with double the capacity used by the old building. A new machinery tent, 510 feet long, 100 feet wide and 25 feet high has been obtained for the machinery exhibit.

This tent is the largest west of Chicago and will provide three times as much space for the machinery display as the state fair at Sacramento tent, with space double that which was available last year, has been added. The tent is 100 feet long, 100 feet in dimensions. In the livestock department, the horse, cattle, swine, sheep and goat quarters have been enlarged and doubled in space.

More Features Added. Additional features this year will be the dog show and the and the baby show, both of which have closed their entry list due to overcrowding. A total of 200 infants and 150 canines have been entered. Solitaire tents have been obtained to house both shows.

The entertainment features of the Fresno District Fair have likewise been bettered. From noon to midnight each day there will be entertainment given.

The crowning feature of the entertainment is to be the San Joaquin Valley National Automobile classic over a distance of 150 miles for a purse of \$17,000 and for 675 points in the standing for championship honors. Twelve of the nation's fastest drivers are to compete in addition to others who may still enter before Saturday afternoon.

Horse racing is to be staged Tuesday, Wednesday, Thursday and Friday afternoon on the new half mile track inside the automobile building. All of the best horses that are in the state will be at the fair.

At the state fair at Sacramento a number of new entries in the form of valley-contenders will be shown. Altogether about sixty animals have been entered. Four events will be held each day and three events will be run off in each event, giving the spectators plenty of thrills for three or four hours each afternoon. A parade of 2000 sheep has been hung up for the visitors.

Daily Parachute Jump. One of the most thrilling facts ever known in Fresno will be the daily parachute jump. The jump will be started by the famous actor, Roy, who has been brought to Fresno for an exclusive performance. This famous actor is to be the center of attraction at the fair.

Other entertainment features include Shadow the world's strongest man, who allows an automobile to drive on him and then run over him; and the Aerial Thompson, who performs the most thrilling stunts ever seen on the wire a hundred feet above the fair grounds. Thompson makes a complete change of clothing on the wire at this elevation, from a clown suit to a full dress suit.

Why Developing Vineyards Is An Immensely Profitable Investment

Have you ever seen inside figures on the profits to be made developing vineyards in the great San Joaquin Valley? Do you know that investment in the soil—in good, substantial Mother Earth that cannot run away or "peter out"—can pay profits comparable to returns from gold or oil when you really strike it? As certainly as the seasons roll around, if

you plant vines in this fruitful soil and give them intelligent care it will produce in three years, and year after year thereafter, a harvest of golden value that will make the original investment look small indeed.

Is it surprising that vineyard land sells at prices prohibitive to the modest investor?

Read of the New Plan Whereby Small or Large Investors May Share in the Profits from the Valley's Greatest Industry

Mr. L. J. Mathisen is the owner of 500 acres of rich land in the Poplar District, between Tulare and Delano, where the biggest fruit men in the valley are now developing and planting thousands of acres of vineyards. Mr. Mathisen has not the capital to develop this land himself, but has evolved the following plan whereby the investors pay for the development in easy installments, and may expect to earn profits that will return the development cost within four years, with a handsome surplus, and thereafter earn a yearly income that will pay for the land, leaving a substantial profit every year estimated to be about \$2860, or about a thousand dollars more yearly than the entire investment.

Here's What You Pay in Per Unit for Development

One Unit, or a one-hundredth interest in the cooperative development of this 500 acres of Poplar District vineyard land, will cost \$1860, payable \$300 by January 1, 1922, the balance \$30 per month for 36 months, and \$15 per month for 12 months. This money is used solely for development, and the development is GUARANTEED for this amount—no extras, no interest.

At the end of the fourth year, the unit holders commence to pay for the land at the rate of \$10,000 per year, or only \$100 per year for each unit. The price you pay is \$334.19 per acre, or a total price for the 500 acres of \$167,150. This, understand, is for the Thompson Seedless Vineyard in full bearing, and worth from \$1,000 to \$1,500 per acre.

EVEN AT LOWEST PRICES AND LOWEST ESTIMATED TONNAGE, YOU MAY EXPECT TO MAKE BIG PROFITS.

There has been some criticism because we claimed we would raise 2 tons of raisins to the acre the 3d year and 3 tons to the acre the 4th year. So in order to satisfy the most skeptical and convince those who do not understand the extraordinary fertility of the deep silt soil in the Poplar District, we give below an estimate of your profit per unit based on only one ton to the acre the 3d year and only two tons to the acre the 4th year.

This in the face of the fact that we have been advised by expert vineyard men that 2 tons to the acre the 3d year and 3 tons to the acre the 4th year is a conservative estimate in the Poplar District. Furthermore, Mr. A. P. Imbler, of Delano, produced 4.52 tons to the acre the 3d year and 6.33 tons to the acre the 4th year, only a short distance from our land.

So figuring only 1 ton to acre and only 60 per lb. for raisins 3d year production \$ 67,500
Figuring 2 tons to acre at 60 per lb. for raisins 4th year production 134,400
Total 3d and 4th years' production, estimating for as above 201,900

As all proceeds of all crops are to be divided equally among unit holders, and the money you are paying in for development is conservatively estimated to pay all development costs and all other expenses up to the end of the 4th year, it is seen that this estimated crop valued at \$201,900, is clear profit. Divided among 100 units, it gives a share of \$2,019 per unit, or more than full return of the \$1860 per unit paid for development.

Then it is conservatively estimated that after the fourth year the yearly return to each unit will be about \$2000 and each unit will be worth about \$7000.

The Valley Bank Will Handle the Money

The terms of an agreement with The Valley Bank, which agreement is open to inspection by all investors, provide that all money paid by unit holders shall be made payable to The Valley Bank. The title to the land is also held in trust by this strong institution.

Below in Plain Figures Are the Minimum Estimated Returns and Cost Per Development Unit

Third year, one hundredth of estimated crop of 1 ton to acre at 60 per lb. \$ 672
Fourth year, one hundredth of estimated crop of 2 tons to acre at 60 per lb. 1344
Total estimated proceeds for 3d and 4th years figured at minimum as above \$2016

Down payment necessary to secure one unit, or one hundredth share in the cooperative development \$ 300
Payment to be made by January 1, 1922 300
\$30 per month for 36 months 1080
\$15 per month for 12 months 180
Total cost for development of one unit paid during 4 years \$1860

So It Is Shown That at These Low Estimates Each Unit Holder Will Get Back the \$1860 Paid in for Development and \$156 More

After the fourth year, the unit holders commence paying \$187.15 for the land, at the rate of \$10,000 per year and interest, or \$108 per year and interest for each unit, and it is estimated that each unit will earn an income of about \$2000 per year thereafter, and will represent a value of about \$7000.

Investigation Will Prove Those Remarkable Statements

If you have a little money to invest you certainly should look into this opportunity that promises such rich and certain returns. It offers you the chance to share in the profits of the Valley's greatest industry without any of the care and bother of vineyard development. We plant, develop and harvest the crops—do all the work—you pocket your earnings and watch your small investment grow into an income producer that will pay rich dividends yearly for an indefinite period.

Look into this today. To get in touch with us, clip and mail the coupon or telephone to the nearest office. Your response obligates you in no way, and your chance to share in this development probably depends on your immediate action.

SELMA SCHOOL OCCUPIES FINE NEW BUILDING

Grammar Grades Have Own Building On Floral Avenue

Teachers Are Assigned And Work Started For Year

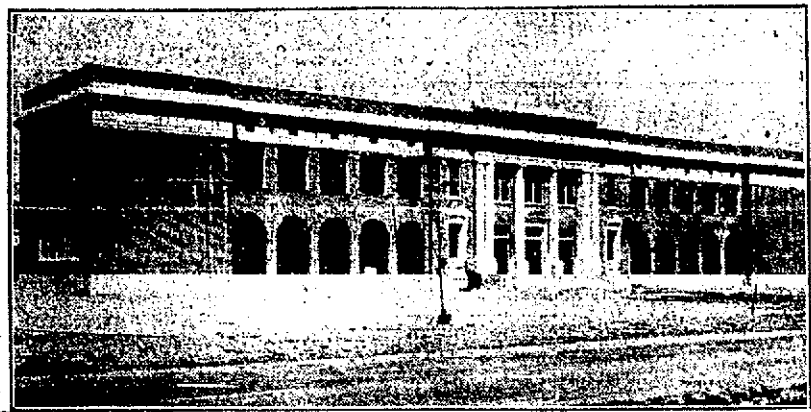

SELMA, Sept. 24.—The Selma grammar schools opened Monday in the new \$25,000 building which is being used for the first time. This is the Roosevelt building recently completed and located on Floral avenue and B street on seven acres of ground owned by the district. The building contains eight class rooms and a gymnasium. The building was moved to the new location and is being used for the cooking and sewing classes and the manual training. Loyal Wells is the principal at the new building and is teaching agriculture. Clarence Vortress has the manual training and boys' physical education; Mrs. Kate Shaffer, geography and spelling; Miss Helen M. Coney, domestic science and penmanship; Mrs. Lolla Esten, girls' physical education and spelling; Mrs. Jane R. Glynn, literature; Miss Laura Bruce, language; Miss Norine Zoe Johnson, art and Miss Ethel Bennett, P.E. Teachers in the other grammar school buildings are: Garfield building—Mrs. Maudie P. Kennedy, principal, fifth grade; Miss Lillian Christensen, sixth grade; Miss Mabel Bryant, sixth grade; Mrs. Donham, fifth A grade; Mrs. Charley Morrison-Hurtz, fifth A grade; Miss Marie Moore, fourth grade; Miss Myrtle Gustafson, fourth A grade; Mrs. Eva King, third A grade; Miss Nina Cleveland, third B grade; Miss Gladys Shannon, third A and third B grades; Miss Norine Zoe Johnson, second grade; Mrs. Lillian Rasmussen, first grade; Miss Edna Schwartz, first grade; Miss Adeline Lath, receiving class.

Washington building—Miss Pearl Dugan, principal, fifth grade; Mrs. Lillian Christensen, fourth grade; Miss Mabel Bryant, sixth grade; Mrs. Donham, fifth A grade; Mrs. Charley Morrison-Hurtz, fifth A grade; Miss Marie Moore, fourth grade; Miss Myrtle Gustafson, fourth A grade; Mrs. Eva King, third A grade; Miss Nina Cleveland, third B grade; Miss Gladys Shannon, third A and third B grades; Miss Norine Zoe Johnson, second grade; Mrs. Lillian Rasmussen, first grade; Miss Edna Schwartz, first grade; Miss Adeline Lath, receiving class.

Pupils of the Franklin seventh and eighth grades are attending the Roosevelt school, transportation being furnished by the Franklin district.

During the first half of the term Miss Lundquist is holding kindergarten in the Lincoln building from 8 to 11:30 and in the Washington building from 1 to 3:30. During the last half this will be reversed if it seems advisable.

The Roosevelt school at Selma which was recently completed at a cost of \$95,000 and will be use for the first time this year. It is located at the end of B street on Floral avenue and contains eight class rooms.

HIGH SCHOOL OVERCROWDED

515 Pupils Enrolled At Porterville

PORTERVILLE, Sept. 24.—The second week at the Porterville Union high school finds a total enrollment of 514. Teachers and students are making the best of their cramped quarters, originally constructed for not more than 250 students, until the new building is ready for occupancy.

Another late change in the faculty has been made by substituting Miss Gertrude McKinley of Long Beach in place of Miss Louisa Dobbs, who was to teach English and dramatics. Miss McKinley is a graduate of Pomona College, and has had a year's graduate work at the University of California.

Prof. Marion Knott reports the enrollment of 14 in the school orchestra, 18 in the boys' club, and about a score are lined up for the band.

Besides the classroom work, for the regular enrolled pupils there will be several classes for adults such as dressmaking and applied art. Several adults have also enrolled in the commercial department, and for language study.

Saw Mill Victim Will Be Buried At Clovis Today

CLOVIS, Sept. 24.—Jalburn Mankin, 35, who was fatally injured at Sugar Pine Thursday morning while working at the saw mill, will be buried here tomorrow at the Clovis cemetery following funeral services at the Bjoer Underkuffing Parlor at 2:30 p. m. Mankin, who is a native of Tennessee, was badly crushed when a log rolled over him. It was learned here today.

The deceased is survived by three brothers, two sisters and one son, Milton Mankin, of Sugar Pine.

ADDRESS 300 AT EARLMART

Community Rally And Concert Held

EARLMART, Sept. 24.—Over 300 persons listened to a program and partook of the refreshments served at a community rally held in the Earlmart grammar school auditorium last night under the auspices of the Farm Center and the Parent Teachers' Association.

The Delano band gave a concert of a dozen or more numbers which were highly appreciated, and Dr. George A. Warner of Bakersfield delivered a masterful address, using as his subject "The Biography of the Modern World."

During the course of the evening the new teachers of the Earlmart grammar school were introduced and welcomed to the community. The teaching staff for this year includes Mrs. Lulu G. Johnson of Strathford, principal; Mrs. H. W. Kent, of Earlmart; Miss Mary Berk of National City; and Mrs. J. D. Hall of Radner.

ATWATER SCHOOL OPENS. ATWATER, Sept. 24.—The public school opened here last Monday with an enrollment of 200 pupils. There are six teachers this year, an increase of one.

M'KITTRICK TO HOLD ELECTION

Disincorporation Vote Is Due Oct. 25

Special to The Republican. M'KITTRICK, Sept. 24.—A special municipal election to vote on the proposition of disincorporating the town in order to secure a half mile of county racing through the business district was called for October 25 following the regular session of the city trustees last night. The city hall will be open as a polling place from 8 a. m. to 7 p. m.

At a special meeting of the board of trustees a short time ago, the board recommended disincorporation following the reading of a letter from Stanley Abel, Kern county superintendent, in which he recommended the action, so that the race in the county racing program through M'Kittrick could be filled.

A petition was drawn up and circulated asking the special election to take the signature of the required 50 percent of the voters were secured. A two-thirds vote will be required to disincorporate.

POULTRY SUPPLIES. Pearson Bros., 2225 Tulare Street. —Advertisement.

Typewriter Wreck Explained; Auto Smash Recounted

TULARE, Sept. 24.—The mystery of the smashed typewriter was solved today and there are no further details. It appears that a "mummer" (one of the Tulare Salvation Army was motoring home from Selma September 14, and when he had just passed Selma a racing machine passed him at high speed and struck the box containing the typewriter, ripping it from its moorings and sending it careening. The other machine pulled up by the "mummer" said, but the typewriter was left by the roadside.

EL NIDO NEWS. EL NIDO, Sept. 24.—Miss Shirley Paul spent the week with relatives in Fresno.

M. Jorgensen spent the week in San Francisco.

Mr. and Mrs. F. Hann returned last Friday from a pleasant outing at Redding.

Misses Audrey Robinson, Shirley Paul, Juanita Briggs and Evelyn Rogers entered Merced high school Monday.

Miss Douglass, the new home department agent, visited Mrs. George Robinson Monday.

Mrs. M. Jorgensen and sons, Paul, Cyril and Leod, spent last week visiting relatives in Fresno.

SHAFTER CHILD DIES. SHAFTER, Sept. 24.—Anna May Shafter, daughter of Mr. and Mrs. J. Miller, passed away Thursday morning at the family home on West Shafter street after a short illness. The burial took place in the afternoon of the same day in the Union cemetery. Another daughter is in the same home is also critically ill.

Cattle Inspection Pleases Visalians

VISALIA, Sept. 24.—Splendid results are being attained throughout the county as the result of the recently inaugurated cattle inspection system by which Jean McPhail, of Visalia, became inspector for this district, according to the opinions of cattle shippers here. First criticisms have dwindled to favorable commendation of the system which is improving weekly to a degree as it is possible to make it.

The one inspector for the entire district replaced a number of community inspectors, and McPhail with his assistants make possible immediate inspection anywhere in the county on 24 hours' notice.

War Veteran Address Sanger Fathers-Sons

SANGER, Sept. 24.—Major Atkinson, veteran of the world war, delivered an interesting address before 185 people at the father and son banquet at the Y building last night. M. M. Pettit, chairman of the county committee, Mr. Gaines former chairman of the county Y committee, E. E. Giffon, postmaster, and J. R. Gaines delivered short addresses following the principal speaker.

An excellent chicken dinner was served by the ladies' aid of the Methodist church.

CLOVIS BREVITIES. CLOVIS, Sept. 24.—Mr. and Mrs. A. E. Prussing came down from Cascade Hill of the week where they have been spending the summer and will remain here a couple of weeks. Mr. Prussing has been in the higher altitude for the benefit of his health and has greatly improved.

The Rex Theater is being repainted and otherwise improved on the exterior preparatory to moving from the Alldorne to the building on Oct. 1.

Mr. J. T. Ferguson, accompanied by his daughter, Mrs. Luther Baney and daughters of Waterbury, Conn., who have been guests of Mr. and Mrs. Ferguson, returned the first of the week from Santa Barbara where they have been for several weeks.

Will Hittickson, who has been in the hospital for the past month and has been unable to get out, is now able to be out again.

J. E. Keller of Reno, who left here last spring, was in town looking after property interests. This week Mr. Keller and his wife took a motor trip. Gant, this summer to the middle east, taking in ten states in their itinerary.

LATON BREVITIES. LATON, Sept. 24.—The Misses Lilla Bartlett and Irene Moody who graduated from the University of California this summer are members in the Fresno high school faculty this year. Miss Bartlett's sister Ruby who is living with them in Fresno has obtained a position in the same school.

Miss Estelle Hildebrand who has been visiting her parents for a short time has returned to Berkeley.

Mr. Z. F. Cawson is expected to arrive in Berkeley.

Miss Joanne McKenna of San Francisco is visiting her sister, Mrs. H. L. Kirt.

Thos. Gardner and Mrs. Habbie are teachers at the Grant School. Mrs. Habbie is living at the hotel.

A chaperon was given to Mr. and Mrs. Hurley Jensen on Saturday night and over forty people attended.

ANNUAL FALL SALE of BLANKETS

ALMOST a year's efforts have been concentrated on the Blanket week—first because it is timely—for Blanket buy- ing is beginning—and secondly because thousands of visitors will have the opportunity of sharing in this blanket carnival. Mills and jobbers have co-operated with us to make this Fresno's most notable blanket event. Prices and qualities speak for themselves.

200 (Only) ALL WOOL SAMPLE BLANKETS

To be impressed more than mere words can tell about these blankets—just imagine all wool blankets for as little as \$3.23 to \$7.43—Reg. \$10.00 value—If you haven't seen them, you've missed some fun get one Monday, Special 59c

100 Pra. Woolnap Plaid Blankets, Special, pr. \$3.48

And might we say that this price is lower than the present whole- sale price—a special "buy" is responsible for this value.

66x80 Woolnap Grey and White Blankets \$2.98

Another group of blankets that means a considerable saving for these at this price are again less than regular.

400 Crib Blankets, White and Plaids 98c

These are 36x54 inches in size—they're warm, yet not too heavy—come in plaids and white—each—

Nashua Sheet Blanket, Size 60x76 \$1.68

200 Pairs Wool Finish Blankets—66x80 in. pr. \$4.65

They're in attractive plaids in blue, pink, tan and grey; all very special.

70x80 in. Wool Finish Blankets \$4.95

These are an exceptional quality—bound with ribbon edge.

High Grade Wool (Type) Blankets—pr. \$6.50

Beacon Plaid Blankets, 66x80 \$8.50

Every one knows the quality and durability of these blankets—they come in pink, blue, tan and grey. They're in 70x80 in. Wool Finish Blankets \$10.50

Beacon Bath Robe Blankets \$5.95

Size 72x80—come complete with cords and tassels—over 100 patterns.

Comforters—Size 72x84—Special \$3.95

These have a high grade quality—white cotton filling—covered with fancy all-wool.

Extra Fine Grade Comforter—Special \$6.95

Piled with white cotton filling—the finest quality—the coverlet is of an extra grade heavy all-wool.

Beacon Indian Blanket Robes \$7.95

72x84—Comforter, Extra Special—each \$4.95

The quality of the cotton filling is the finest obtainable—the covering is of heavy all-wool and comfort, covering the center is fancy, the borders are plain.

Extra Fine Grade Comforter—Special \$6.95

Piled with white cotton filling—the finest quality—the coverlet is of an extra grade heavy all-wool.

DAIRY WOMAN WINS SUCCESS WITH HOLSTEINS

Two Cows of Mrs. Annie
Donders of Fresno
Make Record

One Produces 31.2 And
Another 20.4 Lbs. Of
Butter, 7 Days

In the latest "Reported Tests of Holstein-Friesian Cows," published bi-weekly by Malcolm H. Gardner, Delavan, Wis., superintendent of advanced registry of the Holstein-Friesian Association of America, Mrs. Annie Donders of Fresno, has two of her pure-bred registered Holsteins listed.

The best cow, Victoria Brunaro Johanna, is reported as having made at the age of five years and seven months, a record of 625.5 pounds of milk and 25.012 lbs. of butterfat in seven days, equivalent to 31.2 lbs. of butter. Her 15-day record is 1416.3 lbs. of milk and 50.219 lbs. of butter fat, equivalent to 62.9 lbs. of butter.

The other cow, Princess De Solis Jane, made a record in seven days at the age of three years and three months, 484.3 lbs. of milk and 18.406 lbs. of butter fat, equivalent to 20.5 lbs. of butter. Her 15 day record is 1005.4 lbs. of milk and 33.996 lbs. of butterfat, equivalent to 42.5 lbs. of butter.

Tests of this kind are supervised by one or more representatives from the dairy division of the College of Agriculture, present at each feeding and milking, to weigh the milk and test it for butter-fat content. A duplicate sample of this milk is forwarded to the State College, where careful check is made before the record is accepted.

The State Championship in the 7 day class is held by Adirondack Wietse Dairy Maid, a full aged cow, who made a record of 331.7 lbs. of milk and 12.812 lbs. of butterfat, equivalent to 41 lbs. of butter. She is owned by the Bridgeford Holstein company of Patterson, Calif.

The State Championship in the Junior class is held by Miss Valley-Mead De Kol Walker, owned by Miss Anita M. Baldwin of Santa Anita. Her seven day record is 688.6 lbs. of milk and 23.451 lbs. of butterfat, equivalent to 36.8 lbs. of butter.

Frank O. Lowden, former governor of Illinois, is president of the Holstein-Friesian Association of America. This Association has a membership of over twenty thousand breeders in the United States, and is the largest pure bred cattle association in the world, representing nearly one-half million pure bred animals.

**Stanislaus to Hold
Egg Laying Contest**

Stanislaus poultry raisers are urged to enter the egg-laying contest being conducted by the State Farm Bureau, County Agent A. A. Jungerman announced that the contest opens October 1, and so far but one entry, that of N. C. Westerfield, has been received from Stanislaus county.

Entry blanks can be secured at the Farm Bureau office on J Street. The Jungerman announced that Westerfield's pen, which is in the contest closing shortly, appears certain of running high in the contest.

Further information can be obtained from Jungerman by poultry raisers desiring to enter next year's competition.

Below is a picture of Victoria Brunaro Johanna, prize Holstein-Friesian cow, owned by Annie Donders, which has made a big butter record.

FRUIT GROWERS PLAN MEETING

Hold 54th Convention
October 24 to 26

The 54th annual convention of the California fruit growers and farmers will be held in Los Angeles from October 24 to 26, at Exposition park, under the auspices of the State Department of Agriculture. This is one of the most important gatherings of fruit growers and agriculturists in the United States, as California being in the lead in the production of fruit, both citrus and deciduous, as well as being the pioneer in co-operative marketing organizations, there is a greater interest taken by the growers of the state of California than of any other state.

Those annual conventions of the fruit growers and farmers are looked forward to with a great deal of interest and a very elaborate program has been prepared for the coming convention. G. H. Hecke, director of the State Department of Agriculture, has been in Los Angeles holding conferences with prominent growers, state and county officials, and members of the chamber of commerce, and personally extends you an invitation to be present.

The great problems confronting the fruit growers and farmers will be discussed by eminent authorities, including Secretary of Agriculture Wallace, who according to dispatches from Washington, will be in Los Angeles to attend the convention. C. C. Tague, president of the California Fruit Growers' Exchange, and G. Harold Powell, general manager of the same organization, will discuss agricultural legislation and the future in distribution of agricultural products. At a banquet which will be given Tuesday evening, October 25, Governor William D. Stephens will be guest of honor. Governor Stephens will deliver an address on "Agriculture as the Basis of Prosperity."

The subject of water transportation for shipment of fruit and other perishable products will be one of the subjects under discussion, and will attract the attention of railroad officials and others in various parts of the country, as well as one of the commissioners of the United States Shipping Board.

SCHOOL NOTICE
Registration now open at Fresno School for Private Secretaries in day and night school. Call and learn our rates and methods of teaching business training.
Visitors always welcome.

San Joaquin Plans Loan Association

The San Joaquin Farm Center has had plans for some time to secure a Federal Farm Loan association, and last week a committee went to San Francisco and interviewed officials to this end, with the result that application is now being made for the purpose of forming an association for that section. The matter will be taken up and discussed at the farm center meeting to be held next Tuesday evening. It is planned to secure loans to the amount of \$40,000 for use of the ranchers in developing their new ranches in that colony.

Underground Water Will Be Measured

Measurements of the underground water table, taken in the wells throughout the Modesto district, will be made again this year by the Modesto Irrigation district, according to a decision reached by the board of directors. This work, the directors feel, is extremely valuable and must be kept up as it is the basis of the determination of where the district's pumping plants will be located. Engineer Louis C. Hill will start on his work under his twelve month's contract with the district, which was suspended some months ago in October. He will be asked to tell the board just what condition the work will be in, on the completion of his contract and will also be requested to send the board any studies he has made on the Fresno and Chowchilla rivers. An investigation into the original fillings of the Madera district on the Chowchilla river will be made, as it is believed possible that some of the fillings are prior to those of the Madera district.

Want More Entries In Egg Laying Contest

L. Miles, secretary of the Stanislaus County Poultry association, has appealed to poultry raisers of the county to enter pens in the egg laying contest, which opens October 1 under the auspices of the State poultry department. "Stanislaus county is rapidly becoming one of the foremost poultry districts in California," said Miles, "and poultry raisers should certainly make an effort to have a large showing." N. C. Westerfield, who resides on Orange avenue, is the only Stanislaus entry in the coming competition. He is also entered in the contest now in operation.

HAY MOVEMENT STILL LIGHT

Demand Improves,
Prices Higher

The movement of alfalfa hay to the two central markets, San Francisco and Los Angeles, is still light in volume in spite of the better demand during the last few weeks, according to a report from the Alfalfa Growers' Exchange. The explanation probably is that this improved demand became general at the same time in most parts of the state and the local demand in some of the important producing sections which usually ship freely to central markets, has absorbed the offerings there at better prices than the shipping party of the central markets. It would seem that these big markets are bound to come in line before long and then become free and steady buyers. The Northern Association has during the week filled two more orders of several hundred tons for shipment to the Eastern seaboard, with good prospects for further sales there.

There is a continued and growing general demand with an upward tendency in prices, which promises to be maintained, and users still remain very small in the aggregate and do not seem to increase, while production is now declining rapidly and will soon be at an end for this year. The advanced up to now in most parts of the state, of several dollars a ton from the bottom, has of course not been sufficient to bring prices up to the level of last year, but it has made them more remunerative to the grower, but the general business and financial situation, while improving, is still such that the return to the conservative level, in order to maintain itself there, must come gradually.

An attempt to crowd up prices quickly might possibly be successful, but it is not declared such an advance could be maintained; it would be followed by erratic fluctuations in prices and demand, unsatisfactory to all concerned in the final results.

Without question a gradual but steady improvement will not alone give encouragement and confidence to buyers but will also bring the most benefit to both buyers and growers.

Plan Rate Reduction
The state railroad commission held a hearing in Los Angeles last week regarding the reduction of freight rates from San Joaquin Valley and Imperial Valley to Los Angeles, but principally hay. Production sheet showing cost of production of alfalfa hay in the Fresno section was submitted as basis of complaint; these are the data furnished by the Fresno association some time ago and copied in the weekly letter at the time.

A reduction of rates from these points will of course be a move in the right direction, but it does not go far enough. When rates were advanced they were advanced all around and a reduction now from some points and not from others, would work as a discrimination against the growers in many sections, which would be bound to lead to serious troubles.

"It is believed the time has now come when the reduction of rates on hay all along the line should not be put off any longer and the association will use its best efforts to obtain for the growers the consideration to which they are entitled in regard to these rates."

There were 260 tons of grain and alfalfa hay received at the San Francisco market the week ending September 17th, with 30 tons held over. There were 1,555 tons of grain and alfalfa hay received at the San Francisco market the week ending September 17th, with 30 tons held over.

Pure Bred Stock In State Announced By Census Department

A preliminary announcement from the U. S. Bureau of the Census, subject to correction, gives California the following number of purebred live stock in the state, 1,615; dairy cattle, 12,244; beef cattle, 12,144; sheep, 28,931; swine, 35,741.

Modesto Pigeons. Win Fair Ribbons

Pigeons, owned by T. Benson, of Modesto, proved prize winners at the San Joaquin County Fair, held at Stockton last week. Four giant white runts won second, third and fourth prizes. A black Mulotte owned by Benson took first place in its class.

During the Stockton show Benson purchased a prize winning female and a second prize winning male of the Red Carnotus class from A. J. Cole of Lodi.

Benson has one of the most complete stocks of pigeons in the state and has an excellent reputation as a breeder.

Prevailing prices last week: P. O. B. Los Angeles; No. 1 Dairy, \$21; Standard alfalfa, \$16.

Prevailing prices last week: P. O. B. San Francisco; No. 1 Dairy, \$15; Standard alfalfa, \$13.50.

CATTLE MARKET IS IMPROVING

Demand For Live Cattle
And Dressed Good

According to H. M. Hagart, secretary of the California Cattlemen's Association, the market is improving for both live animals as well as dressed beef. He advises ranchers not to ship on consignment but to sell only f. o. b. on ranch, and only to offer prime cattle for sale.

While newspaper quotations offer a top of 6 cents for California grass cattle delivered at packing house yards in San Francisco, several sales have been reported during the past few days for as high as 6 1/2 cents f. o. b. ranch. Sales have been reported in Tulare county for 5 1/2 cents f. o. b. cars for prime steers, and sales for 5 1/2 cents f. o. b. cars with no shrink after an 8 mile drive, have been reported in El Dorado county, these steers averaging about 1100 lbs. Recent sales in Mendocino county have been for 5 1/2 cents for steers f. o. b. ranch.

Announcement has been received of the reduction in railroad rates on cattle and calves of 20 per cent effective September 30. A minimum rate, however, is established of \$18.00 per 35 ft. car.

Plans are being rapidly formulated for holding an indefinite amount of money exceeding several millions if necessary to cattlemen in California, through the Federal War Finance corporation. Interest rate on this money will not exceed 1 per cent and may possibly be less. Additional information will be available within a few days.

Dentist, 404 Howell Bldg.

Farm Bureau Will Hold Annual Picnic At Kearney Park

The annual picnic of the Fresno County Farm Bureau will be held probably on October 13 at Kearney Park. The speaker of the day will be H. M. B. Harris, providing of course that nothing intervenes to prevent his accepting the honor of addressing the members of the bureau on this occasion.

Tulare county at its annual picnic had 13,000 people present. While the Fresno bureau does not expect so large a number, it is believed that several thousand will be present.

Registered Stock Showing Increase

Winings at the state and county fairs so far held show the possibilities of growing registered stock of the highest quality. California is now known in livestock circles as one of the leading states in the union in the production of stock with also and quality that can be used to improve the breeds in less favored sections of the world.

During the past ten years the value of registered livestock of California has increased many times, and the factors responsible for the accomplishment of this. At the Fresno District Fair to be held during the coming week, there will be many pure-bred Holstein and Jersey cattle, and Poland-China and Duroc sows for the inspection of all interested in improving both the kind and quality of Fresno county live stock.

COVER CROPS ARE PLANNED

Demonstration Is Held
At Navelencia

Friday morning at Navelencia, Farm Advisor J. P. Benson and his assistant, Frank T. Murphy, held a demonstration of cover crop planting on the ranch of A. S. Votaw, at which a large number of farmers of the district were present, including C. J. Holz and N. A. Delphia, officers of the local farm center. A quarter acre of vineyard ground, which had been carefully prepared by the use of a spring tooth harrow, was used and where the water conditions for irrigation were exceptionally good.

Two rows of the vineyard for a distance of 30 yards were sown with melilotus seeds, similar two rows with Canadian field peas, two rows with purple vetch and two rows with burr clover. A hand seeder was used for the melilotus and clover, and the vetch and peas were sown broadcast with the hand. Following the sowing, seeds were brushed in with a spike tooth harrow, and well watered following the planting.

A similar demonstration will be held at the Navelencia tract north of the city on Monday morning.

ELKS NOTICE

Brother Layton Ward will be buried from Stephens and Bean Parlors Monday at 10:30 a. m. Services will be in charge of Fresno Elks Lodge No. 439. Members are requested to meet at the lodge rooms at 8:30 a. m. or the parlors at 9:45. By order of Elliot E. Bradley, Exalted Ruler. Glen V. Slater, Secretary.

Announcing The New MODEL "F"

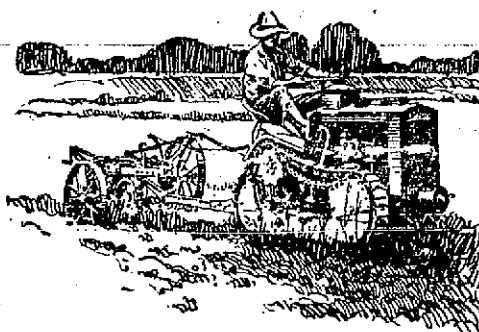

Cletrac

\$845

**TANK-TYPE
TRACTOR**

**COMPLETE-
F.O.B. Cleveland**

The new Tank-Type Tractor that does every farming job including CULTIVATING of corn and cotton and other row crops. Plows 6 to 8 acres a day. Chrome steel construction—weighs only 1820 pounds. Automatically lubricated—every part easily accessible.

Cletrac F pulls any standard 2-bottom 12 inch plow under ordinary soil conditions at rate of 2 miles per hour

Cletrac Two-Row Cultivator cultivates corn, cotton or other row crops, 10 to 20 acres per day. Price, \$135 f. o. b. Cleveland

CLETRAC F is the tractor that farmers everywhere have been waiting for since the beginning of the tractor industry. CULTIVATES successfully, quickly and easily ALL FARM ROW CROPS—entirely eliminating the need of horses for cultivation.

All Kinds of Work
Cletrac F handles ALL farm jobs. Plows 6 to 8 acres a day—discs or harrows 15 to 20—handles any hauling job and all your ordinary belt work.

Cultivates 10 to 20 Acres a Day
In two minutes you can attach the new Cletrac Cultivator to Cletrac F—and you have a power cultivator that will cultivate 10 to 20 acres per day of any farm

Chrome Steel Construction
Chrome Steel—the toughest, hardest material obtainable—and capable of withstanding the most sudden strains and severe punishment is used for parts subject to wear in construction of Model F Cletrac.

Compact Design—Low Price
The unusually low price of Cletrac F is possible because it combines unique engineering principles. Here is a tractor with a 4 cylinder, overhead burning motor that

Simple—Carefree—Accessible
You have never seen a tractor more simply designed—one less free from the need of attention. A few minutes of practice and you have mastered its operation. Every working part is quickly accessible—you can make any adjustment without the assistance of an expert.

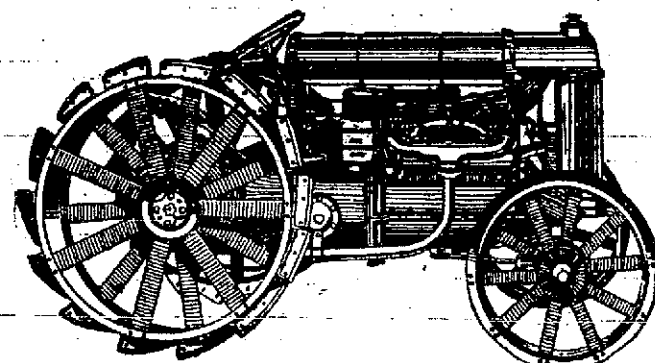

Automatic Oiling
Cletrac F lubricates itself. You pour oil in the tank and the self-oiling system supplies every working part. No grease or oil cups to fill.

The New Tank-Type Cletrac Model F Places at Your Disposal A Tractor That is Without Equal For Day In and Day Out. All-Job Usefulness. Dependability and Flexibility. For Utility, Quality and Price—\$845.00 F.O.B. Cleveland—Cletrac F is an Unprecedented Value.

CALIFORNIA FIG VARIETIES

By IRA J. CONDIT

Horticulturalist California Peach and Fig Growers

The first fig trees brought to California were of the Mission variety and came at a very early date from Lower California, being brought North by the Franciscan Fathers and planted about the early Missions. For a century this fig was the only variety grown in California and was planted generally around many of the Missions, and by the Mission Fathers, distributed over the state. There are to this day, at various places, very old and large Mission fig trees in perfect health and bearing enormous crops. These trees are the remnants of those early plantings. After 1856 efforts were made to introduce other varieties of figs and such as the Brunsweick, Bahia, and Brown Turkey, were secured from Eastern nurseries, and later importations were made from English and French nurseries, but as most of the varieties so secured were best suited to hillside and garden culture, some did not succeed out of doors in California. The Adriatic fig was brought in the early 50's by settlers from Italy and the fig trees were planted at Big Oak Flat in the Sierra Nevada foothills.

Variety Collections. One of the most extensive collections of fig varieties in the state was that made at Niles by John Black of the California Survey Company. These seemed to be no record of this variety collection, but in 1913 he received from Thomas Rivers and Son, London, thirty-five varieties and in 1919 from Providence, Rhode Island, twenty-two additional kinds. In 1919, Mr. Black received through the U. S. Department of Agriculture, Bureau of Plant Industry, thirty-five varieties of figs, which were planted at Niles. These varieties were collected by John Black in 1914 when these which had not already been gathered at Niles from southern nurseries, were gathered at the greater number of the collection has been duplicated at the Plant Introduction Gardens, Chico, where about seventy-five varieties are growing.

The California Experiment Station, Chico, has introduced a number of varieties under trial at sub-stations located at Danville, Paso Robles, Tulare and Jackson, and many other places. These varieties were introduced before the stations were discontinued.

Another interesting and varied collection of fig varieties has been made by J. L. Nickel on his place at Menlo Park, where the fig trees are forced in glass houses, grown in pots on south walls and as standard trees in the garden. At one time Mr. Nickel had all of the varieties collected by John Black and by John Gillette, all the Department of Agriculture importations, all of those of the local horticultural society of the principal varieties of France. Some of the not specially named varieties, not the Menlo Park figs, were transplanted to open ground at Los Banos in 1917 where their fruiting qualities will be tested.

Introduction of Smyrna and Kadota Fig. Up to the year 1900 the dried figs of California consisted wholly of Adriatic, Mission and other types which will set fruit without fertilization. In fact, many of the local horticulturists in California did not believe that fertilization was necessary or desirable in connection with fig raising. These figs, above mentioned, are much inferior in quality to the dried figs which were imported from Smyrna and they did not bring as good prices on the market and were not in demand in competition with the Smyrna fig.

As a result of this effort, was made to introduce the true Smyrna fig into California, and Mr. H. H. Tull, through the San Francisco Bulletin, introduced several thousand cuttings of the true Smyrna fig in 1901.

The Kadota fig was introduced into California by the United States Department of Agriculture, the nursery firm of T. W. & C. of Riverside having received cuttings in 1893 under the name "Kadota," a common variety in Italy. The name Kadota was applied to the variety by H. H. Tull of San Francisco, who first exploited it in Southern California. Kadota is a colored variety, designated from the orchard of W. S. Clark of Sutton.

The White Adriatic fig which has been growing in the interior valleys for at least fifty years is very similar to, if not identical with, the so-called Kadota. The White Adriatic fig is also very closely related to the Kadota.

Requirements of a Drying Fig. At the present time the four leading varieties of figs grown in California are in the order of their commercial importance, Adriatic, Calimyrna, Mission and Kadota. The largest plantings during the past few years have been to the Calimyrna variety and the tonnage of this variety is rapidly increasing. Heavy plantings are also being made of the Kadota in some sections. The bulk of the crop of figs is of course, dried. It may be therefore interesting to note the points which are desirable in a variety of figs used for drying purposes. These may be enumerated as follows:

First, vigorous growth of trees; second, heavy production of fruit; third, resistance of the fruit to insect and rotting; fourth, quality of dried product.

The Mission fig tree grows vigorously and produces heavily, both of the first and second crops. The heavy production is also being made of the Kadota in some sections. The bulk of the crop of figs is of course, dried. It may be therefore interesting to note the points which are desirable in a variety of figs used for drying purposes. The bulk of the crop of figs is of course, dried. It may be therefore interesting to note the points which are desirable in a variety of figs used for drying purposes. These may be enumerated as follows:

First, vigorous growth of trees; second, heavy production of fruit; third, resistance of the fruit to insect and rotting; fourth, quality of dried product.

Specimens of Fig Trees of Calimyrna variety; upper left, unpruned tree, bearing surface small; upper right, showing neglect of bearing surface; lower, ideal Calimyrna tree properly pruned and shaped up.

plantings were placed too close and both trees and fruit have suffered from crowding, the former by a lack of vigor and the latter from rotting due to poor sunlight and air circulation. Some trees were planted as close as 20 by 20 feet, and eventually the branches interlarded, making a dense shade under the trees. The tonnage of figs secured from such closely planted orchards has been small, but when properly pruned the percentage of ripe and shrunken figs is high. Some fine orchards of Adriatic trees are found at Biggs, Yuba City, and Marysville, and large quantities have been reported in the past. As in the San Joaquin Valley however, the rising water table due to frequent irrigation of neighboring lands has seriously affected the success of fig orchards in this valley and both the quality and quantity of fruit has suffered in recent seasons. Famous orchards of this variety are found near Modesto, Merced and in various parts of Fresno county.

Adriatic trees grow rapidly after planting and come into bearing early if given good care. Three-year-old trees usually bear considerable fruit, while trees six years old should produce profitable crops. The first crop of the tree is small and the fruit suffers from the attacks of birds. The figs are much larger in size than figs of the second crop and are of a deep straw-berry color inside. They ripen from the first to the middle of July, and the second crop begins to mature the first week in August, and the figs continue to ripen throughout that month and also during September and October. The long ripening season is an advantage in most respects, as the labor is distributed and portions of the crop may escape unfavorable weather conditions if another part is injured. On account of the dark color of the dried fruit, Adriatic figs are generally shunned either before or after the drying process. In our valley and foothills the figs require very little irrigation if the orchard is kept thoroughly cultivated.

The Mission Fig. The Mission fig, although the oldest variety grown in California, ranks fourth in acreage at the present time. The reason for this low rank is not hard to explain, the eastern market is prejudiced in favor of the light colored dried fig. The true Mission fig has a beautiful amber or straw color and is translucent, which has gained it a reputation in all markets. This prejudice against the Mission fig however, seems to be only a prejudice and it is quite better that it can be overcome by a proper campaign of education and enlightenment. Another reason for the unpopularity of the Mission fig is due to the fact that it does not bear itself well in cooking purposes or in bakery trade. The black coloring matter in the skin dissolves out in cooking and makes bakery products very dark in color. Proper processing and packing of Mission figs in attractive packages will undoubtedly stimulate the demand for this product in the eastern market.

As already stated, the Mission figs are resistant to unfavorable climatic conditions which often ruin the crops of other varieties. The fresh figs selected for drying are of the Smyrna variety and are of a deep straw-berry color inside. They ripen from the first to the middle of July, and the second crop begins to mature the first week in August, and the figs continue to ripen throughout that month and also during September and October. The long ripening season is an advantage in most respects, as the labor is distributed and portions of the crop may escape unfavorable weather conditions if another part is injured. On account of the dark color of the dried fruit, Adriatic figs are generally shunned either before or after the drying process. In our valley and foothills the figs require very little irrigation if the orchard is kept thoroughly cultivated.

based on quality and the California fig growers must learn to produce a dried Calimyrna second in quality to none, or else accept lower prices in the fig markets of the world.

The fresh Calimyrna fig of the proper stage of consumption has no superior among other varieties. Its golden yellow color, thin skin, amber pulp and rich flavor make it unexcelled as a fresh fruit. When picked in the proper stage the fruit can be marketed fresh not only on the coast, but by modern methods of packing and refrigeration, in distant markets as well.

Calimyrna fig trees grow as rapidly and bear as early as those of other varieties except possibly the Kadota. A few figs are frequently produced the third season but the trees cannot be expected to produce profitable crops until the sixth or seventh year in the orchard. The trees do not bear a first crop since the few figs which appear on the old wood cannot be marketed commercially by any of the varieties of caprifigs as yet developed. Some of these first-crop or breba Calimyrnas set and mature without caprification but they are seldom abundant enough to be of commercial value.

Experienced growers in various sections of the San Joaquin valley have shown that Calimyrna trees will bear as heavily as the Adriatic at the same time if the former is properly caprifigged, by which I mean sufficiently to cause all or nearly all of the fruit to set and mature. Caprification is a detail in fig culture which must be attended to in the proper time and the proper manner to get best results. Growers must secure the best varieties of caprifigs and provide against loss of crops by frost by order to reduce the cost of production and to insure profitable crops.

The Kadota Fig. The Kadota fig has been most commonly planted in California and Fresno counties where orchards from one to ten years old are common. The small fruit seems to be susceptible to heat damage in June and July, from 10 to 15 per cent of the crop being damaged or culled in some seasons. For this reason the most extensive plantings of Kadota figs are now being made in Merced, Stanislaus and Santa Joaquin counties and in portions of the Sacramento valley, where the temperature is more uniform and the humidity higher.

The soil requirements for the Kadota fig are not especially different from those of other varieties. Any good orchard soil which can be readily irrigated should produce good trees. The main thing to avoid is late irrigation or high water table which will keep the trees growing late in the season when fall frosts are to be expected. Young fig trees are tender in winter and in exposed localities should be protected by wrapping of cordons or other material.

The Kadota tree is a rank grower when given an abundance of water. Continued frequent irrigation are practiced in order to encourage a vigorous growth of the tree and a heavy production of fresh fruit. The figs are resistant to splitting and rotting, faults which are so common with some other varieties.

The trees, like those of the Mission, Brown Turkey and most other varieties, bear two distinct crops of fruit. The first crop is produced on old wood, mainly of the previous season, and the fruit matures in June in the warmer

parts of the interior valleys. In the southern coast districts the cooler weather causes the fruit to mature much later. The figs of the first crop are of large, pear-shaped, smooth-skinned, green in color and somewhat fleshy. The pulp is of a light straw-berry color dotted with violet, is juicy, sweet and excellent in flavor. It is suitable for fresh fruit markets and for jam making but is most 100 later and preferable for preserving and canning.

The second crop is produced mostly on wood of the present season, the fruit beginning to mature in July and continuing to ripen as long as new weather remains favorable for their development. As with many other varieties, immature figs often have of the tree throughout the winter and if not injured by cold, ripen in early spring. The fruit of the second crop is of medium size, globular in shape, somewhat rounder than the first crop, and is of a light, lemon-yellow color and sweet but lacks character and flavor. When eaten for comparison with other varieties, the second crop is disappointing to most eaters. Some people prefer it, however, on account of the absence of seeds and the lack of that peculiar flavor common to most figs.

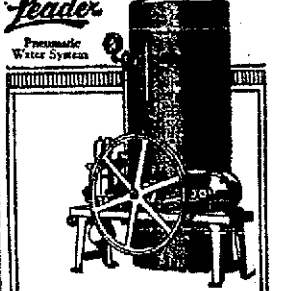

The Kadota fig of the second crop has a tough skin underneath which is a white meat or rind of suberous consistency to which the seed adheres and the fruit are largely due. This rind and tough skin preserves the fresh fruit from bruising, prevents rapid decay or deterioration, keeps its color well when cooked and is the prime reason in making the Kadota a leading fig for preserving purposes. This is a fact that, however, is responsible for making an inferior variety product when dried. Ordinary dried Kadotas are, therefore, not to be considered as much of a factor in making a Kadota fig orchard profitable.

The quality of growth and early development of the tree, its heavy bearing qualities and resistance of an fruit to unfavorable climatic conditions, have placed the Kadota among the four leading fig varieties of California. The fruit can be readily marketed fresh both

Running Water for the Farm

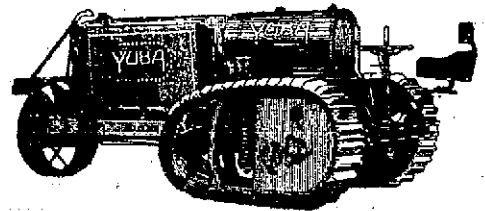

Under pressure all the time just like city water, the Leader Pneumatic system will take water from well, stream, lake, etc., and deliver it anywhere, above ground, barn or house. Automatic electric motor and pump keep pressure constant. Can be equipped to run by gasoline engine—automatic stop only. Write for full particulars or

U. S. Motors

give uninterrupted service without overheating

Every U. S. Motor has a perfectly ventilated stator, rotor and windings and is rated as a 40° motor—capable of operating at high efficiency and will not burn out. U. S. Motors are big and powerful, affording perfect ventilation and freedom from danger of overheating. Each part is easily accessible and thoroughly simple in design. U. S. Motors are correctly balanced mechanically as well as electrically and the lubrication is thorough.

For 15 years U. S. Motors have kept the buyer's faith and lived up to the reputation of their name.

For Irrigation and General Power Service

SANGER CENTER WELL ATTENDED

Discuss Cover Crops and Other Matters

A well attended meeting of the Sanger Farm Center was held Thursday evening, in which the members and speakers from Fresno discussed the value of cover crops and bacteria as a means of increasing yields and putting the soils in better condition.

U. E. Knapp, president of the center, presided and made an extended talk regarding plans of the farm bureau committee to get out members from each of the fifteen centers of the county to plant an acre of cover crop as a matter of testing this method of adding organic matter to the soils. These 150 acres will be tried out, the paper crop planted under, and next year the results watched. Mrs. Knapp also told of a plan to have a committee of farmers meet manufacturers at the fair to devise a shift that can be used in vineyards for the planting of cover crops without damage to the vines or inconvenience the work of furrowing for irrigation.

Farm Adviser J. P. Jensen made a short address in which he explained the various elements that impart plant growth in the several kinds of cover crops, such as alfalfa, purple vetch, peas and bare clover, and a number of cereals.

Dr. Twining of the Fresno laboratory, was also present and gave a scientific explanation of the use of lime, bacteria, and other things, and their effect on the soil, and the proper methods of applying them. His talk was interesting and instructive alike, and he answered numerous questions pertaining to better farming which were put to him by the members.

Breeding Season of Domestic Animals

Among the wild animals the breeding season is fairly definite. This, however, is not the case of domesticated animals. The investigators inform us that "the breeding season has become much unsteady or wholly lost in most of the domestic animals."

Of the domestic animals most of the breeds of sheep retain the definite breeding season by lambing in the spring as did their wild forbears.

Mares colts are foaled during the period of the spring months of April, May and June after carrying the young a period of about eleven months from the time of conception to the period of birth. While it is true that these colts are born in the spring than at other times of the year, a great number are born at other seasons.

It has been estimated that about 90 per cent of pigs and calves are born during the months of March, April and May and in these cases there is a secondary increase in the number of births in the fall. The California Department of Agriculture has observed that many swine breeders recognize this fact and breed their sows at periods when it is possible to produce profitably two litters a year.

State Agriculture Department Reviews New Meat Inspection Law

By G. H. HECKE
State Director of Agriculture

Governor William D. Stephens having signed the state meat inspection act, the state meat inspection act, it is appropriate to consider the provisions of the act in order to protect the public health, and to assist themselves with its intent.

Like any law, it is possible to view it with a certain amount of skepticism, but it is not to be so. It is a law which is intended to protect the public health, and to assist themselves with its intent.

Like any law, it is possible to view it with a certain amount of skepticism, but it is not to be so. It is a law which is intended to protect the public health, and to assist themselves with its intent.

In addition to the grave conditions mentioned above, the lack of supervision of the meat industry, the absence of government inspection, and the presence of unsanitary practices in slaughtering and handling of meat, have been a source of concern to the public health.

Varieties of State Fig Are Explained

(Continued from Page 9-a)

to local and distant markets. It can be preserved or canned or made into jam, such products finding wide favor and good demand. The dried Kadota, while tough and inferior, is a clean and sweet product, with more careful methods of processing it can be marketed to advantage.

The capricious Kadota makes an excellent dried fig, second only in quality and flavor to that of the California.

The Best Fig to Plant

The best fig for intending planters to set out is any one of the four varieties described, the California, the Adriatic, the Mission or the Kadota. Each variety has its good and bad points, but each one has to have an excellent good points to make it promising for future production. Whether a variety will be developed which will combine some of the good points of two or three varieties now grown remains for the future to disclose.

Experiments Bring Out New Breed Of Hens Called Lamona

Poland-China Breeders Made Good Showing

A new breed of poultry has been developed on the government experimental farm in Maryland, which is said to merit distinction because of its many qualities and egg yield, and its known as Lamona. The eggs are white, and the plumage also white.

Claim to distinction is made for the newly-introduced variety of chickens as the first and only white-plumaged, meat-producing fowl to produce a white-shelled egg.

A red ear lobe is the characteristic which differentiates the new breed of fowl from the White Leghorn variety. The fixing of this identification mark without sacrificing the whiteness of the egg shell is considered quite a notable achievement in poultry breeding, because having red ear lobes yield brown-shelled eggs, and the invariable fact of this breeding characteristic had led poultry fanciers to believe that a variety of fowl was impossible.

The "Lamona" variety takes its name from its originator, Harry M. Lamona, senior poultryman in charge of poultry investigations, United States department of agriculture. Mr. Lamona, conceiving the idea of evolving a fowl of this breeding characteristic, has personally directed the activities of the project since its inception eight years ago, and followed the fortunes of his progeny until the type has been definitely fixed. To repeat, the characteristic are:

A breed of fowl having solid red ear lobes, a clear white-shelled egg, and is valuable both for meat and egg production.

Farmers at Poplar Fared Pretty Well At Tulare's Fair

Poplar Farm Bureau booth won third place at the Tulare Livestock Show last week, Earlman and Tulare taking precedence because of the greater number of their exhibits. The superior quality of the Poplar exhibits is attested by the fact that there were more first prizes for individual exhibits in the Poplar district than in any other of the agricultural booths. Following is a list of those who received premiums:

W. H. Harrison—First on dried prunes and second on Merlot barley.

Mr. Menier—Second on canned peaches.

Mr. C. Stevens—First on sweet potatoes.

Mr. Simonson—First on guineas.

Mr. Larsen—First on green gage plums.

Mr. Ingram—First on "Triumph" sweet potatoes.

John Fuller—First on yellow pear tomatoes.

Mr. R. G. Jann—First on canned string beans.

W. H. Hardaway—First on nonpareil almonds.

Lockhart estate—First on milk maize.

Mr. St. Charles exhibited the only overstock from Poplar—nineteen young Barred Rock chickens. These carried off first and second premiums on pens, and first on pullets. They also won three special prizes and a special prize for best exhibit of Barred Rock.

FRESNO SWINE WIN PREMIUMS

Poland-China Breeders Made Good Showing

According to Fred Gatewood, who will have charge of the live stock section of the Fresno Fair, and who attended the state fair as an exhibitor, Fresno swine made a good showing at the state fair and carried away many premiums. Aside from the county's wonderful display of fruits, which won so many ribbons, the Poland-China breeders of this county placed Fresno county in the lead as the greatest producer of swine in the state. Two full carloads of the big black hogs were exhibited at Sacramento from Fresno herds. Those exhibiting, and who carried away \$200 in cash prizes, were C. E. Duck, H. A. Johnson, A. Buckland, Charles McNeil, C. J. Stephens, Fred Gatewood and Charles Gatewood.

In the open classes Fresno county won five first prizes, five seconds, two thirds, and three championships. Navy Bow was senior and grand champion hog exhibited by Chas. Stephens and Fred Gatewood.

Hawkeye Maid was reserve grand champion sow, exhibited by A. Buckland. Hi-Spot of Berma was reserve junior champion, exhibited by Chas. Duck.

Following are the winners in the open classes by Fresno Polands:

Senior Yearling Boars—1st Navy Bow, shown by Stephens and Gatewood, 2nd Giant Prospect, shown by Buckland.

Senior Boar 1½—1st Hi-Spot of Berma, Ducks; 2nd, Fresno Boy Jr., Gatewood; 3rd, Giant Checkers, Buckland.

Sows over two years—1st, Hawkeye Maid, Buckland and McNeil; 2nd, Polandola Betty, Buckland and McNeil.

Senior Yearling Sows—1st, Prospect Mollie, Buckland and McNeil. Sow Junior Pig—2nd, H. A. Johnson; 4th, Buckland and McNeil.

Pat Barrows, any age—1st, Chas. Gatewood.

Herd bred by exhibitor, 2nd, Duck. Aged herd, 2nd, Buckland and McNeil.

172 Registered Holsteins AT PUBLIC AUCTION

Tuesday OCTOBER 4 70 REGISTERED HOLSTEINS

Wednesday OCTOBER 5 47 REGISTERED HOLSTEINS

Thursday OCTOBER 6 55 REGISTERED HOLSTEINS

Complete Dispersal of S. O. Walker Herd Visalia, Cal.

KING OF THE BLACK AND WHITES will be sold. He was the first bull whose seven nearest dams averaged over 30 lbs. butter in seven days.

25 DAUGHTERS OF KING OF THE BLACK AND WHITES, some out of dams with over 30 lbs. butter in seven days.

MANY A. B. O. COWS with records up to over 26 lbs. butter in seven days.

YOUNG BULLS of choice breeding, including two grandsons of Sir Peter's Omsby Mercedes.

Every animal guaranteed a breeder; no tuberculin test certificates.

PLACE OF SALE: S. O. Walker Ranch, 2½ miles east of Visalia on Mineral King Avenue.

TERMS OF ALL THREE SALES: Cash unless arrangements for credit are made with California Breeders Sales and Pedigree Company before sale. Responsible parties may secure terms of one-third cash, balance in 3, 6, and 9 months on approved notes.

Auctioneers: Col. Ben A. Rhoades, Los Angeles; Geo. W. Bell, Tulare.

From the Herd of Robt. T. Curtis & Son Exeter, Cal. Selling at Tulare Sale Pavilion Tulare, Cal.

Including: COLOMA BEAUTY BUTTER MAID, 24.32 lbs. butter in 7 days as a Junior 4 year old.

THREE DAUGHTERS OF KING KORNDYKE PONTIAC 20TH, the \$12,000 son of Miss Valley Mead De Kol Walkers.

13 GRANDDAUGHTERS OF KING DOLLAR, the 25 lb. son of Spring Farm Pontiac Cornucopia.

GRANDDAUGHTERS OF Pontiac Korndyke, Pontiac Angus Korndyke, King of the Pontiacs, and other famous sires.

A SON OF KING KORNDYKE PONTIAC 20TH, with an average of 80.82 lbs. butter in one year for six of his 7 nearest dams.

Guaranteed breeders; tuberculin tested and subject to retest.

20 DAUGHTERS OF SIR AAG-ONE DE KOL ACME 2ND, five of whose 7 nearest dams average 1.15 lbs. butter in one year.

MELBA HENGERVELD, the noted 30 lb. cow, and her daughter and granddaughter.

MANY A. B. O. COWS, of choice breeding.

THIS IS A TOP NOTCH HERD of young cattle, only one animal over 5 years old.

KING TOLA KORNDYKE PONTIAC will be sold. He is by King Korndyke Pontiac 20th and out of K. P. Tola, 36 lb. daughter of King of the Pontiacs.

CHOICE YOUNG BULLS that will no doubt sell at dairymen's prices.

Guaranteed breeders; tuberculin tested and subject to retest.

The Life of Your Tractor

YOUR investment in machinery this year should be with an eye to the future. The new equipment you acquire should be so inherently long-lived that you don't need to think of replacement for years to come. Especially your tractor purchase this year should, more than ever, be along quality lines—a long-time investment.

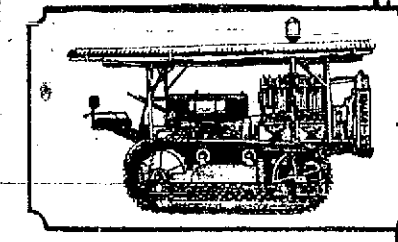

Buy a tractor about which there is not the slightest doubt as to its long-wearing qualities. You know, Best Tractors were among the first to be built. During the many years since those old round-wheel steam days the Best has developed through the constant application of experience, into a tractor which you farmers have come to genuinely regard as a dependable, long-lived, low-running-cost machine.

There's not the slightest doubt in your mind as to Best design, materials and workmanship. All these things are expressed in the faithful service you have seen rendered by Best Tractor Tractors for so many years. Best is the safe tractor for you to buy this year—or any year, and this is the year in which a good tractor can help reduce the cost of crop production.

There are two models of Best Tractor farm tractors—the "Sixty" and the "Thirty." The "Thirty" is shown above, pulling four 12-inch bottoms 10 inches deep.

Write for our catalogs and descriptive literature and the name of our nearest dealer.

Give Rules for Irrigation Regulates Distribution In District Will Facilitate Water Use

The complete draft of rules and regulations for the distribution of water in the Fresno irrigation district was given out for publication yesterday by the board of directors. These rules have received the formal approval of the attorneys for the district, according to an announcement by George L. Swendsen, engineer and manager of the district.

The text of the rules follows:

Section 15C of the California Irrigation District Act, in part, as follows:

It shall be the duty of the board of directors of any irrigation district to establish equitable by-laws, rules and regulations for the distribution and use of water among the owners of said lands, which must be printed in convenient form for distribution in the district.

In conformity with such provision, the board of directors of Fresno irrigation district has heretofore regularly adopted and now does promulgate and establish the following rules and regulations for the distribution and use of water within such irrigation district:

1. All matters relating to the distribution and use of water shall be under the central charge of the chief engineer of the district, acting under the authority conveyed by and with the approval of the board of directors.

2. The chief engineer shall keep, in the office of the district, a complete and comprehensive record of the total volume of water utilized by the district, and shall also keep a record of the distribution thereof among the main distributing canals. He shall, with reasonable diligence, answer inquiries of land owners, within the district, concerning such matters.

3. He shall prepare and present to the board of directors at each of the regular monthly meetings of such board, a report particularly summarizing the facts relating to the distribution of water among the main distributing canals for the preceding month and relating to any other matters and things as the board may request from time to time. He shall compile all of such data for each season in a general report, which shall be presented to the board not later than December 1, following each irrigation season.

4. The chief engineer shall, subject to the approval of the board of directors, employ such ditch tenders and other assistants as may be necessary for the proper operation and maintenance of the system and for the equitable and economical distribution of the water. He shall instruct the ditch tenders and other assistants in and prescribe their several duties, supervise and direct all of their activities as they relate to the maintenance and operation of the system. He shall prescribe the form and extent of field records to be kept and shall cause such field reports to be made by these employees as he may deem expedient.

5. The chief engineer shall, subject to the approval of the board of directors, employ such ditch tenders and other assistants as may be necessary for the proper operation and maintenance of the system and for the equitable and economical distribution of the water. He shall instruct the ditch tenders and other assistants in and prescribe their several duties, supervise and direct all of their activities as they relate to the maintenance and operation of the system. He shall prescribe the form and extent of field records to be kept and shall cause such field reports to be made by these employees as he may deem expedient.

6. The chief engineer shall, subject to the approval of the board of directors, employ such ditch tenders and other assistants as may be necessary for the proper operation and maintenance of the system and for the equitable and economical distribution of the water. He shall instruct the ditch tenders and other assistants in and prescribe their several duties, supervise and direct all of their activities as they relate to the maintenance and operation of the system. He shall prescribe the form and extent of field records to be kept and shall cause such field reports to be made by these employees as he may deem expedient.

7. The chief engineer shall, subject to the approval of the board of directors, employ such ditch tenders and other assistants as may be necessary for the proper operation and maintenance of the system and for the equitable and economical distribution of the water. He shall instruct the ditch tenders and other assistants in and prescribe their several duties, supervise and direct all of their activities as they relate to the maintenance and operation of the system. He shall prescribe the form and extent of field records to be kept and shall cause such field reports to be made by these employees as he may deem expedient.

8. The chief engineer shall, subject to the approval of the board of directors, employ such ditch tenders and other assistants as may be necessary for the proper operation and maintenance of the system and for the equitable and economical distribution of the water. He shall instruct the ditch tenders and other assistants in and prescribe their several duties, supervise and direct all of their activities as they relate to the maintenance and operation of the system. He shall prescribe the form and extent of field records to be kept and shall cause such field reports to be made by these employees as he may deem expedient.

9. The chief engineer shall, subject to the approval of the board of directors, employ such ditch tenders and other assistants as may be necessary for the proper operation and maintenance of the system and for the equitable and economical distribution of the water. He shall instruct the ditch tenders and other assistants in and prescribe their several duties, supervise and direct all of their activities as they relate to the maintenance and operation of the system. He shall prescribe the form and extent of field records to be kept and shall cause such field reports to be made by these employees as he may deem expedient.

10. The chief engineer shall, subject to the approval of the board of directors, employ such ditch tenders and other assistants as may be necessary for the proper operation and maintenance of the system and for the equitable and economical distribution of the water. He shall instruct the ditch tenders and other assistants in and prescribe their several duties, supervise and direct all of their activities as they relate to the maintenance and operation of the system. He shall prescribe the form and extent of field records to be kept and shall cause such field reports to be made by these employees as he may deem expedient.

11. The chief engineer shall, subject to the approval of the board of directors, employ such ditch tenders and other assistants as may be necessary for the proper operation and maintenance of the system and for the equitable and economical distribution of the water. He shall instruct the ditch tenders and other assistants in and prescribe their several duties, supervise and direct all of their activities as they relate to the maintenance and operation of the system. He shall prescribe the form and extent of field records to be kept and shall cause such field reports to be made by these employees as he may deem expedient.

12. The chief engineer shall, subject to the approval of the board of directors, employ such ditch tenders and other assistants as may be necessary for the proper operation and maintenance of the system and for the equitable and economical distribution of the water. He shall instruct the ditch tenders and other assistants in and prescribe their several duties, supervise and direct all of their activities as they relate to the maintenance and operation of the system. He shall prescribe the form and extent of field records to be kept and shall cause such field reports to be made by these employees as he may deem expedient.

13. The chief engineer shall, subject to the approval of the board of directors, employ such ditch tenders and other assistants as may be necessary for the proper operation and maintenance of the system and for the equitable and economical distribution of the water. He shall instruct the ditch tenders and other assistants in and prescribe their several duties, supervise and direct all of their activities as they relate to the maintenance and operation of the system. He shall prescribe the form and extent of field records to be kept and shall cause such field reports to be made by these employees as he may deem expedient.

14. The chief engineer shall, subject to the approval of the board of directors, employ such ditch tenders and other assistants as may be necessary for the proper operation and maintenance of the system and for the equitable and economical distribution of the water. He shall instruct the ditch tenders and other assistants in and prescribe their several duties, supervise and direct all of their activities as they relate to the maintenance and operation of the system. He shall prescribe the form and extent of field records to be kept and shall cause such field reports to be made by these employees as he may deem expedient.

regulation is made on instructions or request of the board of directors, or in case of an emergency, as provided in paragraph 5 hereof.

Damage, Liability on Class (b) Ditches and Laterals.

12. The district will not be liable for any damage resulting from the use of water in the ditches and laterals of class (b), except in such cases where it is clearly established that the damage was caused by negligence or willful misconduct of the district.

13. The district will not be liable for any damage resulting from the use of water in the ditches and laterals of class (b), except in such cases where it is clearly established that the damage was caused by negligence or willful misconduct of the district.

14. The district will not be liable for any damage resulting from the use of water in the ditches and laterals of class (b), except in such cases where it is clearly established that the damage was caused by negligence or willful misconduct of the district.

15. The district will not be liable for any damage resulting from the use of water in the ditches and laterals of class (b), except in such cases where it is clearly established that the damage was caused by negligence or willful misconduct of the district.

16. The district will not be liable for any damage resulting from the use of water in the ditches and laterals of class (b), except in such cases where it is clearly established that the damage was caused by negligence or willful misconduct of the district.

17. The district will not be liable for any damage resulting from the use of water in the ditches and laterals of class (b), except in such cases where it is clearly established that the damage was caused by negligence or willful misconduct of the district.

18. The district will not be liable for any damage resulting from the use of water in the ditches and laterals of class (b), except in such cases where it is clearly established that the damage was caused by negligence or willful misconduct of the district.

19. The district will not be liable for any damage resulting from the use of water in the ditches and laterals of class (b), except in such cases where it is clearly established that the damage was caused by negligence or willful misconduct of the district.

20. The district will not be liable for any damage resulting from the use of water in the ditches and laterals of class (b), except in such cases where it is clearly established that the damage was caused by negligence or willful misconduct of the district.

21. The district will not be liable for any damage resulting from the use of water in the ditches and laterals of class (b), except in such cases where it is clearly established that the damage was caused by negligence or willful misconduct of the district.

22. The district will not be liable for any damage resulting from the use of water in the ditches and laterals of class (b), except in such cases where it is clearly established that the damage was caused by negligence or willful misconduct of the district.

23. The district will not be liable for any damage resulting from the use of water in the ditches and laterals of class (b), except in such cases where it is clearly established that the damage was caused by negligence or willful misconduct of the district.

24. The district will not be liable for any damage resulting from the use of water in the ditches and laterals of class (b), except in such cases where it is clearly established that the damage was caused by negligence or willful misconduct of the district.

25. The district will not be liable for any damage resulting from the use of water in the ditches and laterals of class (b), except in such cases where it is clearly established that the damage was caused by negligence or willful misconduct of the district.

26. The district will not be liable for any damage resulting from the use of water in the ditches and laterals of class (b), except in such cases where it is clearly established that the damage was caused by negligence or willful misconduct of the district.

27. The district will not be liable for any damage resulting from the use of water in the ditches and laterals of class (b), except in such cases where it is clearly established that the damage was caused by negligence or willful misconduct of the district.

28. The district will not be liable for any damage resulting from the use of water in the ditches and laterals of class (b), except in such cases where it is clearly established that the damage was caused by negligence or willful misconduct of the district.

29. The district will not be liable for any damage resulting from the use of water in the ditches and laterals of class (b), except in such cases where it is clearly established that the damage was caused by negligence or willful misconduct of the district.

30. The district will not be liable for any damage resulting from the use of water in the ditches and laterals of class (b), except in such cases where it is clearly established that the damage was caused by negligence or willful misconduct of the district.

31. The district will not be liable for any damage resulting from the use of water in the ditches and laterals of class (b), except in such cases where it is clearly established that the damage was caused by negligence or willful misconduct of the district.

like authority, false, lower or otherwise disturb any data or other appearance thereof, used for the control or measurement of water, or who shall employ or place, or cause to be employed or placed, any such device, ditch, flume or reservoir, any rubbish, flume or obstruction to the free flow of the water, is guilty of a misdemeanor.

Under such statute persons interfering with the regulation of water in the canals and ditches are subject to prosecution.

It is expected that lands for new planting, pastures and hay lands, and such of the less valuable lands as can take advantage of this early service. Late Spring and Summer Irrigation by Rotation.

16. As soon as the demand for water increases to the volume necessary, the regular rotation schedules shall be put into effect and no one shall be permitted to use water out of his turn. Ditch-tenders shall keep water users posted as to the progress of rotation on the several ditches, give them reasonable notice of their several periods, the time of beginning and the time of ending. Water Under Rotation to be Used Continuously and Promptly Released.

17. It shall be incumbent upon the water user to release the water promptly when his period has elapsed, unless, because of the water not being available on time at the beginning of his period, but no additional time shall be allowed for his failure to use the water continuously, when available, during his allotted period.

18. The ditch-tender shall promptly notify the ditch-tender or the district office if the water is not available at the time his rotation period begins or if the flow to him is interrupted during his period of irrigation. It is also expected that water users will co-operate with the district employee in determining the cause of interruptions.

19. Failure to Use in Period Assigned No Basis for Claim to Water Out of Turn.

20. If a land-owner fails to use the water during the period assigned to him on the schedule, it shall not afford any basis for any claim to use during that particular rotation unless such failure to use is due to unavoidable circumstances, or if the district employee, in the exercise of his duty, has been prevented from making a delivery of water to the land-owner in so far as it can be done without interference with the schedule in general.

21. Provided, however, that the water user in such emergencies must give all the notice possible thereof to the ditch-tender or the district office.

22. Liability of Persons Interfering with Regulation of Water or Taking of Water Out of Turn.

23. Section 552 of the Penal Code of California is as follows:

"Water-Ditches, Etc., Penalty for Trespass or Interference With. Every person who shall, without authority of the owner or managing agent, and with intent to defraud, take water from any canal, ditch, flume or reservoir used for the purpose of holding or conveying water for manufacturing, agricultural, mining, irrigating or generating of power, or domestic use, or who shall without

authority, false, lower or otherwise disturb any data or other appearance thereof, used for the control or measurement of water, or who shall employ or place, or cause to be employed or placed, any such device, ditch, flume or reservoir, any rubbish, flume or obstruction to the free flow of the water, is guilty of a misdemeanor.

Under such statute persons interfering with the regulation of water in the canals and ditches are subject to prosecution.

It is expected that lands for new planting, pastures and hay lands, and such of the less valuable lands as can take advantage of this early service. Late Spring and Summer Irrigation by Rotation.

16. As soon as the demand for water increases to the volume necessary, the regular rotation schedules shall be put into effect and no one shall be permitted to use water out of his turn. Ditch-tenders shall keep water users posted as to the progress of rotation on the several ditches, give them reasonable notice of their several periods, the time of beginning and the time of ending. Water Under Rotation to be Used Continuously and Promptly Released.

17. It shall be incumbent upon the water user to release the water promptly when his period has elapsed, unless, because of the water not being available on time at the beginning of his period, but no additional time shall be allowed for his failure to use the water continuously, when available, during his allotted period.

18. The ditch-tender shall promptly notify the ditch-tender or the district office if the water is not available at the time his rotation period begins or if the flow to him is interrupted during his period of irrigation. It is also expected that water users will co-operate with the district employee in determining the cause of interruptions.

19. Failure to Use in Period Assigned No Basis for Claim to Water Out of Turn.

20. If a land-owner fails to use the water during the period assigned to him on the schedule, it shall not afford any basis for any claim to use during that particular rotation unless such failure to use is due to unavoidable circumstances, or if the district employee, in the exercise of his duty, has been prevented from making a delivery of water to the land-owner in so far as it can be done without interference with the schedule in general.

21. Provided, however, that the water user in such emergencies must give all the notice possible thereof to the ditch-tender or the district office.

22. Liability of Persons Interfering with Regulation of Water or Taking of Water Out of Turn.

23. Section 552 of the Penal Code of California is as follows:

"Water-Ditches, Etc., Penalty for Trespass or Interference With. Every person who shall, without authority of the owner or managing agent, and with intent to defraud, take water from any canal, ditch, flume or reservoir used for the purpose of holding or conveying water for manufacturing, agricultural, mining, irrigating or generating of power, or domestic use, or who shall without

authority, false, lower or otherwise disturb any data or other appearance thereof, used for the control or measurement of water, or who shall employ or place, or cause to be employed or placed, any such device, ditch, flume or reservoir, any rubbish, flume or obstruction to the free flow of the water, is guilty of a misdemeanor.

Under such statute persons interfering with the regulation of water in the canals and ditches are subject to prosecution.

Oakdale May Get Asbestos Factory

OAKDALE, Sept. 24.—Prospects of a factory for the manufacture of asbestos products are held out as a result of a meeting of Chamber of Commerce officials with representatives of the Pacific Asbestos Corporation, a company organized to take over the mountain of asbestos located 12 miles from this city.

The asbestos has been tested out of the hour with the result that a highly entertaining program will be presented.

SEWER SYSTEM.

CERES, Sept. 24.—The sewer system for the city of Ceres was accepted by the board of trustees Wednesday forenoon, and permits are being issued for construction with it. Property owners on Third and Fourth streets have contracts with R. Crawford to install a sewer in the alley between these streets and the work is being pushed rapidly.

CAR IS WRECKED.

ORANGE COVE, Sept. 24.—E. M. Sheridan and family met with an unpleasant experience with their car while returning from Santa Barbara recently when on hearing Tule the rains had caused the highway to become slippery, and a large touring car swerved across the road, crowding them off the highway and damaging their car so that it was impossible to proceed.

MARRIAGE LICENSES.

DAILY DAY TODAY

REEDLEY, Sept. 24.—Tomorrow will be Daily Day when all of the teachers and friends of the First Methodist Sunday school will unite in a home coming after the summer vacation.

A special program has been arranged for the regular session from 9:45 to 11 o'clock. Mrs. J. C. McMillin, superintendent, together with Mrs. Mills, superintendent of the primary department, and Mrs. J. B. Patterson, superintendent of the primary and beginners department, having collaborated in arranging the events of the hour with the result that a highly entertaining program will be presented.

SEWER SYSTEM.

CERES, Sept. 24.—The sewer system for the city of Ceres was accepted by the board of trustees Wednesday forenoon, and permits are being issued for construction with it. Property owners on Third and Fourth streets have contracts with R. Crawford to install a sewer in the alley between these streets and the work is being pushed rapidly.

CAR IS WRECKED.

ORANGE COVE, Sept. 24.—E. M. Sheridan and family met with an unpleasant experience with their car while returning from Santa Barbara recently when on hearing Tule the rains had caused the highway to become slippery, and a large touring car swerved across the road, crowding them off the highway and damaging their car so that it was impossible to proceed.

MARRIAGE LICENSES.

MARY GUILLANELLI — In Modesto, Sept. 23, Edwin Jerome Macy, 31, Los Banos and Elvira Silvia Guillanelli, 31, San Francisco.

Missing Heiress Is Sought at Modesto

MODESTO, Sept. 24.—Police officers here have been asked to try and locate Mabel Cassel, who it is said has a large inheritance awaiting her.

Information was received from the E. A. Pratt and Company, researchers, with offices in various places throughout the United States. It is thought the missing young woman came to California with her father from Colorado and settled in Modesto or the near vicinity.

SULTANA ITEMS

Mr. and Mrs. Martin Hinn and son, George, of Jeromesville, Ohio, who have been visiting their cousins, S. C. Craven and Ed Struggs for several days, left Thursday for Los Angeles en route to home.

Miss Ethel Clotfelter of Visalia was a visitor at the A. Stouffer home the first of the week.

Mr. and Mrs. George Reynolds, Mrs. Laura Hinn and Mr. and Mrs. Ed Chance and family of Atwater are spending a few days in the mountains.

Mrs. Ira Johnson and Miss Allen Hebl returned from Nebraska Saturday where they spent the summer with relatives. Miss Hebl resumed her position in the Waukena school Monday.

MODESTO PAIR HAVE SILVER WEDDING YEAR

Mr. and Mrs. John H. Mugar of Modesto celebrated last Friday night one of the happiest days of their lives, their twenty-fifth wedding anniversary. Because of the great number of guests and the varied ages a card party went on inside the house and outside a lawn party and many games were enjoyed by the more lively members. One of the many happenings of the evening was the exchange of wedding rings by Mr. and Mrs. Mugar. The rings chosen were of more modern style than those worn twenty-five years ago. The huge wedding cake, was decorated with silver wedding bells. Pieces of this will be sent in tiny boxes, especially made and decorated for wedding cakes, to many relatives of Mr. and Mrs. Mugar living in New York, Boston, Philadelphia and other eastern cities. Late in the evening delicious refreshments were served.

Those present were: Mr. and Mrs. Walter McPherson, Mrs. McPherson's mother, Mrs. Martha May, Mr. and Mrs. Fred Motta, Mr. and Mrs. J. J. King, Mr. and Mrs. J. H. Conner, Mr. and Mrs. Dave Palmer, Mr. and Mrs. Ed Allen, Mr. and Mrs. John H. Mugar, Mr. and Mrs. Roy McLeod, Mesdames Dick Christen, Mary E. Winans, Ida Scott, Mrs. Mike Mitchell of Duro, Cal., J. McPherson and Misses Addie Winans, Mae Giovannioli, Zella Slegman, Martha Scott, Edna Allen, Elizabeth King, Annie Mitchell of Duro, and Misses A. H. Yerman, James Kozan, M. Easchman, Lee Mitchell of Duro and Jimmy Corley.

YOUNGER SET AT RIVERBANK ENTERTAINED

Miss Laverna Weeks entertained a number of her young friends at her ranch home south of Riverbank Saturday evening. The dancing, and the music followed by a dainty lunch made up a pleasant evening. Those present were Misses Hilda Peterson, Hazel Thayer, Inez Hall, Blanche and Beulah Benish, and Elbert, Louis, Blanche, J. J. Bannon, Helen Galt, P. Peters, John Wright and Geo. W. Bowers.

DISTRICT CLUB EXECUTIVES TO MEET

The San Joaquin Valley District Executive Board of Women's Clubs will meet at the first board meeting of the year at the Parlor Lodge Club, house 1254 Van Ness avenue, on Thursday, September 29, at 10:30 a. m. sharp.

All club presidents of their respective districts, all county presidents are especially requested to attend this meeting as a provision of the constitution will be held after the board meeting.

STITCH AND CHATTER CLUB.
The Stitch and Chatter Club met at the home of Mrs. Jackson, on Roosevelt avenue, Thursday afternoon, with nine members and two visitors present. The next meeting of the club will be held at Mrs. Loyd's, on V street.

Mrs. Harriet Wisczech of Palmsville, Ohio, is the guest of her niece, Mrs. F. M. Granger, Sr., and family at their home on Washington avenue.

Mr. and Mrs. E. S. Sturge of 4176 McDowell avenue have returned from a visit of ten weeks in Chicago and different parts of Michigan. While in the East, they attended the wedding of the latter's brother, John T. Bray and Mrs. Delia Horley.

JOHN MUIR P. T. A.
The John Muir Parent Teachers Association, which was to have met Tuesday, September 27, has postponed its meeting until Tuesday, October 4, because of fair weather.

The Swastika Club met last Thursday afternoon for the first time since June, after which the members being the hostess at her home on Belmont avenue. After a short business meeting, bridge games were enjoyed, the prizes going to Mrs. J. E. Harris and Mrs. E. P. Otto. Mrs. E. Harris of Chicago enjoyed the afternoon as a guest. The club will meet in two weeks with Mrs. Otto at her home, 3804 Grant avenue.

Mr. and Mrs. John H. Mugar of Modesto who celebrated their twenty-fifth wedding anniversary with an enjoyable lawn party recently.

HUGHSON GIRL WEDS EMPIRE MAN AT MODESTO

An impressive wedding took place in the Episcopal church in Modesto Sunday morning at nine o'clock when Miss Myrtle Hulse of Hughson and Arlette Mosier of Empire were united in marriage. Rev. H. S. Dravetter performing the ceremony. The bride wore a beautiful traveling suit and large brown hat and carried a bouquet of white roses tied with tulle. Miss Edna Hulse came home from San Francisco to attend the wedding.

Only the immediate members of the two families were present. Following the ceremony Mrs. J. C. Hulse served a wedding breakfast at the Hulse home in Hughson, after which the young couple donned knickerbocker clothes and left for a projected wedding journey intending to stop at California coast resorts, later proceeding south for a trip through Mexico. No date has been set for their return.

The bride is very popular among the younger set and the fitting at Empire the groom has many friends in this community. They will make their future home at Empire.

MELTON-TURPIN WEDDING.
The marriage of Mrs. Martha Turpin and Henry Melton, of Solana, which took place Thursday at the home of the bride at 238 Little street came as a complete surprise to their many friends. Rev. Duane Wallace was the officiating clergyman, performing the ceremony in the presence of members of the immediate family. The bride has lived in Washington Colony for a number of years before moving into town. After a short honeymoon, Mr. and Mrs. Melton will make their home on the groom's ranch near Solana.

PHILATHEA ENTERTAINED.
Miss W. W. Hughell, assisted by Mrs. Wm. Brown and Mrs. Abbie Kemp entertained the members and husbands of the Philathea club, which took place Thursday at the home of the bride at 238 Little street. The evening was spent in games and music and the serving of dainty refreshments concluded the delightful affair.

Mrs. George D. Hutchison is visiting in San Francisco, the guest of Mr. and Mrs. James Hughell today in their home in St. Francis Wood. She plans to return home the first of October.

Mrs. John A. Maus recently returned from a three months' sojourn in the east, where she visited her parents, Mr. and Mrs. A. M. Waring, near Detroit, and also friends and relatives in Chicago, Grand Rapids and other eastern cities.

FRESNO MAN CLAIMS HANFORD BRIDE

Last Tuesday evening at the home of Mr. and Mrs. J. A. Dyer in Hanford, Miss Winifred Wuma Humphreys, of Hanford and Howard Morton Tripp of Fresno were united in marriage. Rev. E. L. Cheyner performing the ceremony. The living rooms were beautifully decorated with roses and masses of flowers. Mrs. George S. Burton served as matron of honor while J. A. Dyer was best man.

The bride, who is the daughter of James W. Humphreys, a land-owner of Kentucky and West Virginia, has been connected with the school faculty of Armenia for the past three years. At the wedding, she wore a long gown of ivory trimmed with fur. Following the ceremony a wedding supper was served to the dozen guests, after which the couple left for a short honeymoon at their parents' home where they will reside in Fresno.

COUPLE GIVEN SURPRISE PARTY

Friends of Mr. and Mrs. Oscar Hannebaum gave them a delightful surprise party last Tuesday evening. Mrs. Hannebaum was formerly Miss Minnie Schaller before her recent marriage. During the evening the guests presented the couple with a beautiful picture as a remembrance of the occasion. A beautiful supper was served, after which the evening was spent in dancing and games.

The guests included: Messrs. and Mesdames J. Whittaker, J. W. Coursey, T. Preston, R. Taylor, J. L. Dickey, E. Miller, H. S. Sandbrook, H. P. Smith, L. W. Wyeth, O. C. Rouse, R. Plow, Misses L. M. Carter, Marjorie Colwell, Lena Schaller, Grace Schaller, Lillie Turner, Alice Schaller, Charles Easman, Miss Rust, Mrs. Panning, Clara Pettit, Neva Elliott, Imogene Elliott, Emma Schaller, Sara McGee, Messrs. John H. Baker, Thomas Preston, William J. Schaller, Frank McDonald, John Green, Warren Taylor.

MAUD WING MARRIED AT CLEVELAND

Mr. and Mrs. Frank S. Wing announce the marriage of their daughter, Maud Frances to Paul D. Murray at the First M. E. church in Cleveland, Ohio, Sunday, September 18. Miss Wing has been in the East for several months visiting a married sister.

After spending a honeymoon in Washington, D. C. the young couple will establish a home in Hanford, Va., the former home of the bride, where Mr. Murray is engaged in business.

ARRIVAL OF BABY BOY.
Friends of Mr. and Mrs. H. E. Reynolds, formerly of Fresno, will be happy to hear of the arrival of a baby boy in their home in Santa Cruz on September 17. Mrs. Reynolds was formerly Miss Ellen Carter.

BRIDGETTES FRIDAY.
The J. O. C. class of the First Presbyterian church will meet Thursday afternoon at 2:30 o'clock with Mrs. Robert C. Clark, 373 Calaveras avenue.

Mr. and Mrs. George Wadsworth who were away on a week-end in San Francisco are in town for work or so visiting the latter's mother, Mrs. E. E. Humphreys on M street. Mrs. Wadsworth, as Miss Margaret Humphreys, was one of the most popular members among the social set and also among the faculty of the high school with whom she taught for a couple of years.

Hanford Girl And Fresno Married

Mr. and Mrs. H. M. Tripp, the latter formerly Miss Winifred Humphreys.

AUTUMN LURES AUTOISTS TO FOOTHILLS

The delightful autumn atmosphere is luring many to the foothills near Springville these days, and numbers of autoists leave their cars to wander along the banks of the Tuolumne where streams of yellow are beginning to mingle with the green foliage of the sequoias. The buickery days, which turned golden last month, now stand devoid of foliage while the acorns on a carpet of falling leaves bond their tints of autumnal brown to the changing landscapes.

College Officer Secures Homesite

Prof. F. W. Thomas, vice president of the State College of Fresno, this week purchased an attractive home site in St. Francis Wood. This property is on Terrace avenue, just west of Wilson, and has a frontage of 50 feet. The property was bought from R. D. Sibley & Co. for \$20,000. Professor Thomas is having plans prepared for an eight-room stone residence.

J. O. C. CLASS THURSDAY.
The J. O. C. class of the First Presbyterian church will meet Thursday afternoon at 2:30 o'clock with Mrs. Robert C. Clark, 373 Calaveras avenue.

Mr. and Mrs. Frank Wells are planning the week-end in Los Angeles, leaving early south to attend the reunion of the 21st Division.

Mr. and Mrs. Rex Starr and baby daughter have returned home from San Francisco.

ARMENIANS' FEELINGS TOWARD AMERICA MORE THAN GRATITUDE

President Declares U. S. Subjects Are Permitted to Roam Throughout Country Without Questioning

ERIVAN, Soviet Republic of Armenia, Sept. 15.—Phaxon Hiben, a representative of the Near East Relief, has just had an interview with the Soviet President of Armenia in which the President told him that the feeling of the Armenians toward Americans for their help was "something deeper than gratitude."

Mr. Hiben explains that the President is really the President of the Revolution, a double abbreviation of "Revolutionary Committee," and that this committee corresponds to what would be called in most other countries, "The Cabinet."

The Armenian President came into an office where Mr. Hiben was talking with two members of the Cabinet. The relief agent described the incident thus:

"The door opened in the casual way that people have of butting in and out of anybody's office, and breaking into anybody's conversation. In this Communist land and a common soldier entered in the cotton khaki, high black boots and shirt outside his pants. His head was shaven like that of any soldier of the Red Guard. It was what writers call a 'bullet head.' He pulled up a chair and sat down, his elbows on the table, listening."

"What do you want to ask the President?" asked one of the ministers, waving his hand at the man dressed as a common soldier, without mark of distinction of any kind on him. We made very little progress until I asked him about the American relief work in Armenia; then he opened up a bit. Mr. Hiben quotes the Armenian President as saying:

"You Americans must have heard so much about the sufferings of Armenia that I can quite understand that you should say to yourselves: 'What is the matter with these Armenians that they are always starving to death?' The only trouble is that you can not understand because in the United States you do not know what has been going on out here in Transcaucasia, nor what has taken place in Armenia itself since 1911. It has all been just one disaster after another, in a succession of hideous but it is almost unbelievable."

The President reviewed the chapters of Armenia's tale of woe—the world war, Turkish and Russian invasions and wars, and the Armenian genocide. The final Turkish horror, he said, was only in April last, four months ago. He went on:

"In all these seven years from 1914, there has not been one moment of peace or security for anybody. Not a chance to get on our feet. Everything destroyed, pillaged, burned. Everybody homeless. Everybody starving. A regular hell."

"There's a free Armenia today. And when everything is said and done, there will be a free Armenia. It has cost a great many lives, and an incredible deal of suffering. But it's worth it."

"Just to say that we are grateful is nothing. What we feel about it is, of course, something deeper than mere gratitude. It is hard to say what it is that we feel. But you go out among the Armenian people—you, an American—and you will find that to them you are something different from other men. Whatever you want of them, you can have—to the last man of them. You don't need a passport, or credentials, or anything else. You are an American. That's enough."

"We've only had peace in this country four months, now. We are working our heads off, all of us, to try to put the country on its feet again. But you can not undo the terrible damage of seven years of destruction in seven months. We need help now more than we ever have, for its now or never with us. We've got our chance—but we can't swing it alone. We have to have help from somewhere. In a year, if no new disaster hits us, we should be all right. But until then—well, you Americans have been the only real friends we have ever had."

Persian Minister Arrives To Take Up Duties Here

MIRZA HUSSEIN KHAN ALAI
Mirza Hussein Khan Alai, the newly appointed Persian minister to the United States, has just arrived in Washington from Spain, where he has been minister for some time. He succeeds Mirza Abdul Ali Khan.

WINS HONORS AT KINGS FAIR

Hardwick Close Second To Grangeville

HARDWICK, Sept. 24.—The little community of Hardwick won many honors at the big county fair in Hanford this week. In the community exhibits there were only five points between Grangeville which won first prize, \$100, and Hardwick, which won second prize, \$75. The quality of exhibits were the same on all of the six community booths competing for the big cash prize but Grangeville had a bigger variety of products on display.

The Hardwick booth, on center, which won about eighteen blue and red ribbons, and the island district which won third prize, \$50, and which adjoins Hardwick on the west, ran Grangeville a close second on ribbons but lost on variety of products.

For originality, the island scored more points than any of the six booths. The island display was a masterpiece with watermelons for sunshades and sunflowers for port-holes and the life preservers were delicious looking doughnuts. Everything on this battleship was complete from the searchlight to the wireless apparatus and all were made of vegetables or other of the farm products.

Hardwick's booth was a "Pyramid of Products." Some of the Hardwick blue ribbon winners are: Warm-weather Bros., J. W. Arthur, Mrs. J. W. Arthur, M. N. Doggett, Mrs. J. Bernstein, Walter Carter and J. O. McIntire.

Special Teachers Added To Schools In Tulare County

VISALIA, Sept. 24.—Under the new state law permitting additional supervision or special work teachers in cities and rural communities, plans are now being laid by County School Superintendent I. E. Buckman under which every rural school is expected to have carried to its full complement of special work which it would not otherwise be able to carry.

The law which permits an additional teacher for each 300 pupils in cities and for rural districts, "communities," where there are 500 pupils, will make possible, Mr. Buckman says, instruction in physical education, music, art, manual training and other courses available to the rural districts and in places to press the advantages to the limit.

To that end A. W. Churley, late of San Luis Obispo, has come to Tulare county to undertake the physical education in the rural schools. He will have his headquarters in Visalia, and will visit the schools adjacent to that city.

Mrs. Maudie Smith is at present teaching music to the rural school pupils around Visalia.

Mrs. Myrtle Baulder is doing the same work with Strathmore as her headquarters. She is also teaching physical education and art about Orosi, spending much of her time in the Orosi school and acting as a supervisor for several rural communities.

Professor Altker of the Eureka high school has undertaken the task of spreading manual training teachings through schools near Eureka and under the law it will be possible to have several more teachers for this work whom Mr. Buckman expects soon to place.

Warm Weather Aids Dried Fruit Crops

VISALIA, Sept. 24.—The unusually warm weather of the past few days have had the effect of drying the prunes and raisin crop now on trays in Tulare county very rapidly, overcoming the slowness which had been manifest before and getting the season back to that of normal years. Before the warm period set in an exposure of two weeks had failed to dry some of the prunes on trays, whereas normal weather would mean their drying in several days.

GARAGE PARTLY BURNED

COALINGA, Sept. 24.—Fire, which had evidently started from burning rubbish somewhere in the neighborhood, today damaged a small garage at the A. E. Petty home at 121 Fresno street. The garage was the property of Mrs. Edith Inglyn and damage will amount to about \$20. The fire department made quick work of extinguishing the flames.

Members of the teaching staff of the \$300,000 grammar school system at Kingsburg, which has been recently augmented by the addition of the new \$140,000 Roosevelt school. The 21 teachers listed below began the season's school work last Monday at the three city buildings.

First Row—Mrs. Lillie Gillestrom, J. H. Catlin, Miss Jennie Rosendahl, Miss Gertrude Norby, Miss Helen Linda, Miss Marian Morrison, Miss Frances Lindstrom.
Second Row—Miss Anna Burg, Robert A. Catlin, D. M. Young, Mrs. Ella Catlin, Mrs. F. A. Jean, Mrs. Ida E. Pinkley, Miss Ruby Catlin.
Third Row—Mrs. Ruth F. Wiston, Miss Nysborg Lindburg, Alice Cadwell, Hazel B. Tolblad, Ruth M. Peterson, Miss Edith Renfrow, Winifred Chandler.

Forum Members Hold First Meet

Members of the "Forum" met for the first time this year on Thursday evening and held a regular reunion gathering. Several important amendments to the constitution were proposed at the meeting. Among them was that the limitation number be increased from 40 to 50, and that the old wording of the constitution be changed from Fresno Junior College to Fresno State College.

Before the business meeting the members were entertained with a program which included a reading by "Orinda Akoy" and "Blaise Kallian," the "Magician." An extemporaneous debate on the question, "Resolved, That the intellect of man is inferior to that of woman," Albert Chadden was the woman's friend while Warren Moody stoutly upheld that man was far superior to woman. The decision was rendered to the affirmative by a vote of 3 to 2. "The Cat That Came Back," by Roy Vance and a reading by Effie Austin.

The club will hold its meeting on the first and third Thursday evening of each month. The meetings will be held in the assembly room, located in the northwest corner of the College, and will be called to order promptly at 7:30 o'clock.

Several Cases of Smallpox Reported

LOS BANOS, Sept. 24.—Several additional cases of smallpox have been reported during the week. Among them are the Charles Fought, Leslie Beaver and Raymond Watkins families. John Rhodes is now reported as improving.

The board of health is urging vaccination and all cases are being closely quarantined. It is reported that a Spaniard, working on the Rhodes ranch, was the first case of the disease in this community. He is now reported under quarantine at Firebaugh.

SPECIAL SERVICE TODAY

REBBLEY, Sept. 24.—Tomorrow will be Promotion Day for the pupils of the First Methodist Sunday school when a special service will be held at 10:15 a. m. to which the membership generally is invited. Promotions will be made from the Cradle Roll, beginners, primary, junior and intermediate departments. The final event will be the installation of the new Sunday school officers. Herman Neufeldt, heading the list as superintendent, according to J. Selmon who resigned to leave for another field of labor.

Night School To Be Organized at Newman

NEWMAN, Sept. 24.—A meeting for the purpose of organizing a night school at the Newman high school will be held Monday evening. The enrollment list has been open for some time at the office of Secretary Pitney of the Chamber of Commerce and sufficient numbers have signified their intention of attending the school to justify the trustees in its establishment.

Principal L. E. Richards of the high school and members of the faculty will be in charge of the school. Classes for those who cannot speak read or write English will be one of the features of the work.

Newman Boy Scouts To Give Minstrel

NEWMAN, Sept. 24.—The Newman troop of Boy Scouts, held a "suggestion" meeting Thursday to consider means of raising money for carrying on their activities. The troop is desirous of organizing a band and drum corps and needs money for instruments.

One suggestion which was accepted was a minstrel show which will be given next month. Three new boys were enrolled at Thursday's meeting. D. Richards, Robert Andrews and Emmett Kuhns.

SCHOOL TO OPEN

BIOLA, Sept. 24.—The Biola primary school will open its term Monday.

Modesto Contractor Awarded Water Jobs

Special to The Republican. MODESTO, Sept. 24.—Contractor W. H. Webb of Modesto was the successful bidder on two cement lining contracts awarded by the directors of the Modesto Irrigation district in adjourned session this morning.

The contracts awarded were: Cement lining of lateral 7 at the Lucas and Carlson ranches, and cement lining of Goldworthy ditch at the Backett and Conant ranches. Webb's bid on both jobs was 11 cents per square foot for lining and \$13 per cubic yard for concrete and cutoff walls. There were two other bidders, John A. Carlson, of Turlock, and the Pacific Construction company.

Kings Fair Attache Attacks Girl, Claim

HANFORD, Sept. 24.—F. L. Slade, an attache of one of the concessions at the Kings county fair, is being held at the county jail following an alleged attack upon Edith Hill, 15-year-old daughter of Mr. and Mrs. William Hill, who reside on a ranch south of here. Following her disappearance Thursday night, officers discovered the missing girl walking home alone. She declared that she had been attacked by Slade, but had fought him off. Her torn clothing is said to have confirmed the story. Miss Hill is being held by Probation Officer George E. Goodrich, pending an investigation.

Commission O. K's Final Legal Step On Don Pedro Dam

Special to The Republican. MODESTO, Sept. 24.—The final legal step in construction of Don Pedro dam, the largest irrigation project under way in the west, was successfully terminated today upon receipt of a resolution by the state board of commissioners authorizing expenditures and obligations necessary to build the giant dam. Receipt of the authoritative resolution was announced at an adjourned session of the directors of the Modesto Irrigation district here this morning.

Tomatoes Are Seized By County Sealer

County Sealer of Weights and Measures F. B. Johnson yesterday seized and condemned 1182 cans of tomato puree soup. The cans were shipped to a local dealer from Los Angeles. The dealer refused to accept the goods, Johnson stated, because they were of an inferior grade, and because the cans were not labeled. The cases in which the goods were packed were mislabeled, Johnson stated. He will ship the goods to Los Angeles in care of the sealer of weights and measures there. It was said by Johnson that the freight charges on the goods, their storage here, freight to the southern city and re-labeling would amount to about \$300.

Coalinga Donates \$250 Cash To Band And Baseball Club

COALINGA, Sept. 24.—At a meeting of the board of directors of the Coalinga Chamber of Commerce donations of \$250 each were made to the Coalinga-Oilfields Baseball association and the Coalinga Union band. The board was unanimous in its decision to make the donations. It is in the opinion of the directors that the baseball club is not only an excellent amusement for citizens but in addition is a fine advertisement for the city. A like opinion prevailed regarding the band as it offers recreation for both young and old.

Fruit Houses Busy In Saltana Section

SULTANA, Sept. 24.—The Earl Fruit company began work Wednesday after several weeks layoff. The Earl Y. Foley house finished their summer run Tuesday, but expect to be in charge of shipping fruit for several days. They expect to put out about three cars per day. The Shepherd house also began operations again today.

WHEATVILLE BRIEFS

WHEATVILLE, Sept. 24.—V. Thorwaldson is hauling sand and cement preparatory to installing some modern hog raising equipment. Cowan is preparing to harvest his large crop of corn.

TWO ARE FINED

CHOWCHILLA, Sept. 24.—R. O. Whittle, who pleaded guilty to a charge of purchasing and having liquor in his possession, was fined \$100 yesterday and given a suspended sentence of 30 days in jail by Justice R. G. Cornell of Chowchilla. M. Bradford who sold the liquor to Whittle a few days ago was sentenced to serve 15 days in the county jail.

SUGGESTIONS FOR THE HOME BEAUTIFUL

Accessories

By DOROTHY PLUMMER

"One pays mostly for esthetic atmosphere here," my friend said, and looked reproachfully at her strapless gown with its well-bedded and slender lines. We were in one of the exclusive little tea rooms of the South.

"Yes, but you must admit that there is a great deal of that atmosphere," I was quick to come to the defense of the tea room, for it really was altogether lovely. Soft light, tall candles and flowers in profusion carried pastel colors through the room, while the note of contrast was given by the waitresses in their well-fitting black uniforms and the smartest and most beautiful of aprons and caps.

Our interest aroused, we looked about the room again with an aim at analyzing it.

"Why," we said, "shouldn't a private dining room be equally susceptible to such treatment as a public one? And wouldn't this be a much more charming room for the family to assemble in three times a day than the more usual one of old-fashioned furniture, a buff wall and an oriental rug?" So we looked about about searchingly and were surprised to find that, given a good background and the whole secret of its success lay in its accessories.

The walls were painted a light sage green, as were the buffed tables and chairs. A tapestry of a slightly darker shade covered the floor. On this background, accessories built up a fairytale of form and color.

The hues used were old rose, lavender, a somewhat grayer blue and yellow. The top of the table at which we sat was painted lavender. Over this, a covering of plate glass was fitted. At each place, a square of linen cloth was laid about eight inches by twelve of the same lavender shade as the table top. These cloths were hem-stitched about a half inch from the edge with lavender thread. This hemstitching may be done by machine, you know, at any shop which advertises hemstitching and other fancy machine sewing, and at a very low price.

Very quaint and novel were the salt and pepper shakers. They were of the ordinary aluminum variety, shaped as in the cut below. These were painted lavender and along the edge at the top a garland of small yellow roses with green leaves encircled the shaker. These roses were simply dabs of yellow enamel which when allowed to dry, had a dash of darker yellow superimposed near the center and a center dot of deep red. The leaves were touches of a medium green.

Shades in shades of rose and mauve were held in a squat pottery vase with an old rose glaze. These vases, I later discovered in a store at eighty cents apiece. Standing by it was a wooden candlestick of slender proportions, tapers colored with a band of blue. It held a tall, spiral candle of red.

The lighting came from side fixtures and from floor lamps. These latter had shades of rose crepe de chine, which hung in straight, soft

ruffles from the circular frames to a depth of about three feet. Over the rose ruffle, a shorter one of blue was added, having a heading at the top, caught in by a narrow band of gold lace. Both ruffles were picked along the lower edge. At one side, flowers fell from the gold lace band, flow to make these and other flowers will be the subject of a later article.

The side lights were covered by shades of rose crepe de chine edged with gold embroidery and were set into narrow wall panels alternating with under panels hung with mirrors in blue frames.

Here and there, by a table, or at the foot of a lamp pedestal, exquisite pillows were used. The one nearest me had one full, gathered end of heavy gold cloth, the cylinder like body of the pillow, which was of black velvet, terminating at the other end in a gold band of pastel silk flowers was set on one side.

Do you not agree with me that this was a room of distinction and charm? Yet you cannot but agree also that from its painted furniture in its ruffled linen shades it could be made at home.

Have you discovered those daisies of old cloth or Santitas which are now becoming so justly popular? They may be used on trays, for luncheon meals, on garden or sun room tables. These mats may be bought with printed designs, in many stores, but those painted by hand are the more individual and artistic. Oil colors should be used in decorating these mats and may be printed with a very small amount of white enamel to give them greater durability.

I saw a very old design only yesterday. It was used on a lavender luncheon table. The cloth, cut in oblong mats to serve the same purpose as the squares of lavender linen described above. Around the edge was a band of medium green and across the surface was a spray of tiny leaves. These were life size and appeared much as if a hand full of the flowers had been laid against the mat, traced and then removed and the outlines filled in broadly with flat areas of color. The purple flowers were in two and three shades, all darker than the lavender of the table. The leaves were a flat green. I then saw a very attractive rose candle in which a black candle stick would have appeared on this table.

The Women's Athletic Club of San Francisco uses these mats with charming effect. They are of cream color, edged with a band of the same color and one about two inches wider the center of royal blue. Between these bands are small decorative units in vermilion, orange, black and green.

For use in a girl's bedroom, an elegant design is developed of shrimp pink Santitas. It may be used either with or without a glass covering on dresser, chiffonier and table and should be made to fit the top exactly. Roses, violets, forget-

me-nots, and other flowers are banded together in a two-inch wide band running around the covers about half an inch from the edge. This band of flowers is enclosed either side by two very narrow lines of black. The treatment of these flowers should be in the pastel shades and highly conventionalized. Small circles of lavender in groups, may serve as violets; dots as forget-me-nots; yellow dots surrounded by rays of white paint, as daisies; dots terminating in a spiral, as roses; and the shapes of the leaves traced in green. A large initial, Old English in design, and painted in a deeper shade of shrimp pink than the background may be placed in the center of each cover. These covers are very charming with white furniture and might well be supplemented by drapes in rose and blue organdie or crepe de chine.

For card tables, the covers are cut as are those of cloth, and where they are to be used for progressive playing, the decoration should include the table number. An interesting set of covers is made from apple green and chrome yellow Santitas. These green and yellow covers are painted, around the edge of the table top, with a band of black. Six inches from the edge runs another black band. Between these bands, the surface is checked in black with two inch checks. At various intervals, there are tiny, conventionalized flowers in pastel shades painted on these checks.

Another method of decoration is to substitute decorative units for the checks between the two black bands.

National Women's Party Near Victory

WASHINGTON, Sept. 24.—Officers of the National Women's party have won a partial victory in their fight to have the party's suffrage statue placed in Statuary Hall, at the Capitol.

The statue, a marble image of the three equal suffrage pioneers—Susan B. Anthony, Elizabeth Cady Stanton and Lucretia Mott—has reposed for a number of months in an obscure corner of the Capitol basement far from the select of statutory Hall. The Women's party officers, however, have succeeded in having it removed to the center of the Capitol dome on the lower floor.

GIVEN LIFE SENTENCES. SPENCER, Iowa, Sept. 24.—Life sentences were meted out here by Judge M. J. Lee to Roy Yorty, aged 20 years, and Wilson Devries, aged 26 years, who pleaded guilty to holding up and robbing the Greenville bank September 12. They obtained about \$500 in cash in a daylight robbery. This is said to be one of the severest sentences for bank robbery ever given in the state.

West Virginia Coal Operators Protest Withdrawal of Troops

Left to right, above: Z. T. Vinson, W. D. Ord and A. L. Greaves. Below: Harry Olmstead, Albert Belcher and J. D. Francis.

These Logan and Mingo county coal operators called upon President Harding a few days ago and requested him to keep federal troops in the mine war district. They asserted that the miners would resume the war as soon as all federal troops were withdrawn, and that state authorities were unable to cope with the situation.

What Does Your Mirror Say?

As you comb your hair in the morning light, do you see youth and beauty, or signs of age? Is your hair young or old?

You can quickly remove misleading evidences of age by tinting streaked or gray hair with "Brownstone". It imparts any shade of brown or black—natural life-like colors that will not rub off.

Also splendid for toning down faded or bleached hair. Odorless, greaseless, economical, lasting and absolutely harmless. "Brownstone" is as easily used as manicuring your nails.

Two colors, "Golden to Medium Brown" and "Dark Brown to Black", 50¢ and \$1.50 sizes, with easy, complete directions. At drug and department stores. Free trial bottle, with valuable booklet on the hair, sent direct on receipt of 11¢ to cover postage, packing and war tax.

- 4—Monte Banks in "Punch-Drill Alley"

Also International News, Pathé Color Scene, Kinema Rippings and other features.

Attractions at the Theaters

ORPHEUM VAUDEVILLE OPENS ON OCTOBER 6

Orpheum vaudeville is scheduled to open at the White theater on October 6.

From that date throughout the vaudeville season it is in to a permanent feature on Thursday, Friday and Saturday nights and Saturday afternoon of each week, according to Orpheum announcements.

Sammy Long, director and manager of the vaudeville, is the first bill's headliner. Long appears with a company of female actors, dancers and singers, whom he terms as his "Red Feathers". In the vaudeville "Hillbilly" reports on the vaudeville's accomplishments as noted by Orpheum management.

Throughout the season, the vaudeville will feature a variety of acts, including a comedy team, a musical comedy, and a variety of other acts.

The Clifford Wayne Trio of comedians, assisted by other comedians of vaudeville, including Master Karlo and Barlette, the wire walker, trapeze and ring artist, comprise the rest of the Orpheum's first show of the season.

MANY PLEASING ACTS ON HIP PROGRAM TODAY

"The Fortune Queen," a clever idea in July and clear fun and excellent harmony singing will be one of the 15th features today. It is a very pretty picture and five talented singers and dancers make up the ensemble, one a young woman of the pretty, graceful and talented type.

Two very different and popular acts of comedy players have joined hands in the field of "vaudeville" forming the firm of Richard Burton and Victor Dyer. Both are pleasantly remembered as prominent comedians with leading musical attractions such as "The Chocolate Soldier," "The Red Feather," "The Wolf Hopper Co." and other reputable attractions.

"The Red Feather," a delightful happy musical comedy affair filled with jolly fun and hearty laughs.

"The Chocolate Soldier," a musical comedy of class, talent and color is offered by Francis and Day.

Classical and romantic comedies are included in their specialties. "John, Kelly and Wanda" also add to the musical value of their bill.

Hai Stryker, a supper comic, who believes that perfection is everything in life, is a remarkable balance, contraction, tension and smiling displays stands in waiting that

"THE AFFAIRS OF ANATOL" IS LIBERTY'S FEATURE

"The Affairs of Anatol," featuring twelve of America's most famous actors, by the greatest director in motion picture, comes to The Liberty today for its first showing in the United States.

This picture, the supreme effort of Cecil De Mille, is unquestionably the greatest spectacle that has ever been presented.

The cast includes these famous stars every one of whom has appeared in the leading role of numerous super spectacles in the past: Wallace Reid, Elliott Dexter, Monte Blue, Raymond Hutton, Theodore Roberts, Theodore Kosloff, Gloria Swanson, Babe Daniels, Polly Moran, Agnes Ayres, Wanda Hawley and Julia Faye.

The obtaining of this big film spectacle by The Liberty for its first showing in the United States is an achievement that cannot be overpraised.

It was accomplished through the special efforts of Manager George Sharp during a recent trip to San Francisco.

"The Affairs of Anatol" is a superior film to such masterpieces as "Male and Female" and "Why Change Your Wife?" and "Forbidden Fruit," which were directed by the same director as this picture, the famous Cecil De Mille. Imaginative and America's greatest actors and actresses working under the guiding hand of this great director and then you will realize the wonders of this masterpiece of the screen.

The story deals with a wealthy world-famous young man who sacrifices the love of his life when he sees to light certain young women with whom intimates he has little concern and who victimize him of course. How he finally gives up his self-appointed task of regeneration and finds himself making a deal with his mother, Ed Allen, is another feature.

The Clifford Wayne Trio of comedians, assisted by other comedians of vaudeville, including Master Karlo and Barlette, the wire walker, trapeze and ring artist, comprise the rest of the Orpheum's first show of the season.

"WELCOME CHILDREN" IS STRAND'S FEATURE

One of the most exceptional stories ever written and produced is "Welcome Children," which is one of the two big features being shown at the Strand for three days, starting today. It is an unusual feature comedy drama that is vividly human with a scathing denunciation of childless lunatics.

As the second half of the big bill, which is a Fair Week special, is "Cyclone Bliss," with Jack Hoxie in the leading role. "This play is a real one, mainly because it was directed by Ben Wilson, 'the king of western thrillers.' "Welcome Children" has a story wrapped about the fatherless and motherless nine little Martin children who are brought before the times and souls as soon as the last parent has been buried. Rather than allow the happy little family to be divided, the eldest child steals away with her charges in the still of night and takes them to a large city where they are denied harboring by the landlords who say "No Children."

But there comes a day when the big problem is solved and Mr. and Mrs. Cohen harbor the children. Three comes a day when the secret of the eldest child is discovered. The part the children play in preventing a serious crime being committed; the gathering of a storm which threatens the destruction of the children and the opportunity intervention of their champion. The story ends in a big surprise that is so different.

Supporting Jack Hoxie in "Cyclone Bliss" is a notable cast of players. Jack Hoxie himself is one of the best actors in the West and is given an opportunity to display his horsemanship in more ways than one. Included in this splendid play is a cast of remarkable Western actors, including Frederick Stone, William Dyer, Fred Kohler and Evelyn Nelson.

The other Strand features including "The Son of Tarzan," which is the greatest wild animal picture ever produced, and which is now running in its eleventh episode, will be shown.

"WELCOME CHILDREN" A BIG SPECIAL

A wonderful Romance for the whole family—the most human, enjoyable entertainment we have ever had the pleasure to present.

Jack Hoxie in "Cyclone Bliss" A thundering tale of those do-or-die Western lads who fear nothing and fight for their rights.

13th Episode of "THE SON OF TARZAN" A whirlwind for Action and fights.

DE PALMA MAY ENTER CLASSIC

Veteran Driver Is Now In New York

(Continued from Page 1-a.)

Joe Thomas is the winner of the last Raisin Day classic. It was Joe Thomas that provided the entertainment for the crowd last year. Thomas has one of the fastest cars and will undoubtedly prove to be a favorite in this race. Thomas is fourth in the championship standing and a few points behind Hearne for third place.

Eligible Drivers Here.

Frank Elliott is the newest driver in the big league field and is the favorite of the San Joaquin Valley. Hearne is Elliott's adopted son. The fans of both Hearne and Elliott know his ability, both for skilled driving and daring racing and are behind him to a person.

A total purse of over \$17,000 has been hung up for the winners of this year's race. Besides the eight regular prizes, guarantees of \$500 are being given to the drivers who fail to win prize money. The prizes awarded are as follows:

First, \$5,000; second, \$3,000; third, \$1,500; fourth, \$1,000; fifth, \$1,000; sixth, \$1,000; seventh, \$1,000; eighth, \$500.

In addition the drivers will receive 100 points toward the national championship standing for 1922 to be divided as follows:

First, 500; second, 150; third, 90; fourth, 50; fifth, 30; sixth, 20; seventh, 15; eighth, 10.

The points standing to date of the drivers who have entered thus far is as follows: Milton, 1710; Sarpis, 1415; Hearne, 619; Thomas, 616; Murphy, 445; Miller, 225; Alley, 99; Soules, 80; Wonderlich, 78; Elliott, 5.

The race officials are the following: Governor William D. Stephens, honorary referee; L. A. Nares of Fresno, referee; Fred Wagner of New York, starter; Frank Warner of Los Angeles, timer; Les Manning of Oakland, pit manager; Frank Head of Fresno, clerk of course; Eddie Waterman of Fresno, chief of technical committee; J. Fred England of Fresno, chief scorer.

THE WEATHER

U. S. Bureau Report

San Francisco, Sept. 24.—Forecast for San Joaquin valley: Sunday fair; light northerly wind. Monday, Sept. 25.—Level forecast; generally fair and cooler weather. Sunday, Sept. 25.—Level forecast; generally fair and cooler weather. Sunday, Sept. 25.—Level forecast; generally fair and cooler weather.

Fraternal Societies

(Continued from Page 10B)

for the new district manager, Brother J. S. Freeman was present and an extensive campaign was outlined for the winter months. Brother Freeman came from Long Beach, where he has been engaged in fraternal work. He has spent many years in such work and comes well prepared to take up the work here. He expects to bring his family and make this his home.

Brothers A. B. Lauffer and J. D. Thomas were chosen captains and the council was divided into two teams and already many candidates have been obtained.

Beginning with October the council will meet every Friday evening in the A. G. U. W. hall.

Degree of Honor.

Several new officers were elected at the recent meeting of Martha Lodge No. 33, Degree of Honor, Protective Association. Mrs. Marie Dougherty was chosen president, filling the vacancy made by the death of Bernice Clanton. Marie Herz was elected first vice president; Isabel Booth, second vice president; Lulu Gregory, under. Following the meeting, Mrs. Dougherty entertained the members. Plans are being made for the winter work. Roll call will take place a week from next Friday.

Macabees.

The Woman's Benefit Association will meet next Tuesday evening in A. O. U. W. hall at 7:30 for short business session. At 8 o'clock they will open the doors to the public for the first social dance of the season.

Mrs. Richardson's HOME-MADE CAKE

Fair Week

begin tomorrow. You'll be too busy to bake, but Mrs. Richardson can duplicate your own delicious cakes. She makes cakes of great variety, compounded according to old-fashioned recipes and scientifically baked in modern ovens. Consequently they are rich and light, moist and deliciously melting, and the true home-made flavor.

Order by phone for extra delivery, or call at the cake shop for these cakes are sold wherever else.

NOVEL SPORT SYSTEM USED IN KERN HIGH

School To Have Inter-Class Competition

HAKESTFIELD, Sept. 22.—The boys' gymnasium classes at the Kern County Union High school this year will be more interesting and beneficial than any previous year. It was announced today by Principal A. J. Ludden.

The gymnasium work this year will be in charge of Messrs. Finch and Seawright, both of whom are well-trained men. The teachers have a new plan which they will carry out this year.

Each class will be divided into

teams which will play in the different sports for the championship of the school. The first sport will be indoor baseball.

Each team will have its own captain and will play the other teams for the championship of that particular period. A championship team will then be selected from each period and these teams will play for the championship of the school.

When the school championship is won, the names of the winning team are to be inscribed on a shield which shall be placed in some conspicuous place in the school. The same order will apply to all other events such as swimming, boxing, basketball, etc.

Class records of the games will be kept and the results will be posted in the school paper each week.

The captains chosen by the various indoor teams are as follows:

Period 1—Cattani, Watts, Snyder, Rawlings.

Period 2—Kent (basketball), John, McKenna.

Period 3—Gillum, Van Oedel, Bus-

by, Swan.

Period 4—Kelly, Lohback, Nix, Morris, Wilson, Johnson, O'Brien, Hobbes, McCarthy, Moulton.

Period 5—Vacant.

Period 6—Metzner, Watt, Gill, Remple, Bickley, Huth, Payne, Hubbard.

Period 7—Sturbe, Davis, Howarth, Hodge, Selby, Graves, Jeffries, McCoy.

Period 8—Freeman, Knoles, Hart, Middleton, Bushy, Jasper, Campbell, Matheron.

Some theaters are having the temerity to show "A Twilight Baby," the movie which stars Virginia Rappe—Fatty Arbuckle's victim.

The only appeal this picture now can have is to a morbid curiosity.

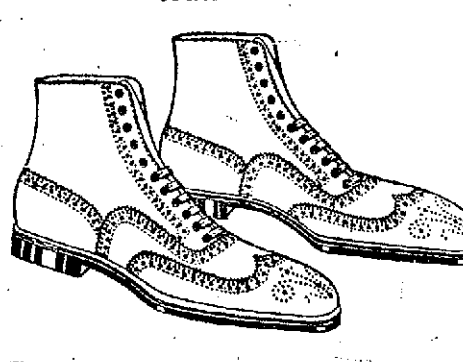

If there be any merit in censorship, the censors have a chance to prove it by barring this picture.

The best cure for insomnia is listening to a man talk about himself.

Omaha woman advertising for a husband finds the mails service slow.

Hoboes and other fashionable people are going south for the winter.

GROCERIES CIGARS

HERE HERE HERE HERE

Here They Are, Folks! Little Sun-Maids

"The Between-Meal Raisins"—the Cure for 3 o'clock Fatigue

FOR years you've loved to munch on raisins. Wouldn't you buy them down town, if you could, in little 5c packages?

Well, now you can!

They're in drug stores, groceries, candy and cigar stores, in the neatest little 5c pocket packages you ever saw.

Little Sun-Maids, "the between-meal raisins," made from tender, luscious, juicy, seedless table grapes.

Seventy-five per cent pure energizing nutriment (146 calories for 5c) in practically pre-digested form. Quick-acting stimulant—to counteract brain lag, lassitude and let-down which come to millions at 3 o'clock, according to efficiency experts.

Rich in blood-building food-iron also—frequently the one lack that keeps thousands under par.

You need but a small bit of iron daily, yet that need is vital.

So get raisins now, and form the habit. Have these luscious little seedless raisins on your desk or table—within easy reach—all day to stave off hunger and fatigue.

A good way is to

Buy at Noon

Always buy at noon so you'll have them for your afternoon refreshment—make that your daily, profitable habit.

Packed just like "big sister" Sun-Maids in a great, modern, sanitary plant in California. Wholesome, sweet and clean. Made from highest quality seedless table grapes, the finest grown.

WILL DEDICATE NEW BUILDING

Presbyterians To Hold
Service Today

Daily day at the First Presbyterian church today will mark the dedication of the new building of the Sunday school unit at the corner of M and Calaveras. The church will meet in this section until the construction of the church building on the corner lot.

The Sunday school building is complete in every detail, from the coat rooms and ladies' parlor in the front of the building to kitchens in the rear.

One enters a small vestibule, from which wide stairs lead to the third floor. The main auditorium is located in the center of the building on the second floor, with a new stage, seating capacity for 300, and two large class rooms at the rear of the auditorium may be opened by use of three folding doors. A balcony provides for nine additional class rooms, that may all be opened up for a large meeting. The beginners' and primary departments have large rooms in the rear of the building and a in the rear of the building will be headquarters for Sunday school officials and possibly a small library will be established there. Two studios are also provided.

On the third floor are the Junior and Intermediate departments, each having its own auditorium, the various class-rooms opening on either side.

In the basement or on the ground floor is located the large social hall, where 500 may be seated at a banquet. Two large class rooms, the Boy Scouts' room, kitchen and heating and cooling plant comprise the other rooms on the main floor. The air, it is said, can be changed completely in seven minutes.

In all there are over fifty single class rooms, each with a window. The entire cost of the building was \$15,000, including the lots, heating, ventilating plants, pipe organ, chairs, tables, etc.

Identification

Bureau Planned

WASHINGTON, Sept. 24—Plans for the establishment of a Federal bureau for identification here to aid local police throughout the country in tracing and identifying criminals were announced by William J. Burns, new chief of the bureau of investigation of the department of justice, in an address here last night before the International Association of Identification. The proposed bureau, Mr. Burns added, has secured the full endorsement of Attorney General Daugherty.

Beer Favored By

Medical Branch

ST. LOUIS, Mo., Sept. 24—The Independent Medical Association, in convention today, adopted a resolution favoring beer of 2.3-4 per cent alcoholic content, and denouncing the dry law.

The resolution asserted that the association was "convinced of the

18 Divorces Are

Sought In Week In Courts Here

There were eighteen divorces actions filed last week in the superior court, thereby surpassing previous records. On Friday there were seven actions filed which is the largest number filed in one day in the history of Fresno county. Very few of those filed were on the grounds of cruelty. The cases were divided between Judge Cashion, Judge Beaumont and Judge Woolley.

necessity of properly brewed lager beer in the treatment of patients, and that beer of 2.3-4 per cent alcoholic content would be "admirably adapted as a substitute for stronger alcoholic drinks now consumed by our people in large quantities."

The Volstead law, the resolution declared, "rests medical practice, and compels the physician to become a go-between the welfare of his patient and the saloon."

SIERRA VISTA

Come out Today - See for yourself what has been accomplished in only one short week.

AS IF BY MAGIC
Sierra Vista is springing up to fulfill its destiny.

Bustle and activity prevail in this new home district. Houses are being built, streets are being graded, sidewalks and curbs are going in. Those who have already invested are delighted, and the remaining lots are going fast as people begin to realize what Sierra Vista will be.

\$30,000 Was Invested Last Sunday

Every subdivision Billings & Meyering ever marketed has greatly increased in value, and the community showed its faith in the future of Sierra Vista by purchasing \$30,000 worth of lots on opening day.

Their faith will be justified. Opening prices are low, and the large percentage of lots already sold, the many homes now being built, the improvements now being rushed to completion, and the steady sale of remaining lots have already greatly increased values in Sierra Vista.

These Factors Make It A Desirable Home Site and a Promising Investment

SIZE. Sierra Vista is a square mile in area, with 24 miles of building frontage.

LOCATION. Adjoining Alta Vista on the northeast, a higher and cooler district, with an unobstructed view of the beautiful Sierras.

In the first unit of 480 lots now on sale, there is
Street Car Service
Sidewalks and Curbs
Convenient to Schools
Graded Streets
City Water
Shade Trees
Building Restrictions
Racial Restrictions
Electricity
Gas

Today Will Be A Big Day In Sierra Vista

People are beginning to realize the unusual value of Sierra Vista lots at the low opening prices. They see that the unusual demand, the extensive improvements, the building, the natural advantages and city conveniences are daily creating greater value. They see that the future of Sierra Vista depends on the rapid development of this first unit, and realize that the effort and capital that Billings & Meyering are concentrating on this first unit make it a very unusual investment opportunity.

And these people who have analyzed the situation will be on the tract today to buy lots.

Come Early This Morning To Sierra Vista

See for yourself this bustling district so visibly growing. Let us show you the lots that are still left in this first unit, fast diminishing in number and going faster as people begin to realize the possibilities of Sierra Vista. Investigate, and you will appreciate the great value of Sierra Vista as an investment and as a home site.

Buy Or The Tract Today

The office at the corner of Tulare and Burton in Sierra Vista is open and doing business. Your chance to buy lots at our low opening prices may depend upon how soon you get there this morning. At any rate, join the crowds and see what this big new Fresno subdivision looks like.

Enter Latest Models In Automotive Show at Fair

DEALERS HAVE MANY CARS IN NEW BUILDING

The latest in the realm of motordom will be shown when the automobile exhibit at the Fresno District Fair throws open its doors to the valley's thousands here tomorrow morning. Here is a group of latest models which will be on display showing the 1922 vogue in the automotive world. Nearly 100 cars will be placed in the new display building.

Autos Worth Thousands Show Latest In Construction Attractive Decorations Are Arranged In Display

The greatest automobile show ever held in the San Joaquin valley, housed in the best building erected strictly for automobile shows in the West, is the big attraction that will be the center of interest for thousands of spectators at the Fresno district fair, which opens at noon tomorrow.

Even the new building, with double the space that was to be had in the old one, has been found inadequate for the needs of the automobile dealers of Fresno county who are behind this show. The new building was erected at a cost of \$15,000 and has been adapted only recently.

The building is a handsome structure, both from interior and exterior views. It is of brick construction with massive French windows in the four walls and large skylights in the ceilings to flood the building with light.

A total of 52 automobiles, including 11 trucks, are to be shown, representing the display of 30 dealers of this city. The automobiles include every type of automobile made, including sedans, coupes, runabouts, touring cars, sport models and campers.

Probably the biggest single attraction at the show will be the decorations and display that has been evolved. The decorations are of an artistic type, arranged around a color scheme of yellow, orange and black. At each end of the dealer's exhibit will be placed large parlor lamps on pedestals which are to have Chinese lanterns placed above them about which are placed the names of the dealer and the make of the car he is showing. The decorations are being arranged at an outlay of over \$10,000.

The success of the automobile show is due to Edwin Waterman, who has supervised the large amount of work and through whose untiring efforts the exhibits have been arranged satisfactorily to entrance.

An interesting part of the automobile exhibit is the display of several chassis, some of which have been converted into several thousand dollars.

At least a dozen chassis are to be shown.

Many Models Are Entered In Auto Show

Many of the companies this year are showing their 1922 models. The Cadillac people are bringing the 1922 models here direct from the factory in the East for the first showing of any place in the West. The exhibit list follows:

The Pacific Nash Company, showing the Nash and Lafayette; H. A. Sellers Company, showing the Paige and Davis; Harrison & Rogers, showing the Hudson and Essex; C. Anthony, Inc., showing the Packard; Leebler & Higgins, showing the Vetter; W. G. Dandy Motor Company, showing the Franklin; Moreland Truck Company, showing the Moreland; Mead & Grissel, Chalmers; Schuler Motor Company, King; S. Water Street, Inc., Buick; Logan Auto Co., Geo. and Durr; Walter M. Murphy Company, Lincoln; California Oakland Motor Company, Oakland; L. E. Cobb Company, Chandler and Cleveland; Williams, McAllister & Weber, Dodge truck; Hurdley Knight, Knight; Leach Billwell Motor Car Company, Leach; N. Hollingsberry, Hupmobile; Autocar Sales and Service Company, Autocar; Bertram Motor Company, Lexington; Ernest W. Johnson, Harmon; Williams, McAllister & Weber, Buick; R. M. Culbert Company, Oldsmobile; Don Lee, Cadillac; W. J. Huggins Company, Stephens; Willys-Cordell Pacific Company, Overland and Willys-Knight; Elliott C. Bradley, Studebaker.

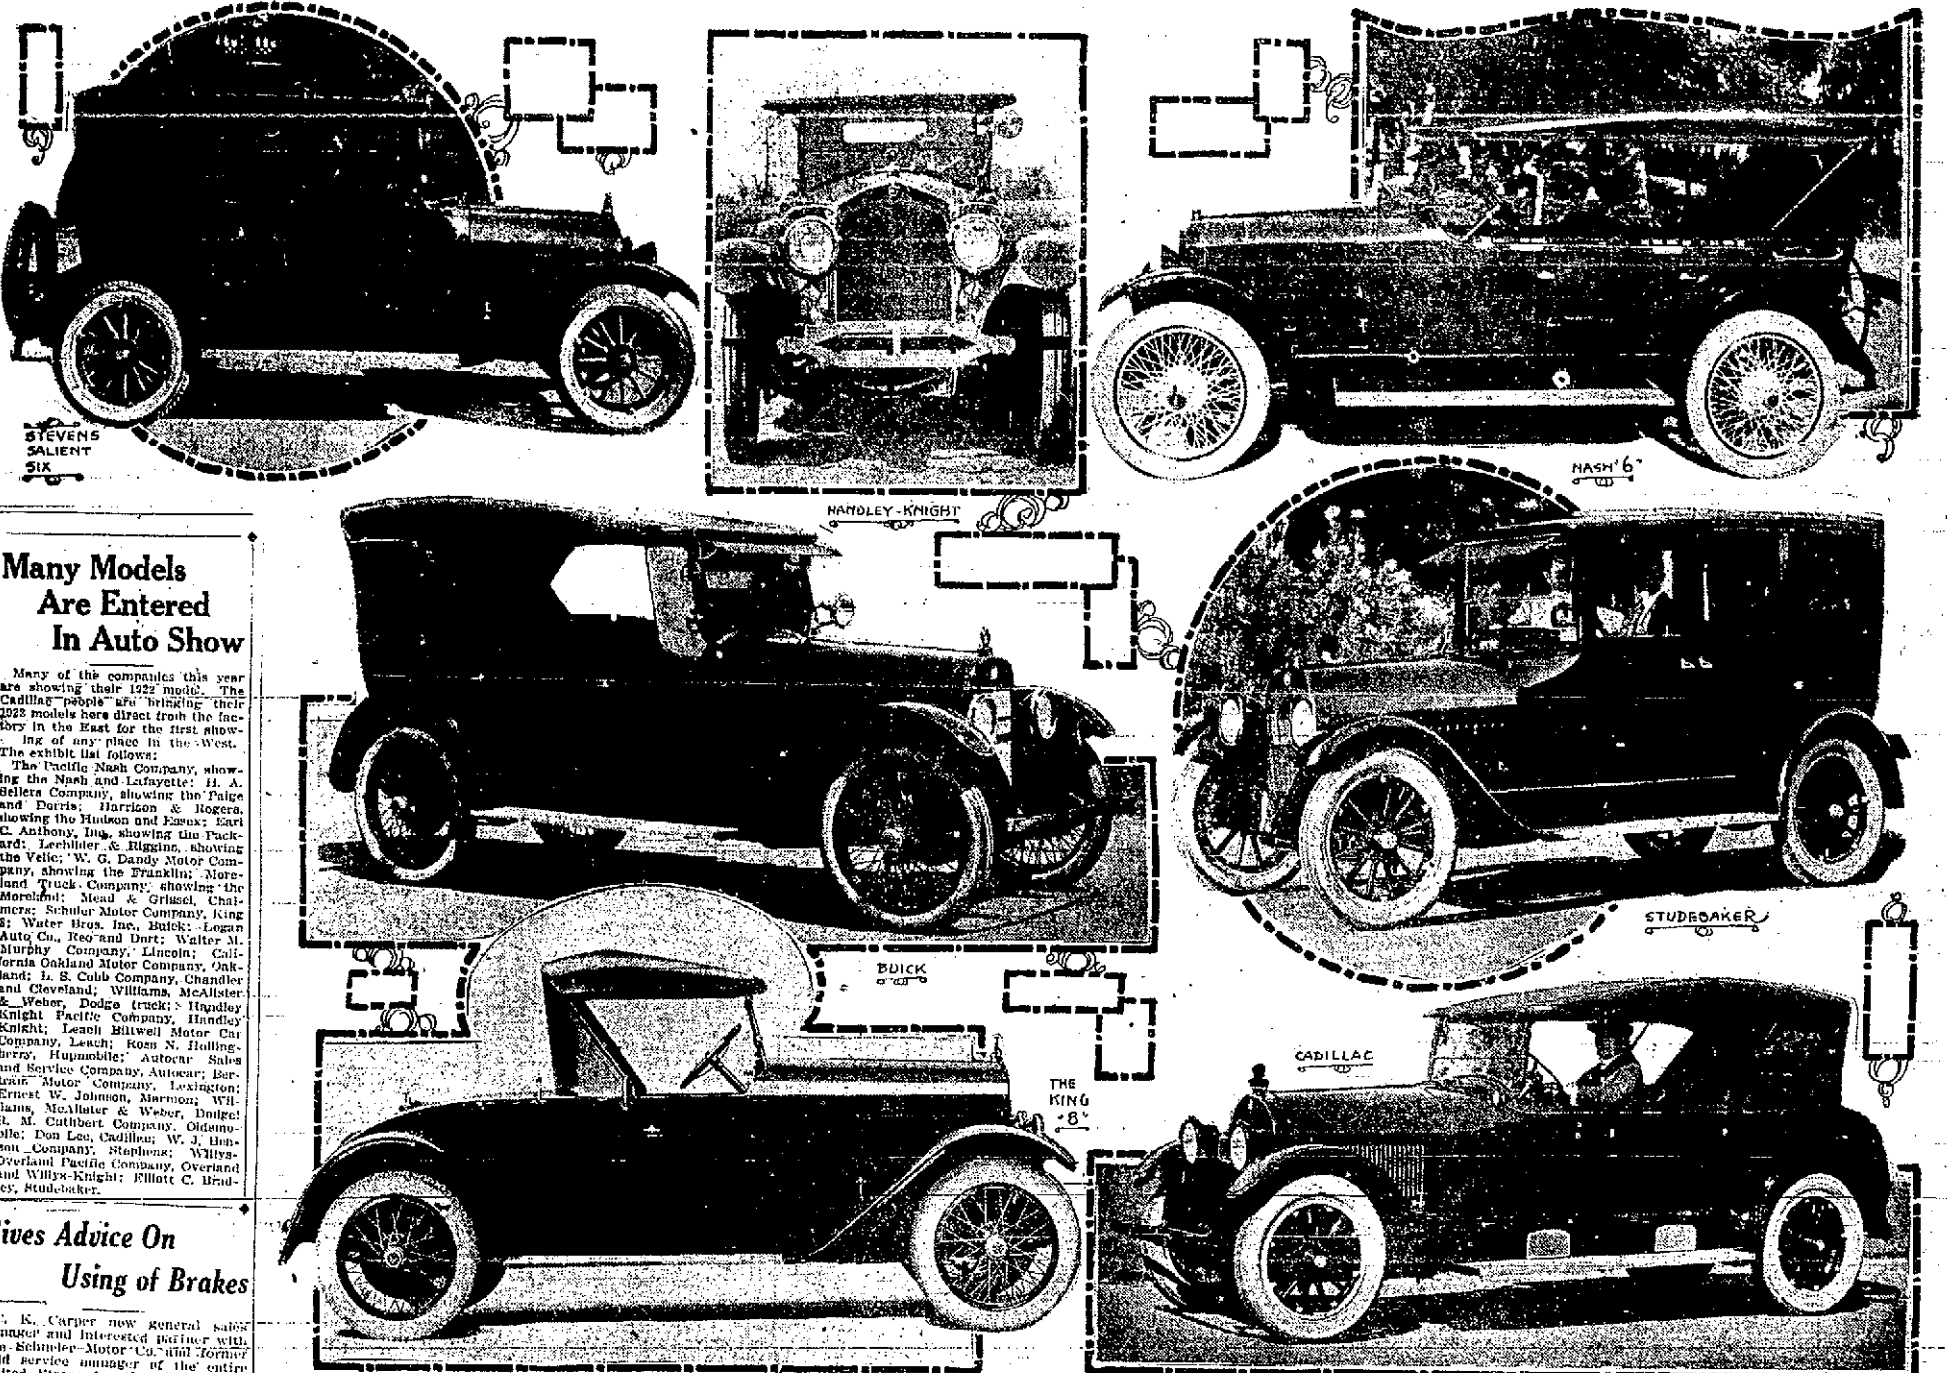

Gives Advice On Using of Brakes

C. K. Carper, now general sales manager and interested partner with The Schindler Motor Co., and former field service manager of the United States for King Motor Co. of Detroit, Mich., was asked the cause of poor braking and one of the most common causes of accidents on highways. He said that the cause of poor braking is usually the result of neglecting to keep the brakes in good condition. He said that the most common cause of poor braking is the neglect of the brake linings. He said that the brake linings should be checked frequently and if they are found to be worn, they should be replaced. He said that the brake linings should be checked frequently and if they are found to be worn, they should be replaced. He said that the brake linings should be checked frequently and if they are found to be worn, they should be replaced.

CLUTCH CARE IS EXPLAINED

Drivers Are Cautioned About Operation

The clutch is a very important part of the automobile. It is the part that connects the engine to the transmission. It is the part that allows the driver to change gears. It is the part that allows the driver to stop the car. It is the part that allows the driver to start the car. It is the part that allows the driver to drive the car. It is the part that allows the driver to live.

Prove Popular in the
Far East

Several years ago an energetic American startled the natives of China, Siberia and eventually the entire world, by driving a motor car across the famous Gobi desert. Since then it has been done repeatedly and transportation companies were formed for the express purpose of carrying passengers across this great expanse of waste land by motor car.

But even with the car improvements that have followed that first trip across the desert, the toll of the deep sands and countless other driving obstructions has been tremendous. The experiments have proven costly. The desert is decorated with discarded component parts all the way from Kalga to Urga. The transporting companies felt that the desert service was feasible but could not be put on a profitable basis until they found a car that would stand up to its job and keep going.

Then Charles L. Colman, head of the Monogram Trading Company, the man who made the first trip across the desert in a motor car, obtained the services of the Brothers, and the cars and started at once to operate them over the arid route. His success has been little short of remarkable. The cars are averaging between 15 to 18 miles to the gallon of the sort of gasoline which is the staple of the Far East, where there had no breakdowns to speak of and have become known to the natives as "the No. 1 car for all purposes." The companies are rapidly unloading the remnants of the surplus and substituting Dodge Brothers'.

A section of the Chinese army entrusted with the protection of the northern borders decided some time ago to enter the transportation business. This company likewise has a number of cars in operation on the desert and is arranging to use the same for the purpose of increasing their expedition from the performance of Dodge Brothers chassis equipped with bus bodies much larger and heavier than recommended. Two fleets of these busses are shown above.

The desert no longer is a terror to the motorist who is properly equipped and occasional stories of the duplication of the first famous trip only serve to bring smiles to those who know what is happening daily and what the inevitable final destination soon will reach.

Better Batteries For Less Money

"It is a relief to be able to sell a battery that does more and costs less than that of the big makers," says J. C. Smith, proprietor of the Smith-Webb Auto Supply Company, at Merced and Broadway.

"Maybe it was the result of the waste in material and the foolishness of labor that was paid during the war. Maybe it was the increased efficiency that battery makers have attained. Whatever the reason, they now produce a new one out of two old ones. I am selling today, The Philadelphia Storage Battery Company made it. They call it the Ford, Dodge, and Buick type. It's a Philadelphia type. I am selling Diamond Grid Battery. There are two things I like about it. It gives

"But," it was asked, "aren't you buying more new cars?"

"Yes, but I am!" said Mr. Smith.

"And I'm not selling yours, but offering more power at less money to the auto owners of this city. If the greater facilities and the bigger savings are not enough, the Philadelphia Storage Battery Company can show you just how much better than I should worry, and I can save them better."

He turned to his neighbor and said:

"I have a motor in my car which is

1917 Chalmers Is Still in Service

Indicative of the Chalmers ability to perform under the most trying conditions is the record of the 1917 Chalmers driven by Mack A. Erwin, a special representative of Camp Curry in the Yosemite Valley. The duties of Erwin kept him on the road almost continually and he traversed the Sierras in all sorts of weather.

Since he purchased his Chalmers in 1917, Erwin has driven more than 50,000 miles and declares that it is good for him to drive more miles under the same conditions.

He further says that his car maintenance has been very low because of the ruggedness of the Chalmers and the trouble and that his car has been in service, and not in the repair shop.

NEW CADILLACS ARE DISPLAYED

Three Types Are to Be
Shown at Fair

A formal exhibit of the new type of Cadillac was held throughout the past week and there was a constant stream of people coming in and out of the Lion Lee showroom from early morning until late at night. The exhibit will be continued at the fair this week. The display consisted of one seven-passenger model, and one standard passenger. This car is equipped with a very attractive trim in the rear and is one of the most modern cars on the floor. There is also one seven-passenger automobile. The new motor is practically the same Cadillac motor that has been used since 1915 when the eight-cylinder motor first appeared. Refinements and developments have resulted in greater power and smoothness. There has also been a decided advance in overcoming road discomfort and insuring riding ease. A car's performance and development has bettered Cadillac's acceleration so that its proverbial swift surge of power is even more immediate. The new motor is even more powerful than the old one. All models are much lower in appearance and certain changes in body lines and hood have added materially to the grace and artistic beauty of the Cadillac. All models are on the twelve inch wheels and have 33 by 5 tire equipment. The Cadillac factory is now in full production and large shipments of all models are expected during the next thirty days. Cars will be delivered in the order in which orders are placed.

The new models are generally voted by the thousands who have seen them to be among the most beautifully designed motor cars that have ever been produced in America. The tremendous crowds that have attended the openings in Los Angeles, San Francisco, Oakland and Fresno are a tribute to the popularity of the Cadillac and also to Don Lee, the California distributor. With the inauguration of the Type 61 season Don Lee begins his seventeenth season. From an organization of three men in 1905, Don Lee has grown until he now employs over 700 men and women in his California branches. He has sold over twenty thousand motor cars, of which over eleven thousand have been now eight-cylinder Cadillacs.

Special Brakes On New Duesenberg Car

The new Duesenberg is equipped with special hydraulic brakes on all four wheels that have been proven both footproof and perfect in thousands of tests. On repeated trials they stopped the flying car so quickly and so smoothly, as to convey an entirely new conception of motor safety. Applied at a 35-mile speed they stop the car in 45 feet, at a 55-mile clip the car was halted in 72 feet. In trials on the Indianapolis speedway Jimmy Murphy's car, while going 55 miles per hour, was stopped dead in 125 feet.

This new four-wheel hydraulic brake is unique with the new Duesenberg. Designer Fred Duesenberg took the basic patent of a Swiss inventor and modified it to motor car use. Its operation will be restricted to the new car he is now turning out in quantity at the Indianapolis factory. The new brake system is but one of the big points of the car. One of the others is the motor, a 260 cu. in. eight-cylinder reproduction of Tommy Milton's car of last season. The 1921 racing cars have but 180 cu. in. motors.

Motor Car Valuable in Crime Detection

What part does the motor car play in the detection of crime? This question can be easily answered according to Harold Schueler, local King's distributor.

"Today," states Schueler, "if the detection of crime, not only in America, but in other parts of the world, has been reduced as near as possible to an exact science. To meet the up-to-date criminal the police have been obliged to seek aid of scientific instruments and not least among them are the motor car and the motorcycle. It has been noted that the automobile has completely revolutionized the art of detecting crime by London's famous Scotland Yard. It is now a matter of speed and time in reaching the scene of the crime is most important at the present day. The criminal of today is a spy individual and in order to catch him the representative of the law must hurry."

Burning Rubber Is Signal of "Short"

If you smell burning rubber, according to W. G. Muscheid of the Luthy Battery service station, it is time to get busy and find the short circuit. For usually the smell of burning rubber comes from a hot wire somewhere, causing the rubber transmission to smolder. Feel all wires until you come to the hot one. The location of the short circuit is easily detected this way, and having located the trouble it is usually very simple to find where the trouble originates.

raising, offers the greatest possibilities in the world. I know of no section more inviting to the man who will take advantage of its natural resources. Nature has certainly been kind to our great valley.

The development of the valley should proceed as a whole. Each section has latent features of its own, and by co-operation, the various counties can bring about their development, as well as that of the entire valley, more rapidly. We should work as a unit from Stockton to Fresno and Bakersfield.

Activities of Farm Center Are Outlined

A tentative program of the activities of the Fresno Farm Center was outlined at a recent conference between the local committee and Farm Agent Grass, Secretary Knott, Home Demonstration Agent Miss Pearl Penberton and Miss May Secrest, assistant state leader. Many features such as all day demonstrations and evening meetings with the women's department in charge will be carried out during the year.

DEMONSTRATION AT FRESNO FAIR Double Seal Oil Control Piston

Designed and Constructed
On Sound
Engineering Principles

The action of this piston is such that oil from the crank case cannot get up into the combustion chamber.

This is because of its oil-control feature which equalizes the pressure of air, which is always present in the crank case, by a corresponding amount of air pressure above the oil groove. This action causes the excess oil which usually gets by the skirt of any piston, to flow back into the crank case from the oil groove.

Urge Protection For Spare Tires

When looking over the tires on a car, motorists are advised to consider the spare on hand. Unless it is covered to protect it from light, water, oil and heat it will rapidly deteriorate. These four enemies of rubber will take the life out of any rubber tire product in only a short time. It is regarded as important to make sure that the spare tire is fastened

securely to the carrier. If there is any noticeable play in the fastenings, there will be constant rubbing against the casing which will eventually prove injurious.

Once in a while a few drops of oil should be placed on the detachable rim bolts, experts say. Oil should also be used when an old tire has rusted to the rim and refuses to give up its hold.

G. Tupper, of the firm of Tupper & Hocker, Brunswick dealers, advises that particular care should be taken that all oil be removed from the casing when the job is finished.

Chandler

What It Means to Own a Chandler

It means an exclusive Chandler motor found under the hood of no other car. Thousands of owners call it the (marvelous motor) equipped with a high-tension Bosch Magneto that knows no superiority in ignition equipment. It means a good standard automobile built by a solid and substantial factory and represented by reliable dealers.

We are in position to accept as part payment twenty-five used automobiles, on new Chandler cars. If you are interested, call and see us and we feel sure that we can convince you that it will be to your advantage to drive a Chandler.

The Chandler will be on exhibition at the Fresno District Fair, and we cordially invite you to call at our booth and inspect this wonderful car.

PRICE CUTTING IS BENEFICIAL

Motor Car Production Is Stimulated

That price reductions in the motor field have stimulated the demand and have tended to restore "radio stability" is the opinion of W. G. Dandy, Franklin dealer.

"Production reports from motor car and truck factories of the United States show that the output of vehicles in the second quarter of this year was 87 per cent. of that of the corresponding quarter of 1920," he said.

"Passenger cars are said to be producing at the rate of 105 per cent. or more than double the rate of construction for the first quarter of this year. Motor truck production is

Fresno Man With Stevens-Duryea Firm

Known in Central California automobile circles Paul Kollmorgen former representative for the Walter Murphy company, up to a short time ago, has joined the F. A. Brinkman company Stevens-Duryea distributors in the capacity of general manager in San Francisco.

Kollmorgen is gathering together a sales force in the bay city, and anticipates a big future for the car he is handling.

Dr. A. A. Brown, Dentist, 510 Griffith-McKenzie Bldg.

Milton Joins Ranks of Business Men

Tommy Milton has been added to the list of racing drivers who have become business men. Barney Oldfield, is a tire manufacturer; Eddie Rickabaugh, is a motor car manufacturer; Earl Cooper is an accessory dealer; Teddy Tetzlaff is a garage proprietor.

Milton recently left California to business world as distributor of the California-made Perfecto two speed axle for the state of Pennsylvania. Milton recently left California to take up his new duties in the East. While the firm will not carry Milton's name, he will not give up racing driving entirely at this time to devote his attention solely to his business. He will continue to drive, and is to appear in the coming coast events including the Fair classic in Fresno. After completing his engagements he will leave for the East to look after his interests there.

Why Does The WILLYS KNIGHT Motor Improve With Age?

By the way remember last July when the Willys Knight stock car traveled 10,387 miles in ten days on the Fresno Speedway, demonstrating beyond a question of doubt the superior qualities of the famous Willys Knight sleeve valve motor.

A question often asked but easily answered by the WILLYS KNIGHT Chassis on exhibit at the Fair all week.

This chassis was constructed at a cost of \$20,000—

Everything before your eyes.

COBB TIES HEILMAN FOR LEADERSHIP**BABE RUTH IS RUNNER-UP FOR LEAD****HORNSBY GAINS IN NATIONAL LEAGUE**

CHICAGO, Sept. 24.—Ty Cobb has climbed into a tie with Harry Heilmann for the batting honors of the American League. The Georgia coach is leading .324, while Heilmann, who has been holding top place in the league, dropped from .328 to a tie with his manager.

Babe Ruth added a league of home runs to his strike and brought his season's record to 26. Ruth is trailing for the batting honors with a mark of .274, four points in front of George Stiehr.

Ruth leads in runs.

Ruth is leading in runs with 168. He has more 100 hits and home runs than any other player in the league. His hits include 10 doubles and 15 triples.

Stiehr leads in stolen bases and has 17. E. Harris of Washington failed to add to his string of 26.

Other leading batters for 50 or more games:

Spencer, Cleveland, .304; Tobin, St. Louis, .300; Williams, St. Louis, .300.

Jack Leonard, a teammate of Hornsby, retained his position as runner up with a mark of .316. Melvin, another member of the Cardinals, is pushing the big Frenchman with an average of .317.

George Kelly of the Giants, adding one, brought his season's home run record up to 21.

Other leading batters for 50 or more games:

Cutshaw, Pittsburgh, .246; Roush, Cincinnati, .246; Crutcher, Boston, .238; Fritch, New York, .238; J. Smith, St. Louis, .238; Meusel, New York, .235; Groh, Cincinnati, .235.

**LOCAL S. O. NINE
BATTLES LEMOORE
TEAM HERE TODAY**

Locals Meet Sun Maids
Next Sunday

The Fresno Standard Oil Company baseball club will take on the Lemoore club, champion team of the north division of pipe-line teams, on the Lemoore field this afternoon at 2 o'clock.

The Lemoore club has been playing a flashy brand of ball throughout the season, which is showing by their capturing the championship of the south division

of pipe-line teams. They have defeated Tall, Coalinga, Hanksfield and other clubs.

The local team has been playing Standard Oil clubs for the past three months and have lost but one game, that going to the Stockton team two weeks ago. The team is made up mostly of talent from the Standard Oil Company of Fresno.

They have looked games with the San Joaquin club, champions of the Business League for a game on Holmes playground next Sunday. The following Sunday the locals will journey to Sacramento, where they will hook up with the standard oil team of that city.

Word will be on the firing line for the locals and Carlisle on the receiving end. Sutherland and Hazard will form the visitors' battery.

**WOODMEN INVADE
LEMOORE TODAY**

The Woodmen of the World baseball club will journey to Lemoore today, where they will invade the camp of the Lemoore Cubs, formerly Valley League team.

The Lemoore club will have the well-known Cy Falkenberg on the firing line for them. The Cubs are made entirely of talent from Lemoore and they have one of the best teams in the valley at present. They have been defeating the best teams around this section.

The local club has one of the fastest lineups of the city to invade Lemoore, and they expect to bring home the honor. Following is the lineup: Jewett, if; H. Bidwell, p.; U. Bidwell, 1b.; Kohl, 2b.; Ritchie, c.; Hansen, 3b.; LaFever, 2b. and Stockholm 1b.

**MODESTO PLAYER
RETURNS HOME**

MODESTO, Sept. 24.—Walter Koeley, 20-year-old son of County Auditor Howard Koeley, who has been playing with the Cedar Rapids club of the Three I league since early in the spring, returned home Thursday, having found it necessary to give up the game temporarily due to an injured leg and back.

When Koeley first went east he played during the spring practice with the Brooklyn club, but later went to the Cedar Rapids team.

He was an all-around athlete at the Modesto high school. He also took a great interest in sand-lot baseball. He played in the Stanislaus county league with practically every team in that circuit.

Young Koeley made the St. Mary's va-

What a demonstration will
show you about
The FRANKLIN

EASY STARTING; no pushing of button or meshing of gears—simply turn a switch and the motor starts.

EASY TO CONTROL; being light, it gets under way quickly, stops quickly and steers without effort.

SIMPLE TO DRIVE; automatic sparks and throw, responsive break, easy acting clutch. If engine stalls accidentally, starter functions automatically.

COMFORTABLE; rides "softly" light weight and the flexibility iron-out rough-going, give roadability.

SIMPLE TO CARE FOR; no radiator to fill and fuss with; only three grease cups to fill; wick-welling system.

FREE FROM TROUBLE; average but three punctures and less than one blow out in life of complete set of tires—15,000 miles. Air cool, therefore never any cooling troubles of any sort.

ECONOMICAL

20 Miles to the gallon of gasoline.
15,000 miles to the set of tires, 50% lower depreciation.

NEW PRICE EFFECTIVE SEPT. 1, 1921.

City Officials Will Attend League Meet

The city hall delegation to the League of Municipalities meeting at Santa Monica, which opens Monday, will leave at one o'clock today by automobile. The party consists of Mayor Truman G. Hart, Commissioner Glenn De Vere and Chief Deputy

Rentons of the department of public works. Other city officials who plan to leave by train for the convention are City Attorney Johnston, R. Y. St. George, city clerk, Dr. C. Mathewson, city health officer, and W. McGinniss, chief milk inspector. The mayor's party will spend Sunday night at Lebec, continuing the trip tomorrow morning to Santa Monica. During the convention this part will make headquarters at Ocean Park hotel.

To Show Pictures of Desert Drive

"Buck-a-roo-ing" a motor car through the sand dunes and rocks of the Mojave desert in Southern California—that twin region to Death Valley—as shown by "The Trail of the Arrow" motion pictures at the Fair this week is one of the most thrilling scenes of motor car driving ever shown to the public. From the first moment that the beam of light comes from the projecting room, this picture is one continuous thrill until the final scene where the S. X. Arrow catapults backward down the 57 per cent slope and finally lands at the bottom of the desert's "Punch Bowl" two minutes before the time limit in the wager of \$1,000.00, which was won by the two young girls who made the daring drive.

Never before has anything like it been attempted in this country and those who see the "Trail of the Arrow" this week at the Fair will realize the terrific punishment the Essex Motor Car can stand. The thrilling drive is such a undisputable evidence of dependability construction that Essex Motor Cars at once assume leadership in power, performance, and economy of operation.

San Quentin Term Imposed on Duso

An indeterminate sentence in San Quentin was imposed upon Fred Duso, who pleaded guilty to a charge of lewd and lascivious conduct toward three minor girls yesterday by Judge C. E. Beaumont. Duso was recently examined as to his sanity, but was found to be sane. The usual penalty for the offence, court officials stated, is life imprisonment. Dr. Clarence C. Rude has returned.

No short circuits! 80% of your battery troubles eliminated

The chief cause of battery troubles is short circuits within the cells, caused by plates touching when separators rot away.

This source of trouble, with its hovering shadow of repair bills and rental charges for loan batteries, has been eliminated in the "Luthy."

Luthy patented separators of "Luthite" are acid-resisting; they do not rot like wood or rubber-compound separators and they never need renewing.

Furthermore, Luthy plates do not buckle, nor can they be jarred loose and short circuit, because Luthy patented insulating channel strips hold them rigidly in place.

No formations develop in Luthy batteries either to reduce the activity of plates or to cause electrical connections to rot and break.

Because of its merits, we are able to give with each Luthy battery a written guarantee from the makers. "Two years service or a new battery without cost." Better come in today and examine the "Luthy." There is a Luthy battery for each type of car.

We repair and give service on all makes of batteries.

Large bushy plant with large and beautiful
flowers. The flowers are large and
white with yellow centers. The leaves are
large and green. The plant is very hardy
and will grow in any soil. It is a very
good plant for the garden.

1. The first of these is the fact that the majority of the population of the United States is now living in urban areas. This is a result of the process of urbanization, which has been going on since the beginning of the 20th century. The population of the United States has increased from about 100 million in 1900 to over 200 million in 1950, and this increase has been largely due to the growth of cities and urban areas. The majority of the population now lives in areas with a population density of more than 100 people per square mile. This has led to a number of problems, including overcrowding, pollution, and the loss of open space. The second of these factors is the fact that the majority of the population is now living in the South and West. This is a result of the process of migration, which has been going on since the beginning of the 20th century. The population of the United States has increased from about 100 million in 1900 to over 200 million in 1950, and this increase has been largely due to the growth of cities and urban areas. The majority of the population now lives in areas with a population density of more than 100 people per square mile. This has led to a number of problems, including overcrowding, pollution, and the loss of open space.

AUTO CLUB IN NEW OFFICES

Complete Information
Bureau Maintained

Every day numbers of local people come in to our new quarters, inquiring as to new roads, road conditions, etc. in the territory covered by this district of the California State Automobile Association, as well as for information on trips across the continent and into Canada," said W. A. Moore, local manager yesterday in speaking of the activities of the organization, which goes to show that the traveling public are beginning to realize the importance of proper road information before starting on long or short trips, thereby preventing unnecessary mileage, wear and tear on their cars and the dissipation of their own money.

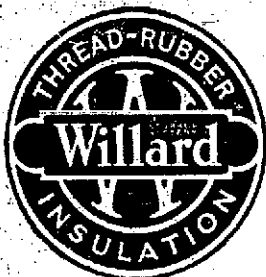

The association operates a complete touring bureau at its local office, located at Broadway, where any person can secure information as to conditions of roads, mileage, etc. It also has at the main entrance to Fresno large yellow signs directing the stranger to places where they can get proper information. While the association is primarily a membership proposition, and has over 5,000 members in Fresno county alone, this information is given cheerfully and freely, as it has been our experience that sooner or later those obtaining information become members, having realized just what an organization of this kind is doing for their benefit. Up to date information is kept on all roads within a maximum radius of Fresno and the bureau can give information as nearly correct as possible to obtain. Those who are anticipating trips are asked to get correct information before leaving.

Auto Taxes Total
About \$148,720,800

The automobile already pays in Federal taxes alone, (\$148,720,800) enough to cover the Federal Judiciary, Congressional and Executive expenses as well as the Department of Interior, Commerce, Treasury, Justice, Labor and Agriculture (\$138,282,000), plus the expenses of the Diplomatic and Consular Service (\$8,236,000).

HAIR DYEING

A Truly BONE DRY Battery

This trademark, stamped in red on the case, identifies the Willard Thread-Rubber Battery.

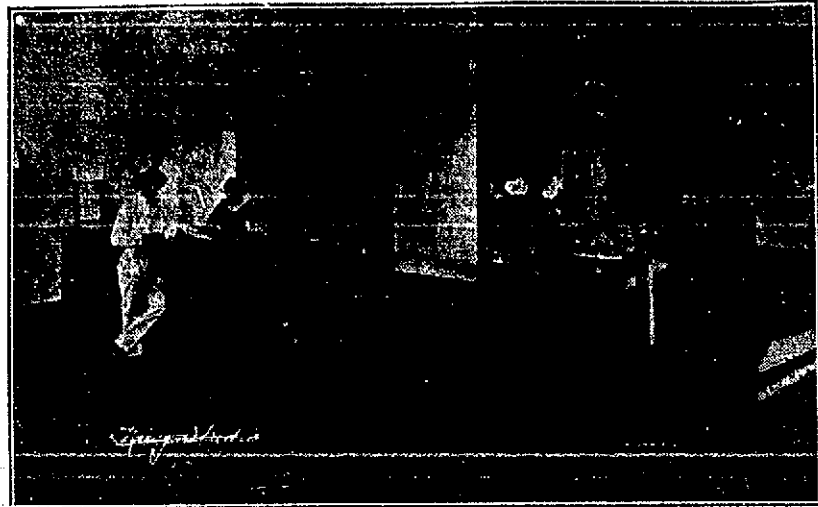

Bone Dry means not only that the battery has no solution in it, but that it has never, since the day it was made, had a single drop of moisture in it until prepared for service by the dealer. It is shipped in the true bone-dry condition that means battery newness to you.

**Eddie Pullen Had
To Be Taught to
Drive Ford Coupe**

Eddie Pullen, famous race driver, recently invested in a Ford coupe and had to be taught to run it. His final master of the controls, and he may one of the most enthusiastic boosters for that car, according to J. E. Hodman, sales manager for O'Brien-Wolfe.

**Blow Out Patches
Should Be Removed**

Trying to make a blow out patch do the work of a permanent repair job is a good way to ruin tires, according to E. J. Wilson, local tire dealer. The blow patch is a first-aid to meet the emergency, but as soon after the blow as possible it should be removed and the permanent repair made. Unless this is taken care of in this way the result will be that a weakened spot will be left in the tire. A blow-out patch does not unite itself with the rubber stock in the tire. It remains separate and, during the wearing that takes place while the car is in motion, chafes against the ragged edge of the cut in the casing. In time the hole reaches such proportions that it becomes difficult if not impossible to repair.

When a great cut is responsible for the blow-out the result is generally a clean cut hole. Where the fabric is revealed or torn apart fabric separation is generally the cause. The standard innke tires offered the motorist today will not blow out in their prime if given the proper care. Driving over broken glass, into curbs, into road holes and over rocks are usually responsible for loss of mileage. The safest way is to have tires inspected by an expert tire man regularly. He can eradicate the cause of any future trouble before it is too late.

Lee Puncture Proof Tires Are Guaranteed Against Puncture

---They Come in Both Fabrics and Cords and Just as Sure as You Use Them Once You'll Use Them Always.

LEE PUNCTURE PROOF TIRES are exactly what the name implies—they are puncture proof. You can hit nails, or any other sharp instrument and go merrily on your way without the delay, inconvenience and expense that would naturally come from coming in contact with these obstacles with the ordinary tire.

LEE PUNCTURE PROOF TIRES are the cheapest and best tires on the market and if you have any doubts you can ask someone who has used them during the last year.

**Lee Tires Also Come
in Regular Cords
and Fabrics**
